Leveraging Data for Student Success Jul 14 2021 People providing services to schools, teachers, and students want to know whether these services are effective. With that knowledge, a project director can expand services that work well and adjust implementation of activities that are not working as expected. When finding that an innovative strategy benefits students, a project director might want to share that information with other service providers who could build upon that strategy. Some organizations that fund programs for students will want a report demonstrating the program's success. Determining whether a program is effective requires expertise in data collection, study design, and analysis. Not all project directors have this expertise—they tend to be primarily focused on working with schools, teachers, and students to undertake program activities. Collecting and obtaining student-level data may not be a routine part of the program. This book provides an overview of the process for evaluating a program. It is not a detailed methodological text but focuses on awareness of the process. What do program directors need to know about data and data analysis to plan an evaluation or to communicate with an evaluator? Examples focus on supporting college and career readiness programs. Readers can apply these processes to other studies that include a data collection component.

Super League XIX: Historical Perspective and Tigers Diary of 2014 Apr 23 2022 The author is one of Castleford's most dedicated supporters. His personal experience following the club stretches back almost fifty years. In addition, he has endeavoured to educate himself about the early years of the team's fortunes, not least the achievements of the 1930s and the doldrums of the 1950s.

Cyberspace Safety and Security Jan 28 2020 The two volumes LNCS 11982 and 11983 constitute the proceedings of the 11th International Symposium on Cyberspace Safety and Security, CSS 2019, held in Guangzhou, China, in December 2019. The 61 full papers and 40 short papers presented were carefully reviewed and selected from 235 submissions. The papers cover a broad range of topics in the field of cyberspace safety and security, such as authentication, access control, availability, integrity, privacy, confidentiality, dependability and sustainability issues of cyberspace. They are organized in the following topical sections: network security; system security; information security; privacy preservation; machine learning and security; cyberspace safety; big data and security; and cloud and security;

Developing Safer Online Environments for Children: Tools and Policies for Combatting Cyber Aggression Jan 20 2022 As the digital world assumes an ever-increasing role in the daily lives of the public, opportunities to engage in crimes increase as well. The prevention of cyber aggression is an ongoing challenge due to its multifaceted nature and the difficulties in realizing effective interventions. The consequences of cyber aggression can range from emotional and psychological distress to death by suicide or homicide. Enduring prevention programs need to be defined and take into consideration that the digital revolution changes the way and the meaning of interpersonal relationships. *Developing Safer Online Environments for Children: Tools and Policies for Combatting Cyber Aggression* explores the effects of cyberbullying and cyberstalking on children and examines solutions that can identify and prevent online harassment through both policy and legislation reform and technological tools.

Highlighting a range of topics such as cyberbullying, fake profile identification, and victimization, this publication is an ideal reference source for policymakers, educators, principals, school counsellors, therapists, government officials, politicians, lawmakers, academicians, administrators, and researchers.

International Plant Proteomics Organization (INPPO) World Congress 2014 Sep 23 2019 The field of proteomics has advanced considerably over the past two decades. The ability to delve deeper into an organism's proteome, identify an array of post-translational modifications and profile differentially abundant proteins has greatly expanded the utilization of proteomics. Improvements to instrumentation in conjunction with the development of these reproducible workflows have driven the adoption and application of this technology by a wider research community. However, the full potential of proteomics is far from being fully exploited in plant biology and its translational application needs to be further developed. In 2011, a group of plant proteomic researchers established the International Plant Proteomics Organization (INPPO) to advance the utilization of this technology in plants as well as to create a way for plant proteomics researchers to interact, collaborate and exchange ideas. The INPPO conducted its inaugural world congress in mid 2014 at the University of Hamburg (Germany). Plant proteomic researchers from around the world were in attendance and the event marked the maturation of this research community. The *Research Topic* captures the opinions, ideas and research discussed at the congress and encapsulates the approaches that were being applied in plant proteomics.

2015 ICD-9-CM for Hospitals, Volumes 1, 2 and 3 Professional Edition - E-Book May 12 2021 Code more efficiently and effectively with Carol J. Buck's 2015 ICD-9-CM for Hospitals: Volumes 1, 2 & 3, Professional Edition. Designed by coders for coders, this full-color reference combines Netter's Anatomy illustrations and the Official Guidelines for Coding and Reporting. Its format makes it easy to access the ICD-9-CM information you need to stay up to date and ensure the most accurate billing and optimal reimbursement in inpatient (hospital-based) and outpatient (physician office-based) coding settings. In addition, you can take this resource into your certification exams for enhanced testing support!

