The Catch Nov 10 2020 "Stevens excels at depicting pulse-pounding danger... Her writing places her heads above most authors working in the thriller genre. Only Dan Brown and Lee Child come close." -Dallas Morning News Vanessa Michael Munroe, chameleon and information hunter, has a reputation for getting things done-often dangerous and not quite legal things. With blood on her hands and a soul stained with guilt, Munroe has fled to Djibouti, Africa. There, with no responsibility except a gig at a small maritime security company, Munroe finds stillness-until she's pressured to work as an armed guard on a ship bound for Kenya. On board, Munroe discovers the contract is merely cover for gunrunning; when the ship is invaded off the Somali coast, she fights her way out-dragging the unconscious captain with her. But nothing about the hijacking is what it seems. The pirates had come for the captain, and continuing their pursuit, they unwittingly raise the killer's instinct Munroe has tried so hard to bury. [Thing Explainer](#) Jul 31 2022 Have you ever tried to learn more about some incredible thing, only to be frustrated by incomprehensible jargon? Randall Munroe is here to help. In Thing Explainer, he uses line drawings and only the thousand (or, rather, "ten hundred") most common words to provide simple explanations for some of the most interesting stuff there is, including: food-heating radio boxes (microwaves) tall roads (bridges) computer buildings (datacenters) the shared space house (the International Space Station) the other worlds around the sun (the solar system) the big flat rocks we live on (tectonic plates) the pieces everything is made of (the periodic table) planes with turning wings (helicopters) boxes that make clothes smell better (washers and dryers) the bags of stuff inside you (cells) How do these things work? Where do they come from? What would life be like without them? And what would happen if we opened them up, heated them up, cooled them down, pointed them in a different direction, or pressed this button? In Thing Explainer, Munroe gives us the answers to these questions and so many more. Funny, interesting, and always understandable, this book is for anyone-age 5 to 105-who has ever wondered how things work, and why.

The Power of Character in Leadership Nov 22 2021 How to Protect Your Leadership Influence and Power You've worked hard to achieve your dreams and goals. Many others have done the same-only to lose it all in the end. Every day, we read about successful people in various walks of life who have lost their power and influence. They've been fired, forced to resign, or shamed out of public life. They no longer have a market for their gifts, and they may even face criminal proceedings. These leaders have lost the trust of their companies, constituents, nations, followers, and families. Many were surprised to discover that their talents alone were not enough to prevent their downfall. Why did they fail in the end? Because they lacked the one quality that would have protected their leadership and given them enduring influence. Ironically, this quality is seldom taught to leaders today, either formally or informally. It is the quality of moral force, or character. Every human being is a leader over some domain as he or she exercises gifts and influence. That domain might be the halls of government, the boardroom, the classroom, the community, or the home. In The Power of Character in Leadership: How Values, Morals, Ethics, and Principles Affect Leaders, you will discover what character is, what it means to develop moral force, and how to preserve your leadership influence so that it is both effective and enduring.

[Thing Explainer](#) Mar 15 2021 From the No. 1 bestselling author of What If? - the man who created xkcd and explained the laws of science with cartoons - comes a series of brilliantly simple diagrams ('blueprints' if you want to be complicated about it) that show how important things work: from the nuclear bomb to the biro. It's good to know what the parts of a thing are called, but it's much more interesting to know what they do. Richard Feynman once said that if you can't explain something to a first-year student, you don't really get it. In Thing Explainer, Randall Munroe takes a quantum leap past this: he explains things using only drawings and a vocabulary of just our 1,000 (or the ten hundred) most common words. Many of the things we use every day - like our food-heating radio boxes ('microwaves'), our very tall roads ('bridges'), and our computer rooms ('datacenters') - are strange to us. So are the other worlds around our sun (the solar system), the big flat rocks we live on (tectonic plates), and even the stuff inside us (cells). Where do these things come from? How do they work? What do they look like if you open them up? And what would happen if we heated them up, cooled them down, pointed them in a different direction, or pressed this button? In Thing Explainer, Munroe gives us the answers to these questions and many, many more. Funny, interesting, and always understandable, this book is for anyone -- age 5 to 105 -- who has ever wondered how things work, and why.

