The Inter-Processual Self Jan 01 2020 How should we understand the self, as well as personal, relational and systemic growth? This volume proposes a radical new way of answering this question. It rests on a non-representational theory of knowledge on how to approach and understand the self and action more broadly. Although it has never been lost, the Aristotelian emphasis on excellence in moral character and practical reason as preconditions for achieving happiness has gradually been degraded. This book suggests that this has happened thanks to a split between knowledge and action that can be traced back to the origins of modernity. Modern academic disciplines in general, and psychology in particular, are based on the idealisation of theoretical, hypothetical and abstract reason, suggesting that this morally neutral ideal must guide human action. This volume systematically integrates those domains in a more profound and meaningful proposal, relevant for current times and challenges. Based on previous research bridging philosophy, psychology and neuroscience, the contributors here identify two alternative paradigms for conceiving of the self and

human development: the so-called “autonomous self” (AS) and the “inter-processual self” (IPS). The book considers the person as an ethical being and as the foundational cornerstone of a new theory of self, action and knowing that achieves decisive distance from modern theory’s limitations. To keep on-going dialogue on human development open, the authors introduce a new theoretical model (IPS) which can be scientifically measured and tested; they also suggest its further application in concrete, practical realms, thus touching on how the adoption of the IPS paradigm inspires a renewed view of human cognition, education, governance, and business management.

Nuclear Energy for Hydrogen Generation through Intermediate Heat Exchangers Feb 11 2021 This book describes recent technological developments in next generation nuclear reactors that have created renewed interest in nuclear process heat for industrial applications. The author's discussion mirrors the industry's emerging focus on combined cycle Next Generation Nuclear Plants' (NGNP) seemingly natural fit in producing electricity and process heat for hydrogen production. To utilize this process heat, engineers must uncover a thermal device that can transfer the thermal energy from the NGNP to the hydrogen plant in the most performance efficient and cost effective way possible. This book is written around that vital quest, and the author describes the usefulness of the Intermediate Heat Exchanger (IHX) as a possible solution. The option to transfer heat and thermal energy via a single-phase forced convection loop where fluid is mechanically pumped between the heat exchangers at the nuclear and hydrogen plants is presented, and challenges associated with this tactic are discussed. As a second option, heat pipes and thermosyphons, with their ability to transport very large quantities of heat over relatively long distance with small temperature losses, are also examined.

Original Nation Approaches to Inter-National Law Oct 29 2019 "A bold shot across the bow of orthodoxy where conceptions of world order are concerned, Original Nation Approaches to Inter-National Law is sure to stimulate reconsideration of a range of past assumptions regarding the legitimacy and even the viability of the prevailing statist system of global dominion. In offering clear alternatives, this book is not only timely but urgently needed." --Ward Churchill, author of Struggle for the Land (1993), On the Justice of Roosting Chickens (2003), and Kill the Indian, Save the Man (2004) "A powerful manifesto for a true 'Inter-National' law against the hegemonic 'international' system of states and a resounding reminder that human emancipation cannot be separated from ecological justice." --Chulwoo Lee, Professor of Law, Yonsei Law School, Korea This book introduces the Original Nation scholarship to examine the historical genealogy of the nation's struggles against the state. A fundamentally different portrait of history, geography, politics, and the role of law emerges when the perspective of the nation and peoples is placed at the center of geopolitical analysis of global affairs. In contrast to traditional and canonical state-centric narratives, the Original Nation scholarship offers a diametrically distinct "on-the-ground" and "bottom-up" portrait of the struggle, resistance, and defiance of the nation and peoples. It exposes persistent global patterns of genocide, ecocide, and ethnocide that have resulted from attempts by the state to

Recoveries, Remnants and Inter-Asian Interconnections: Decoding Cultural Heritage has its conceptual core the inter-regional networks of Nalanda Mahavihara and its unique place in the Asian imaginary. The revival of Nalanda university in 2010 as a symbol of a shared inter-Asian heritage is this collection's core narrative. The multidisciplinary essays interrogate ways in which ideas, objects, texts, and travellers have shaped — and in turn have been shaped by — changing global politics and the historical imperative that underpins them. The question of what constitutes cultural authenticity and heritage valuation is inscribed from positions that support, negate, or reframe existing discourses with reference to Southeast and East Asia. The essays in this collection offer critical, scholarly, and nuanced views on the vexed questions of regional and inter-regional dynamics, of racial politics and their flattening hegemonic discourses in relation to the rich tangible and intangible heritage that defines an interconnected Asia.

Inter-American Relations Jan 31 2020 This volume is a collection of essays presented at the 20th annual Eugene Scassa Mock Organization of American States conference, which is the nation’s only “hybrid” conference including an inter-collegiate competition and simulation of the Organization of American States, a moot court simulation of the Inter-American Court of Human Rights, and a traditional academic conference for faculty and graduate students centered on the study of Inter-American relations and politics within the Western Hemisphere. The conference invited recognized authorities and promising new scholars in the vastly varied fields associated with Latin American studies. Taking a broad view of the academic study of the Western Hemisphere, the conference and, subsequently, this volume includes research from fields as diverse as international law, spatial geography, literature, religion, political science, and history. Taken together, these essays provide a fascinating multi-dimensional look at the intricate relationships between the polities and cultures of the Americas.

approach more complex German texts. Each piece of vocabulary is embedded in at least three example sentences in order to appeal to active understanding and trigger both short-term and long-term memory. Whenever possible, different meanings of the terms or expressions concerned are also illustrated. The vocabulary lessons are interspersed with concise but essential reminders of German grammar. At the end of the book, readers are offered a bilingual, paragraph for paragraph version of one of E. T. A. Hoffmann's famous stories, namely "Rath Krespel" (1818), translated in English by J. T. Bealby (1885). In each pair of bilingual paragraphs, important words to retain or recognize are emphasized in bold or underlined. Finally, the bilingual version is followed by the original, German only text of Hoffmann's novel - which readers are advised to go through, even if by now they know the narrative - since it is essential to retrieve and fully consolidate all learned German terms into their original context.
