Specialized Administrative Law of the European Union Sep 27 2019 This volume deals with the law governing the administrative implementation of European Union public policy. Much of this law is specific to individual policy sectors. The volume provides a study of such specialized administrative law for more than twenty sectors. This cross-sectoral approach allows for detailed comparisons of EU administration in diverse policy fields. It identifies situations where legal structures and approaches may be unnecessarily duplicated, thus indicating where a comprehensive, general system could be advantageous for both Union law and policy achievement. The comparative nature of the study also draws attention to policy fields which have proven to be testing grounds for approaches adopted subsequently in other areas. In addition, the work highlights the distinctive, highly networked, and strongly cooperative character of EU administration, as a reflection of, and a foundation for, the operative nature of the European Union as a whole.

The Global Administrative Law of Science Sep 07 2020 We live in a world of science. Yet this is impossible without a legally guaranteed freedom to practise it. Findings with regard to the elements of such freedom can be deduced from an analysis of international and domestic provisions and principles. There are a plethora of international institutions, legal rules and global norms for the purpose of the international governance of science. The institutions and rules are to be interpreted in light of this freedom to guarantee the continuous existence of the knowledge-based society by means of a global administrative law of science. These aspects were analysed in a research project funded by the German Research Foundation. The book's purpose is to present the jurisprudential results. In addition, empirical results are collected in a freely available database. The study is composed of 5 parts: The Concept of Science/Global Administrative Law/Constitutional Basis: The Freedom of Science/Institutional Design/Governance Mechanisms.