The Burden of Freedom May 05 2020 The Burden of Freedom explains that too many people use past oppression to remain mired in hatred and irresponsibility today. The spirit of oppression has specific telltale effects on individuals, communities, and nations. These are identified by Myles Munroe as a hatred for work, laziness, fear, low self-esteem, selfishness, lack of creativity, low initiative, and distrust of those in authority. To break free from these self-replicating cycles of oppression there must be a mental transformation. Paradoxically, freedom requires the need to impose control on self, require more responsibility than slavery, and the decision to accept a destiny of freedom, recognizing the process and discipline that personal and political freedom require. Simply put, The Burden of Freedom should be available to every citizen and on the shelves of every high-school, college, and community library in the country.

Passing It On Mar 27 2022 Leaders everywhere, in arenas big and small, struggle with the desire and, frankly, the need to make sure their vision for the organization they have created or grown continues regardless of circumstances. And the question "what will be my legacy?" is a question all people ask themselves. Myles Munroe has observed that the tendency among leaders is to deal with this question as serious circumstances or retirement loom. Further, it is his belief that this is one of the most important decisions a leader will ever make. This book is a wakeup call. Myles Munroe wants all leaders to focus on building the right team for the future and to make it a top priority because the process is not a quick one. Properly mentoring the right people to ensure the continuation of an organization is actually a process that must be woven into that organization over a span of years or even decades. Chapter topics discussed include The Chaos of Transition The Leadership Dilemma Living Beyond Your Generation The Principles of Mentoring PASSING IT ON shows how to use the concept of mentoring within an organization to value the distinct talents and abilities of the individuals. Mentoring is the pathway to developing leaders from within; leaders who are in line with the goals of the organization; leaders who are most likely to adopt and carry a vision forward.

What If? by Randall Munroe - A 30-minute Instaread Summary Oct 22 2021 PLEASE NOTE: This is a summary of the book and NOT the original book. What If? by Randall Munroe - A 30-minute Instaread Summary Inside this Instaread Summary: • Overview of the entire book • Introduction to the important people in the book • Summary and analysis of all the chapters in the book • Key Takeaways of the book • A Reader's Perspective Preview of this summary: Chapters 1-4 Global Windstorm. If the earth stopped spinning, but the air kept moving, supersonic winds would develop everywhere except near the poles. Half the earth would freeze while the other half would burn up. People would survive only in a few places, such as research stations at the South Pole. Cold water would churn up from the ocean depths, creating global cooling and tsunamis. Eventually, however, the moon, still rotating, would start moving toward Earth. The tidal energy of the moon would tug on Earth and start it spinning again. Relativistic Baseball. A baseball traveling at ninety percent of light speed would create a thermonuclear explosion as it came in contact with the air. Batter, catcher, ballpark and everything nearby would be destroyed. It would also happen so fast that everything would remain stationary. An MIT scientist who also simulated this, however, told Munroe that his result could not be duplicated. Spent Fuel Pool. Swimming in a pool of spent nuclear reactor fuel would not be fatal. A swimmer who does not dive down and touch a spent fuel rod would be exposed to less radiation than a person normally gets walking around. The water temperature would be slightly less than that of a hot tub. Workers actually swim in these pools to service them.

Summary of Myles Munroe's Single, Married, Separated and Life after Divorce May 17 2021 Please note: This is a companion version & not the original book. Sample Book Insights: #1 There is a myth of singleness, which is the belief that being single is bad and unhealthy. However, there is no problem with being single. The problem is with the definition society has given to it, which is influenced by the god of this world. #2 Adam was not alone because he had God as his companion. The implication is that Adam was so unique and whole that he did not miss anyone. You do not need to marry in order to avoid being alone, as long as you have someone else like you to be your companion. #3 God gave men the right to choose, so He told Adam not to choose for them. Thus, it is up to men to choose their spouses. Do not become overly spiritual or irrational in this regard. #4 The word God used when He told Adam it was not good for him to be alone is used in three major foundational definitions: exclusive, isolated, solitary. To summarize God's view of singleness, we must consider how much we have refined our separateness from others, uniqueness to others, and our wholeness for others.
