Advances in Child Development and Behavior

Mycenaean Civilization Apr 30 2020 Classical Greeks

considered the Mycenaean civilization to be the basis of their glorious and heroic heritage, but its material existence was not confirmed until the excavations of Heinrich Schliemann in the late nineteenth century. In the ensuing years, as with the field of archaeology in general, emphasis has shifted from revealing monuments and finding treasure to dealing with less glamorous, more scientifically-oriented investigations concerning aspects such as social and political organization, economic functions and

settlement patterns. With its more than 2000 entries, this reference work serves as both an introduction to and a summary of the study of ancient Mycenaean civilization. Considerably expanded from the first edition, there are 500 new entries representing materials published since 1991. The largest part of the book is made up of annotated bibliography entries arranged topically with introductory material for each section. The book also includes a general introduction to Mycenaean civilization, a glossary, and author, place and subject indexes.

Theory and Practice in the Bioarchaeology of Care Mar 30 2020 This book provides the first comprehensive introduction to, and explanation of, the theory and practice of the 'bioarchaeology of care', an original, fully theorised and contextualised case study-based approach designed to identify and interpret cases of care provision in prehistory. The applied methodology comprises four stages of analysis, each building on the content of the preceding one(s), which provide the framework for this process. *Theory and Practice in the Bioarchaeology of Care* is the primary source of information on this new approach and serves as a manual for its implementation. It elaborates the foundations on which the bioarchaeology of care is constructed; it leads the reader through the methodology; and it provides three detailed examples of prehistoric caregiving which illustrate how bioarchaeology of care analysis has the capacity to reveal aspects of past group and individual identity and lifeways which might otherwise have remained unknown.

Anthropological Index to Current Periodicals in the Library of the Royal Anthropological Institute Mar 22 2022

The Anthropology of Obesity in the United States Dec 19 2021

This volume examines the biocultural dimensions of obesity from an anthropological perspective in an effort to broaden

understanding of a growing public health concern. The United States of America currently has the highest rates of obesity among developed countries, with an alarming rise in prevalence in recent decades which promises to affect the nation for years to come. Bellisari helps students to grasp the complex nature of this obesity epidemic, demonstrating that it is the consequence of many interacting forces which range from individual genetic and physiological predispositions to national policies and American cultural beliefs and practices. As much a social problem as an individual one, the development of obesity is in fact encouraged by the pattern of high consumption and physical inactivity that is promoted by American economic, political, and ideological systems. With a range of up-to-date scientific and medical data, *The Anthropology of Obesity in the United States* provides students with a comprehensive picture of obesity, its multiple causes, and the need for society-wide action to address the issue.

Ibss: Anthropology: 1978 Aug 15 2021 First published in 1981. Routledge is an imprint of Taylor & Francis, an informa company.

History of Anthropology Bibliography Apr 11 2021

Strength and Power in Sport Jul 22 2019 The second edition of this broadly based book continues to examine and update the basic and applied aspects of strength and power in sport from the neurophysiology of the basic motor unit to training for specific activities. Authorship is, again, international and includes leading physiologists and clinicians.

Abstracts in Anthropology Oct 29 2022

The Routledge Handbook of Bioarchaeology in Southeast Asia and the Pacific Islands Jan 08 2021 In recent years the bioarchaeology of Southeast Asia and the Pacific islands has seen enormous progress. This new and exciting research is

synthesised, contextualised and expanded upon in *The Routledge Handbook of Bioarchaeology in Southeast Asia and the Pacific Islands*. The volume is divided into two broad sections, one dealing with mainland and island Southeast Asia, and a second section dealing with the Pacific islands. A multi-scalar approach is employed to the bio-social dimensions of Southeast Asia and the Pacific islands with contributions alternating between region and/or site specific scales of operation to the individual or personal scale. The more personal level of osteobiographies enriches the understanding of the lived experience in past communities. Including a number of contributions from sub-disciplinary approaches tangential to bioarchaeology the book provides a broad theoretical and methodological approach. Providing new information on the globally relevant topics of farming, population mobility, subsistence and health, no other volume provides such a range of coverage on these important themes.