Topics in Anti-Cancer Research Sep 04 2020 The fifth volume of the eBook series entitled "Topics in Anti-Cancer Research" is based on new contributions from scientists working in the field of cancer research and therapy. The topics presented in this eBook cover advances in cancer drug Development targeting carbonic anhydrase IX and XII. An overview of the patents and Anti-Cancer drug development analyzing regulatory policies in anticancer drugs in China is included. Approaches on cell based Anti-Cancer drug delivery systems and current developments in Anti-Cancer agents targeting heat shock

proteins, besides the promising field of tumor homing peptides (THPs) in the treatment of cancer are also covered in this volume. We anticipate that these topics on new drug targets, drug delivery approaches and techniques in cancer research & therapy will attract the audience, researchers and scientists in the field of cancer and its treatment.

Plastic Pollution Oct 25 2019 The presence, at sea, of large amounts of plastic and microplastics, which are sometimes invisible and results from the fragmentation of larger debris, requires an in-depth knowledge of the nature of ocean debris, its transport mechanisms, life cycle and effects on the environment. This volume provides new insights in the topic of plastic pollution, an actual and important problem for the marine environment.

Digital-Forensics and Watermarking Sep 16 2021 This book constitutes the thoroughly refereed post-conference proceedings of the 13th International Workshop on Digital-Forensics and Watermarking, IWDW 2014, held in Taipei, Taiwan, during October 2014. The 32 full and 14 poster papers, presented together with 1 keynote speech, were carefully reviewed and selected from 79 submissions. The papers are organized in topical sections on forensics; watermarking; reversible data hiding; visual cryptography; and steganography and steganalysis.

Building Regulations in Brief Feb 09 2021 This eighth edition of the most popular and trusted guide to the building regulations is the most comprehensive revision yet. It reflects all the latest amendments to Building Regulations, Planning Permission and the Approved Documents A, B, C, H, K, P, Regulation 7 incorporating all amendments up to December 2013 (including the changes to Leaflets L1A and L2A which come into effect April 2014). This new edition also contains details of the new national planning guidance system and initiatives to speed up the planning process such as the new on line planning appl.

Distributional Cost-Effectiveness Analysis Feb 27 2020 Health inequalities blight lives, generate enormous costs, and exist everywhere. This book is the definitive all-in-one guide for anyone who wishes to learn about, commission, and use distributional cost-effectiveness analysis to promote both equity and efficiency in health and healthcare.

How's Life? 2013 Measuring Well-being Mar 22 2022 This second edition of How 's Life? provides an update on the most important aspects that shape people 's lives and well-being: income, jobs, housing, health, work-life balance, education, social connections, civic engagement and governance, environment, personal security and subjective well-being.

Design of Visualizations for Human-Information Interaction Nov 25 2019 Interest in visualization design has increased in recent years. While there is a large body of existing work from which visualization designers can draw, much of the past research has focused on developing new tools and techniques that are aimed at specific contexts. Less focus has been placed on developing holistic frameworks, models, and theories that can guide visualization design at a general level—a level that transcends domains, data types, users, and other contextual factors. In addition, little emphasis has been placed on the thinking processes of designers, including the concepts that designers use, while they are engaged in a visualization design activity. In this book we present a general, holistic framework that is intended to support visualization design for human-information interaction. The framework is composed of a number of conceptual elements that can aid in design thinking. The core of the framework is a pattern language—consisting of a set of 14 basic, abstract patterns—and a simple syntax for describing how the patterns are blended. We also present a design process, made up of four main stages, for creating static or interactive visualizations. The 4-stage design process places the patterns at the core of designers ' thinking, and employs a number of conceptual tools that help designers think systematically about creating visualizations based on the information they intend to represent. Although the framework can be used to design static visualizations for simple tasks, its real utility can be found when designing visualizations with interactive possibilities in mind—in other words, designing to support a human-information interactive discourse. This is especially true in contexts where interactive visualizations need to support complex tasks and activities involving large and complex information spaces. The framework is intended to be general and can thus be used to design visualizations for

diverse domains, users, information spaces, and tasks in different fields such as business intelligence, health and medical informatics, digital libraries, journalism, education, scientific discovery, and others. Drawing from research in multiple disciplines, we introduce novel concepts and terms that can positively contribute to visualization design practice and education, and will hopefully stimulate further research in this area.

