**Creating the Work You Love** Aug 31 2022 In this unique and provocative look at work, career counselor Rick Jarow argues for a return to the concept of vocation--finding a "calling" instead of a job. Traditional career guides inventory the individual skills, talents, and abilities that correlate to specific existing jobs. Creating the Work You Love presents a unique alternative approach, using self-reflective exercises based on the seven chakras, to help you determine the elements you need to create a life filled with meaning and purpose. Jarow believes that it is possible to live and act from the most authentic part of ourselves, and to express our strongest values, energies, and talents through our work in the world. Concentrating on the attributes associated with each of the body's energy centers, or chakras, Dr. Jarow helps us form a bridge between our personal priorities and the external activities of the work world. Once this bridge is established, strategies are developed to find a career that nourishes all aspects of our lives.

[Work Won't Love You Back](#) Nov 21 2021 Whether it's working for free in exchange for 'experience', enduring poor treatment in the name of being 'part of the family', or clocking serious overtime for a good cause, more and more of us are pushed to make sacrifices for the privilege of being able to do work we enjoy. *Work Won't Love You Back* examines how we all bought into this 'labour of love' myth: the idea that certain work is not really work, and should be done for the sake of passion rather than pay. Through the lives and experiences of various workers--from the unpaid intern and the overworked teacher, to the nonprofit employee, the domestic worker and even the professional athlete--this compelling book reveals how we've all been tricked into a new tyranny of work. Sarah Jaffe argues that understanding the labour of love trap will empower us to work less and demand what our work is worth. Once freed, we can finally figure out what actually gives us joy, pleasure and satisfaction.

*Love + Work* Feb 22 2022 Love has been driven out of our workplaces.

How do we get it back in? We're in the middle of an epidemic of stress and anxiety. A global pandemic has wreaked havoc on our lives. Average life expectancy in the United States is down. At work, less than 16 percent of us are fully engaged. In many high-stress jobs, such as distribution centers, emergency room nursing, and teaching, incidences of PTSD are higher than for soldiers returning from war zones. We're getting something terribly wrong. We've designed the love out of our workplaces, and our schools too, so that they fail utterly to provide for or capitalize on one of our most basic human needs: our need for love. As Marcus Buckingham shows in this eye-opening, uplifting book, love is an energy, and like all forms of energy, it must flow. It demands expression—and that expression is "work." Whether in our professional accomplishments, our relationships, or our response to all the many slings and arrows of life, we know that none of this work will be our best unless it is made with love. There's no learning without love, no innovation, no service, no sustainable growth. Love and work are inextricable. Buckingham first starkly highlights the contours of our loveless work lives and explains how we got here. Next, he relates how we all develop best in response to other human beings. What does a great work relationship look like when the other person is tuned to your loves? What does a great team look like when each member is primed to be a mirror, an amplifier, of the loves of another? Finally, he shows how you can weave love back into the world of work as a force for good, how you can use your daily life routines to pinpoint your specific loves, and how you can make this a discipline for the rest of your life. Today, too often, love comes last at work, and we are living the painful consequences of this. Love + Work powerfully shows why love must come first—and how we can make this happen.

**So Good They Can't Ignore You** Jun 28 2022 Cal Newport's clearly-written manifesto flies in the face of conventional wisdom by suggesting that it should be a person's talent and skill - and not necessarily their passion - that determines their career path. Newport, who graduated from Dartmouth College (Phi Beta Kappa) and earned a PhD. from MIT, contends that trying to find what drives us, instead of focusing on areas in which we naturally excel, is ultimately harmful and frustrating to job seekers. The title is a direct quote from comedian Steve Martin who, when once asked why he was successful in his career, immediately replied: "Be so good they can't ignore you" and that's the main basis for Newport's book. Skill and ability trump passion. Inspired by former Apple CEO Steve Jobs' famous Stanford University commencement speech in which Jobs urges idealistic grads to chase their dreams, Newport takes issue with that advice, claiming that not only is this advice Pollyannish, but that Jobs himself never followed his own advice. From there, Newport presents compelling scientific and contemporary case study evidence that the key to one's career success is to find out what you do well, where you have built up your 'career capital,' and then to put all of your efforts into that direction.