The Backbone of History Dec 07 2020 Publisher Description

Anthropology and Antihumanism in Imperial Germany Jul 14 2021 With the rise of imperialism, the centuries-old European tradition of humanist scholarship as the key to understanding the world was jeopardized. Nowhere was this more true than in nineteenth-century Germany. It was there, Andrew Zimmerman argues, that the battle lines of today's "culture wars" were first drawn when anthropology challenged humanism as a basis for human scientific knowledge. Drawing on sources ranging from scientific papers and government correspondence to photographs, pamphlets, and police reports of "freak shows," Zimmerman demonstrates how German imperialism opened the door to antihumanism. As Germans interacted more frequently with peoples and objects from far-flung cultures, they were forced to reevaluate not just those peoples, but also the

construction of German identity itself. Anthropologists successfully argued that their discipline addressed these issues more productively—and more accessibly—than humanistic studies. Scholars of anthropology, European and intellectual history, museum studies, the history of science, popular culture, and colonial studies will welcome this book.

The Medieval Military Orders Aug 27 2022 This new addition to the popular Seminar Studies series looks at the origins, development and organisation of the Military Orders during the twelfth and thirteenth centuries, showing how they functioned as a form of religious life and concentrating on their role in the Crusades and in the government and defence of the Christian kingdoms in the Holy Land. Dr Nicholas Morton offers coverage of the Templars, Hospitalers and Teutonic Knights, as well as various smaller orders. Perfect for undergraduate students studying the Crusades, and for anyone with an interest in this popular topic, this concise and useful history contains numerous primary source materials as well as features to aid understanding.

The Oxford Handbook of Later Medieval Archaeology in Britain Nov 25 2019 The Middle Ages are all around us in Britain. The Tower of London and the castles of Scotland and Wales are mainstays of cultural tourism and an inspiring cross-section of later medieval finds can now be seen on display in museums across England, Scotland, and Wales. Medieval institutions from Parliament and monarchy to universities are familiar to us and we come into contact with the later Middle Ages every day when we drive through a village or town, look up at the castle on the hill, visit a local church or wonder about the earthworks in the fields we see from the window of a train. The Oxford Handbook of Later Medieval Archaeology in Britain provides an overview of the archaeology of the later

Middle Ages in Britain between AD 1066 and 1550. 61 entries, divided into 10 thematic sections, cover topics ranging from later medieval objects, human remains, archaeological science, standing buildings, and sites such as castles and monasteries, to the well-preserved relict landscapes which still survive. This is a rich and exciting period of the past and most of what we have learnt about the material culture of our medieval past has been discovered in the past two generations. This volume provides comprehensive coverage of the latest research and describes the major projects and concepts that are changing our understanding of our medieval heritage.

Skeletal Biology of the Ancient Rapanui (Easter Islanders) Sep 04 2020 A succinct volume presenting current views of Rapanui prehistory, utilising biological evidence to modify existing archaeological and cultural anthropological preconceptions.

American Journal of Physical Anthropology. May 1995. Volume 97. Number 1 Jun 13 2021

Bioarchaeology of Southeast Asia Jan 28 2020 First ever book to focus directly on the physical remains of past inhabitants of Southeast Asia.

Encyclopedia of Anthropology Nov 18 2021 Collects 1,000 entries on the subfields on anthropology, including physical anthropology, archaeology, paleontology, linguistics, and evolution.

Forensic Anthropology Jul 26 2022 Advances in our ability to analyse information from skeletal remains and subsequent developments in the field of forensic anthropology make it possible to identify more victims of homicides, mass-fatality disasters, and genocide. Summarizing the vast collection of international literature that has developed over the past decade, Forensic Anthropol

Comparative Quantification of Health Risks: Sexual and

reproductive health Dec 27 2019 Accompanying CD-ROM contains annex tables detailing population attributable fractions, mortality, and disease burden for selected major risk factors.

Worldwide Variation in Human Growth Aug 23 2019

Molecular Applications in Biological Anthropology Jun 25

2022 This volume presents a selection of pioneering research studies in which molecular techniques have been used to address key questions, for example about the human genetic system, the geographical movements of human populations in the past, and primate evolution. This book not only provides a timely overview of current research, it also presents an insight into the potential significance of molecular biology in the decades to come.

The Collected Works of D.W. Winnicott Feb 09 2021

ABIA: South and Southeast Asian Art and Archaeology Index

Oct 25 2019 Volume Three offers 1643 annotated records on publications regarding the art and archaeology of South Asia, Central Asia and Tibet selected from the ABIA Index database at www.abia.net which were published between 2002 and 2007.

Program of the ... Annual Meeting of the American Association of Physical Anthropologists Feb 27 2020

Human Biological Diversity May 24 2022 This text is intended for the sophomore level course in human variation/human biology taught in anthropology departments. It may also serve as a supplementary text in introductory physical anthropology courses. In addition to covering the standard topics for the course, it features contemporary topics in human biology such as the Human Genome Project, genetic engineering, the effects of stress, obesity and pollution.