Cyber Harassment and Policy Reform in the Digital Age: Emerging Research and Opportunities Feb 21 2022 As the digital world assumes an ever-increasing role in the daily life of the public, opportunities to engage in crimes increase as well. The consequences of cyber aggression can range from emotional and psychological distress to death by suicide or homicide. Cyber Harassment and Policy Reform in the Digital Age: Emerging Research and Opportunities is a critical scholarly resource that examines cyber aggression and bullying and policy changes to combat this new form of crime. Featuring coverage on a broad range of topics such as anti-bullying programs, cyberstalking, and social exclusion, this book is geared towards academicians, researchers, policy makers, and students seeking current research on cyberstalking, harassment, and bullying.

Critical Infrastructure System Security and Resiliency Nov 06 2020 Security protections for critical infrastructure nodes are intended to minimize the risks resulting from an initiating event, whether it is an intentional malevolent act or a natural hazard. With an emphasis on protecting an infrastructure's ability to perform its mission or function, Critical Infrastructure System Security and Resiliency presents a practical methodology for developing an effective protection system that can either prevent undesired events or mitigate the consequences of such events. Developed at Sandia National Labs, the authors' analytical approach and methodology enables decision-makers and security experts to perform and utilize risk assessments in a manner that extends beyond the theoretical to practical application. These protocols leverage expertise in modeling dependencies—optimizing system resiliency for effective physical protection system design and consequence mitigation. The book begins by focusing on the design of protection strategies to enhance the robustness of the infrastructure components. The authors present risk assessment tools and necessary metrics to offer guidance to decision-makers in applying sometimes limited resources to reduce risk and ensure operational resiliency. Our critical infrastructure is vast and made up of many component parts. In many cases, it may not be practical or affordable to secure every infrastructure node. For years, experts—as a part of the risk assessment process—have tried to better identify and distinguish higher from lower risks through risk segmentation. In the second section of the book, the authors present examples to distinguish between high and low risks and corresponding protection measures. In some cases, protection measures do not prevent undesired events from occurring. In others, protection of all infrastructure components is not feasible. As such, this section describes how to evaluate and design resilience in these unique scenarios to manage costs while most effectively ensuring infrastructure system protection. With insight from the authors' decades of experience, this book provides a high-level, practical analytical framework that public and private sector owners and operators of critical infrastructure can use to better understand and evaluate infrastructure security strategies and policies. Strengthening the entire homeland security enterprise, the book presents a significant contribution to the science of critical infrastructure protection and resilience.

Psychology of Gender Jul 02 2020 Noted for its fair and equal coverage of men and women, this book reviews the research and issues surrounding gender from multiple perspectives including psychology, sociology, anthropology, and public health, with an emphasis on the interaction between biological and social theories. The implications of social roles, status, and gender-related traits on relationships and health that are central to students' daily lives are emphasized throughout. Students learn how to distinguish the similarities and differences between the sexes and the theories that explain the differences. Methodological flaws that may impact the observance of sex differences are also examined. Learning activities and pedagogical tools included in the text: Do Gender exercises which provide an opportunity to test hypotheses and explore data Sidebars on special interest topics and