A Life at Work Jul 06 2020 A job is never just a job. It is always connected to a deep and invisible process of finding meaning in life through work. In Thomas Moore's groundbreaking book Care of the Soul, he wrote of "the great malady of the twentieth century...the loss of soul." That bestselling work taught readers ways to cultivate depth, genuineness, and soulfulness in their everyday lives, and became a beloved classic. Now, in A Life's Work, Moore turns to an aspect of our lives that looms large in our self-regard, an aspect by which we may even define ourselves—our work. The workplace, Moore knows, is a laboratory where matters of soul are worked out. A Life's Work is about finding the right job, yes, and it is also about uncovering and becoming the person you were meant to be. Moore reveals the quest to find a life's work in all its depth and mystery. All jobs, large and small, long-term and temporary, he writes, contribute to your life's work. A particular job may be important because of the emotional rewards it offers

or for the money. But beneath the surface, your labors are shaping your destiny for better or worse. If you ignore the deeper issues, you may not know the nature of your calling, and if you don't do work that connects with your deep soul, you may always be dissatisfied, not only in your choice of work but in all other areas of life. Moore explores the often difficult process—the obstacles, blocks, and hardships of our own making—that we go through on our way to discovering our purpose, and reveals the joy that is our reward. He teaches us patience, models the necessary powers of reflection, and gives us the courage to keep going. *A Life's Work* is a beautiful rumination, realistic and poignant, and a comforting and exhilarating guide to one of life's biggest dilemmas and one of its greatest opportunities.

*Your Best Work* May 16 2021 Whether you've toiled for decades at the same job or you're facing important, first-career decisions, you know how important it is to care about your work. But how do you create a deeply meaningful working life in a world that tries to set your career expectations and limit your choices?

Breaking Things at Work Apr 14 2021 An exhilarating challenge to the way we think about work, technology, progress, and what we want from the future In the 19th century, English textile workers responded to the introduction of new technologies on the factory floor by smashing them to bits. For years 'the Luddites' roamed the English countryside, practicing drills and maneuvers that they would later deploy on unassuming machines. The movement has been derided by scholars as a backwards-looking and ultimately ineffectual effort to stem the march of history; for Gavin Mueller, the movement gets at the heart of the antagonistic relationship between workers - all workers, including us today - and the so-called progressive gains secured by new technologies. The luddites weren't primitive or even anachronistic - they are still a force, however unconsciously, in the workplaces of the 21st century world. *Breaking Things at Work* is an innovative rethinking of labor and machines, leaping from textile mills to algorithms, from existentially threatened knife cutters of rural Germany to surveillance evading truckers driving across the continental United States. Mueller argues that the future stability and empowerment of working class movements will depend on subverting these technologies and preventing their spread wherever possible. The task is high, but the seeds of this resistance are already present in the Neo-Luddite efforts of hackers, pirates, and dark web users who are challenging surveillance and control, often through older systems of communication technology.

It is the only book to take readers through the whole process of creating an income from a passion, identifying which interest they could monetize, choosing a bespoke path and learning

how to become an expert in their chosen field. Part 1 explains how to discover a marketable passion with the help of the Dream Job Chart, which guides you in assessing your business ideas, skills and the causes you are passionate about. Once you have clarity on your passion, Part 2 describes the three possible paths to creating an income from it, offering inspiring examples of both famous and everyday people who have successfully followed each path. The Adventurer's Path is for those of a braver disposition and with few family commitments. The Strategist's Path is for those with patience, flexibility and a lower tolerance for risk. The Grinder's Path is for those who feel a need to continue with their present work while also pursuing their dream. Finally, Part 3 explores the four stages to becoming an expert in your chosen field, so that people will pay you for your skill or product. Along the way you will learn: • Why bad luck can't stop you • the right time to quit your job • how to use freelancing or consultancy to help you reach your goal • how to make progress with your passion even if you are working full-time • what to do if you're over 50 and want to create an income from your passion • and much, much more!

**Life After Law** Sep 27 2019 " Written by Harvard-trained ex-law firm partner Liz Brown, *Life After Law: Finding Work You Love with the J.D.* You Have provides specific, realistic, and honest advice on alternative careers for lawyers. Unlike generic or abstract career guides, *Life After Law* shows lawyers how to reframe their legal experience to their competitive advantage, no matter how long they have been in or out of practice, to find work they truly love. Brown herself moved from a high-powered partnership position into an alternate career and draws from this experience, as well of dozens of former practicing attorneys, in the book. She acknowledges that changing careers is hard - much harder than it was for most lawyers to get their first legal job after law school - but it can ultimately be more fulfilling for many than a life in law. *Life After Law* offers an alternative framework and valuable analytic tools for potential careers to help launch lawyers into new fields and make them attractive hires for non-legal employers. There are hordes of people—HR consultants, communication coordinators, telemarketing researchers, corporate lawyers—whose jobs are useless, and, tragically, they know it. These people are caught in bullshit jobs. Graeber explores one of society's most vexing and deeply felt concerns, indicting among other villains a particular strain of finance capitalism that betrays ideals shared by thinkers ranging from Keynes to Lincoln. "Clever and

charismatic" (The New Yorker), Bullshit Jobs gives individuals, corporations, and societies permission to undergo a shift in values, placing creative and caring work at the center of our culture. This book is for everyone who wants to turn their vocation back into an avocation and "a thought-provoking examination of our working lives" (Financial Times).