Bulletin of the United States Bureau of Labor Statistics Sep 23 2019

Cultural Anthropology of the Middle East Jan 20 2022

During the last two decades, the number of anthropologists conducting research in the Middle East has increased considerably. Together they have produced an abundance of valuable studies, often based on prolonged periods of ethnographic fieldwork. "Cultural Anthropology of the Middle East. A Bibliography" offers a comprehensive survey of their results. The first volume, published in 1992, covered publications which appeared between 1965 and 1987. The second volume brings the bibliography further up to date, listing publications between 1988 and 1992, and adds some 260 titles which were published up through 1987. As in the first volume, the majority of the titles are annotated.

The Bioarchaeology of Metabolic Bone Disease May 12 2021

The Bioarchaeology of Metabolic Bone Disease provides a comprehensive and invaluable source of information on this important group of diseases. It is an essential guide for those engaged in either basic recording or in-depth research on human remains from archaeological sites. The range of potential tools for investigating metabolic diseases of bone are far greater than for many other conditions, and building on clinical investigations, this book will consider gross, surface features visible using microscopic examination, histological and radiological features of bone, that can be used to help investigate metabolic bone diseases. Clear photographs and line drawings illustrate gross, histological and radiological features associated with each of the conditions Covers a range of issues pertinent to the study of metabolic bone disease in archaeological skeletal material, including the problems that frequent co-existence of these conditions in individuals living in the past raises, the preservation of human bone and the impact this has on the ability to suggest a diagnosis of a condition Includes a range of conditions that can lead to osteopenia and osteoporosis,

including previous investigations of these conditions in archaeological bone

The Distribution of the Human Blood Groups Oct 05 2020

Chap.7; on Australia and Tasmania; Divided into sections (i) The ABO Groups; (ii) The MNSs Group; (iii) The RH Groups; (iv) Other genetic systems.

Ibss: Anthropology: 1975 Sep 16 2021 First published in 1978. Routledge is an imprint of Taylor & Francis, an informa company.

Bibliographie Internationale D'anthropologie Sociale Et Culturelle Aug 03 2020

Annotated Bibliography of Applied Physical Anthropology in Human Engineering Sep 28 2022 "This volume contains condensations of 121 reports in the field of Applied Physical Anthropology. A majority of the annotations are grouped under three headings, Anthropometry, Biomechanics, and Comfort; a few are included in a General Group. Working data and important illustrations are quoted directly from the original papers in most cases. A complete index is arranged by author as well as by subject. An additional list of reports (not annotated) is included as background material. Two appendices containing relevant commentary on Seating Comfort and Anthropomorphic Dummies, are also included."--Abstract.

Why We Believe Jun 01 2020 A wide-ranging argument by a renowned anthropologist that the capacity to believe is what makes us human Why are so many humans religious? Why do we daydream, imagine, and hope? Philosophers, theologians, social scientists, and historians have offered explanations for centuries, but their accounts often ignore or even avoid human evolution. Evolutionary scientists answer with proposals for why ritual, religion, and faith make sense as adaptations to past challenges or as by-products of our hyper-complex cognitive

capacities. But what if the focus on religion is too narrow? Renowned anthropologist Agustín Fuentes argues that the capacity to be religious is actually a small part of a larger and deeper human capacity to believe. Why believe in religion, economics, love? A fascinating intervention into some of the most common misconceptions about human nature, this book employs evolutionary, neurobiological, and anthropological evidence to argue that belief--the ability to commit passionately and wholeheartedly to an idea--is central to the human way of being in the world.

The Primate Fossil Record Jul 02 2020 Publisher Description
Pure and Applied Science Books, 1876-1982 Nov 06 2020
Over 220,000 entries representing some 56,000 Library of Congress subject headings. Covers all disciplines of science and technology, e.g., engineering, agriculture, and domestic arts. Also contains at least 5000 titles published before 1876. Has many applications in libraries, information centers, and other organizations concerned with scientific and technological literature. Subject index contains main listing of entries. Each entry gives cataloging as prepared by the Library of Congress. Author/title indexes.

Directory of Faculty Research Oct 17 2021

The Origins of Native Americans Apr 23 2022 A fascinating account of the genetic, archaeological and demographic evidence for the peopling of the New World.

Inter-American Yearbook on Human Rights / Anuario