numerous visuals that bring the studies to life Take Home Points that summarize key concepts in bulleted format Boldfaced key terms and definitions, chapter summaries, discussion questions, and suggested readings which help students review the material New to the 5th Edition: Expanded sections on cohabitation, homosexuality, online relationships, social media influences, single-sex classrooms, sex differences in math abilities, and gender implications of divorce on health Expanded coverage of gender and parenting, gender and the workplace, gender and power, and balancing work and family An expanded intersectional approach that highlights how gender is connected to social class, race, and ethnicity, including more coverage of gender system justification theory Coverage of transgender issues including recent changes in the DSM guidelines Streamlined discussions to further engage students to think about gender issues A companion website at www.routledge.com/cw/Helgeson where instructors will find Power Point slides, multiple choice quizzes, and short answer questions with suggested answers for each chapter; and students will find flashcards of key terms, chapter outlines, and links to related websites and further reading Divided into three parts, each section builds on the previous one. First, gender and the development of gender roles across cultures are introduced. Scientific methods used to study gender, attitudes toward gender, and the latest data and theories on sex differences in cognitive, social, and emotional domains are then introduced. Theories of gender-role development, including evolutionary, social learning, social role, and gender schema theories are reviewed along with the implications of gender on achievement. Part one reviews the key information on the similarities and differences between the sexes and the theories that explain the differences which lay the foundation for the remainder of the book. Part two examines the role of gender in relationships including communication styles and the impact of these interactions on friendship and romantic relationships. The third part examines the role of gender on physical and mental health. The effects of marriage and parenting on health are reviewed, including domestic abuse, along with how gender affects the association between work and health. This is an ideal text for upper level gender-focused courses including the psychology of gender, psychology of women or men, gender issues, and gender, women ' s, or men ' s studies taught in psychology, women ' s studies, gender studies, sociology, and anthropology.

Neurotransmitters in Plant Signaling and Communication Aug 23 2019 This book provides a comprehensive update on the recent developments concerning the role of plant neurotransmitters in signaling and communication. Physiological investigations over the past few decades have demonstrated that plants employ neurotransmitters in various signaling pathways. Plant-based neurotransmitters (serotonin, melatonin, dopamine, acetylcholine, and GABA) share biochemical similarities with those in animal systems in terms of their chemical nature and biochemical pathways. Plant-environment interaction associated with abiotic stress management, growth modulation, flowering, circadian rhythm, fruit ripening, and allelopathic interactions are a major focus of research in the field, and recent advances in genomic, transcriptomic, and metabolomic approaches have resulted in the deciphering of the molecular mechanisms associated with various neurotransmitters in plants. Other current and potential areas of investigation include the putative phytohormone phytomelatonin, and receptor-mediated signaling in plant neurotransmitters. Providing an up-to-date overview of molecular crosstalk mechanisms between various neurotransmitters, the book offers essential insights to help readers gain a better understanding of the physiology of plant signaling and communication with the environment.

2013 ICD-9-CM for Hospitals, Volumes 1, 2 and 3 Professional Edition -- E-Book Oct 29 2022 Elsevier and the American Medical Association have partnered to co-publish this ICD-9-CM reference by Carol J. Buck! Maximize your efficiency and effectiveness with Carol J. Buck ' s 2013 ICD-9-CM for Hospitals, Volumes 1, 2, & 3 – Professional Edition. Combining Netter ' s Anatomy artwork and the Official Guidelines for Coding and Reporting (OGCR) with a format designed by coders for coders, this handy,

spiral-bound reference gives you easy access to the information you need to stay up to date and ensure the most accurate billing and optimal reimbursement in both physician-based and inpatient coding. Plus, you can take this resource into certification exams for enhanced testing support! Coverage of all three ICD-9-CM volumes includes both inpatient and outpatient codes. UNIQUE! Full-color Netter's Anatomy artwork clarifies complex anatomic information to help you appropriately code related procedures. Use Additional Digit(s) symbol in the index identifies codes that require an additional digit to remind you to check the tabular. The Official Guidelines for Coding and Reporting (OGCR) are listed within the lists of codes and in a separate index for fast, easy access to the coding rules when you need them. Items provide detailed information on common diseases and conditions, helping you code more effectively. Symbols throughout the text alert you to new, revised, and deleted codes and clearly identify codes that require special consideration before assigning symbols, including Unacceptable Principal Diagnosis, Use Additional, Includes and Excludes, Non OR Procedure, Code First, Present on Admission, Hospital Acquired Condition, and CC and MCC. Additional hints, tips and definitions within specific codes provide extra guidance in coding anatomy, pathophysiology, or other coding directions. References to the American Hospital Association's Coding Clinics® help you find expanded information about specific codes and their usage. Age and Sex edits alert you to codes that are used only with patients of a specific age or sex, helping to ensure accurate reporting. Omit and Code Also codes highlight government text needing special attention. Coding updates on the companion codingupdates.com website keep you informed of changes to ICD codes.

