Drive Tourism Jul 07 2020 Since the post World War Two boom in private automobile ownership, Drive Tourism has transformed the tourism landscape by facilitating dispersal and the growth of attractions and tourism related infrastructure beyond the zones that had previously emerged around seaports and railway terminals. The automobile has made regional dispersal possible and created opportunities for many small rural communities to supplement rural economies with a tourism economy. Drive Tourism is a popular form of tourism activity that has significantly contributed to the development of Tourism in many nations, but has received relatively little attention in the literature. This book is the first attempt to provide a global

comprehensive review and scholarly investigation into this popular and growing form of tourism. It draws on a vast range of geographical locations to critically explore the impacts of drive tourism in developed and underdeveloped regions. It evaluates tourism authorities' response to the Drive Tourism Experience, and offers operational insights into the management of the drive experience as well as providing original empirical research and insights into the field that will contribute to future investigation. In doing so it explores the many forms of drive tourism from caravanning to fly drive touring.

Modeling and Forecasting Monthly Tourism Arrivals to Aruba Since COVID-19 Pandemic Feb 11 2021 This paper improves short-term forecasting models of monthly tourism arrivals by estimating and evaluating a time-series model with exogenous regressors (ARIMA-X) using a case of Aruba, a small open tourism-dependent economy. Given importance of the US market for Aruba, it investigates informational value of Google Searches originating in the USA, flight capacity utilization on the US air-carriers, and per capita demand of the US consumers, given the volatility index in stock markets (VIX). It yields several insights. First, flight capacity is the best variable to account for the travel restrictions during the pandemic. Second, US real personal consumption expenditure becomes a more significant predictor than income as the former better captured impact of the COVID-19 restrictions on the consumers' behavior, while income boosted by the pandemic fiscal support was not fully directed to spending. Third, intercept correction improves the model in the estimation period. Finally, the pandemic changed econometric

relationships between the tourism arrivals and their main determinants, and accuracy of the forecast models. Going forward, the analysts should re-estimate the models. Out-of-sample forecasts with 5 percent confidence intervals are produced for 18 months ahead.

Teaching Cultural Skills Apr 15 2021 Today, a 'cultural' dimension is increasingly being taught at universities as a supplement to disciplines that have not traditionally paid much attention to culture. Universities are competing to produce graduates with a 'global mindset' who are well equipped to cope in multicultural, team-oriented workplaces. Yet the way in which culture is taught is bound to differ depending on the context in which the teaching takes place. Current research on teaching cultural skills tends to favor a social constructivist approach where actors are seen as constructing collective means of sense-making in the arenas and groups in which they participate. Teachers, who are often very keen to promote tolerance, empathy, and intercultural dialogue, often support such an approach, but it can be a challenge to transfer this to teaching, especially in interdisciplinary contexts. *Teaching Cultural Skills* explores these challenges based on experiences from Danish universities. Its broader themes make it highly relevant for teachers of culture elsewhere. These themes include the globalization of labor markets and trade; immigration, which has led to increased awareness of the need for cultural skills; and the internationalization of higher education, which has made classrooms more multicultural than ever before. The collection also assesses the economic impacts of tourism on local economies, environmental considerations, and whether the growth of tourism is sustainable in a post-September 11th world. "Tourism: Critical Concepts in the Social Sciences" is an accessible and comprehensive resource designed for academics and scholars researching in tourism, globalization, and human geography.