International Energy Outlook Sep 28 2022 The International Energy Outlook 2016 (IEO2016) presents an assessment by the U.S. Energy Information Administration (EIA) of the outlook for international energy markets through 2040. U.S. projections appearing herein are consistent with those published in EIA's Annual Energy Outlook 2015 (AEO2015). The outlook is provided as a service to energy managers and analysts, both in government and in the private sector. The report begins with a review of world trends in energy demand and the major macroeconomic assumptions used in deriving these projections, along with the major sources of uncertainty in the projections, which extend through 2040. In addition to the projections, High Economic Growth and Low Economic Growth cases were developed to consider the effects of higher and lower growth paths for economic activity than are assumed in the Reference case. IEO2016 also includes a High Oil Price case and, a Low Oil Price case. The resulting projections -- and the uncertainty associated with international energy projections in general -- are discussed in Chapter 1, "World energy demand and economic outlook." IEO2016 focuses exclusively on marketed energy. Non-marketed energy sources, which continue to play an important role in some developing countries, are not included in the estimates.

Health Informatics Meets EHealth Dec 27 2019 Progress in medicine has traditionally relied heavily on classical research pathways involving randomized clinical trials (RCTs) to establish reliable evidence for any given therapeutic intervention. However, not only are RCTs lengthy and expensive, they have a number of other disadvantages, including the fact that they are currently failing to keep pace with the number of potential innovative treatment options being developed, particularly in areas such as rare diseases. With the vast amount of data increasingly available for use in profiling patient characteristics and establishing correlations between outcomes and potential predictors, predictive modeling may offer a potential solution to the limitations of RCTs. This book presents the proceedings of the 2016 Health Informatics meets eHealth conference, held in Vienna, Austria in May 2016. The conference provides a platform for researchers, practitioners, decision makers and vendors to discuss innovative health informatics and eHealth solutions with a view to improving the quality, efficacy and efficiency of healthcare. The theme of the conference is Predictive Modeling in Healthcare. Covering subjects as diverse as fall-detection in the elderly, diabetes, physiotherapy and pediatric oncology, this book will be

of interest to all those working in the field of (e)healthcare and its delivery.

Planning Support Methods Jan 08 2021 Planning Support Methods offers a practical quantitative guide to the key concepts and methods of urban and regional planning. The authors apply and critically assess the most important underlying forecasting methods for the demographic and economic analysis and projection fields, providing an essential resource for practicing planners and planning students alike.

Applied Operational Research May 24 2022 These proceedings gather contributions presented at the 8th International Conference on Applied Operational Research (ICAOR 2016) in Rotterdam, The Netherlands, June 28-30, 2016, published in the series Lecture Notes in Management Science (LNMS). The conference covers all aspects of Operational Research and Management Science (OR/MS) with a particular emphasis on applications.

Advanced LaTeX in Academia Aug 27 2022 This book contains a comprehensive treatment of advanced LaTeX features. The focus is on the development of high quality documents and presentations, by revealing powerful insights into the LaTeX language. The well-established advantages of the typesetting system LaTeX are the preparation and publication of platform-independent high-quality documents and automatic numbering and cross-referencing of illustrations or references. These can be extended beyond the typical applications, by creating highly dynamic electronic documents. This is commonly performed in connection with the portable document format (PDF), as well as other programming tools which allow the development of extremely flexible electronic documents.

Anatomy of a South African Karst Hydrosystem Jun 25 2022 This book combines the results of the research activities in the assessment of water resources environment and an integrated water resource monitoring program to support preservation efforts of the aquatic environment of the Cradle of Humankind (COH), World Heritage Sites. A poor understanding of the surface and groundwater resources of the COH property has precipitated often alarmist reporting in the media regarding the negative impacts associated with various sources of poor quality water. The most notable of these is the acid mine drainage threat to karst ecosystems and fossil sites across the property. These circumstances have generated wide and considerable concern for the preservation of the UNESCO-inscribed fossil sites and integrity of the water resources of the property.

Ancient Hunting Strategies in Southern South America Dec 19 2021 This book presents the state of the art for the studies of strategies and tactics for the procurement of preys in Argentina in different regions and chronologies (from the end of the Pleistocene until historic moments). The chapters are related to the performance of these practices in hunter-gatherer, shepherd and farmer societies. From the environmental point of view, they show cases in diverse areas such as plains, mountains, forests, sea coast, steppes and puna. Likewise, the range of preys considered includes ungulates (camelids and deer), runner birds (*Rhea pennata*) and minor prey (mammals and fish). The book is aimed at professionals and students of archaeology interested in the analysis of tactics and strategies for prey capture. Every chapter offers an important contribution in theoretical, methodological and technical terms. In addition, these works possess a high comparative value on study cases of very different chronologies and environments of the Southern hemisphere. This book is a result of the 1st Workshop

"Strategies and tactics in order to obtain preys in the past: its discussion from the integration of different lines of evidence" which was conducted in San Rafael, Mendoza, Argentina, between the 8th and 10th of August, 2018.

ASP.NET Web API 2: Building a REST Service from Start to Finish Jun 01 2020 The ASP.NET MVC Framework has always been a good platform on which to implement REST-based services, but the introduction of the ASP.NET Web API Framework raised the bar to a whole new level. Now in release version 2.1, the Web API Framework has evolved into a powerful and refreshingly usable platform. This concise book provides technical background and guidance that will enable you to best use the ASP.NET Web API 2 Framework to build world-class REST services. New content in this edition includes: New capabilities in Web API 2 (currently version 2.1). Support for partial updates, or PATCH. API versioning. Support for legacy SOAP-based operations. How to handle non-resource APIs using REST How to best expose relationships between resources JSON Web Tokens, CORS, CSRF Get ready for authors Jamie Kurtz and Brian Wortman to take you from zero to REST service hero in no time at all. No prior experience with ASP.NET Web API is required; all Web API-related concepts are introduced from basic principles and developed to the point where you can use them in a production system. A good working knowledge of C# and the .NET Framework are the only prerequisites to best benefit from this book.

Fulfilling Ageing Jun 13 2021 This book explores the reality of ageing and old age from the perspectives of the individual and society. It emphasizes cross-cultural aspects of ageing and communication issues both within and across generations. The authors approach the understanding of ageing from a multi-disciplinary perspective, integrating biology, psychology, linguistics, sociology, and history. The book is organized as follows: historical and broader cross-cultural issues of ageing, followed by biomedical, psychological, social, and communicative aspects of ageing. The book concludes with an in-depth analysis of the existential dimension of ageing followed by an evolutionary perspective.

Pathways to Urban Sustainability Mar 10 2021 Cities have experienced an unprecedented rate of growth in the last decade. More than half the world's population lives in urban areas, with the U.S. percentage at 80 percent. Cities have captured more than 80 percent of the globe's economic activity and offered social mobility and economic prosperity to millions by clustering creative, innovative, and educated individuals and organizations. Clustering populations, however, can compound both positive and negative conditions, with many modern urban areas experiencing growing inequality, debility, and environmental degradation. The spread and continued growth of urban areas presents a number of concerns for a sustainable future, particularly if cities cannot adequately address the rise of poverty, hunger, resource consumption, and biodiversity loss in their borders. Intended as a comparative illustration of the types of urban sustainability pathways and subsequent lessons learned existing in urban areas, this study examines specific examples that cut across geographies and scales and that feature a range of urban sustainability challenges and opportunities for collaborative learning across metropolitan regions. It focuses on nine cities across the United States and Canada (Los Angeles, CA, New York City, NY, Philadelphia, PA, Pittsburgh, PA, Grand Rapids, MI, Flint, MI, Cedar Rapids, IA, Chattanooga, TN, and Vancouver, Canada), chosen to represent a variety of metropolitan regions, with consideration given to city size, proximity to coastal and other waterways, susceptibility to hazards, primary industry, and several other factors.

Energy Revolution and Chemical Research Jul 22 2019 The primary goal of the book is to promote research and developmental activities in energy, power technology and chemical technology. Besides, it aims to promote scientific information interchange between scholars from top universities, business associations, research centers and high-tech enterprises working all around the world. The conference

conducted in-depth exchanges and discussions on relevant topics such as energy engineering and chemical engineering, aiming to provide an academic and technical communication platform for scholars and engineers engaged in scientific research and engineering practice in the field of energy materials, energy equipment and electrochemistry. By sharing the research status of scientific research achievements and cutting-edge technologies, it helps scholars and engineers all over the world comprehend the academic development trends and broaden research ideas. So as to strengthen international academic research, academic topics exchange and discussion, and promote the industrialization cooperation of academic achievements.
