Interdisciplinary Mathematics Education Jul 07 2020 This open access book is the first major publication on the topic of "Interdisciplinary Mathematics Education" and arose from the work of the first International Topic Study Group of the same name at the ICME-13 conference in Hamburg in 2016. It offers extensive theoretical insights, empirical research, and practitioner accounts of interdisciplinary mathematics work in STEM and beyond (e.g. in music and the arts). Scholars and practitioners from four continents contributed to this comprehensive book, and present studies on: the conceptualizations of interdisciplinarity; implementation cases at schools and tertiary institutions; teacher education; and implications for policy and practice. Each chapter, and the book itself, closes with an assessment of the most significant aspects that those involved in policy and practice, as well as future researchers, should take into account.

The Glass Half Full Mar 27 2022 A self-help book for the Scottish psyche. Cultural Miserablism: the power of the negative story with no redemption and no escape, that wallows in its own bleakness. Scotland is a small and immensely creative country. The role of the arts and culture is one that many are rightly proud of. But do we portray Scotland in the light we should? There is a tendency in film, literature and other cultural output to portray the negative aspects of Scottish life. In *The Glass Half Full*, filmmaker Eleanor le and academic David Manderson explore the origins of this bleak take on Scottish life, its literary and cultural expressions, and how this phenomenon in film has risen to the level of a genre which audiences both domestic and international see as a recognisable story of contemporary Scotland. What does miserablism tell us about ourselves? When did we become cultural victims? Is it time we move away from an image of Scotland that constantly casts itself as the poor relation? From the *Trainspotting* to the *Kailyard*, *The Glass Half Full* confronts the negative Scotland we portray not only to the world but, most importantly, ourselves. Do [they] accurately reflect the reality of life in Scotland for the majority of the population or are they just 'stories' we like to tell ourselves about ourselves? ELEANOR LE Our greatest export is the diversity of our fiction, the myriad of alternatives between its contrasts and all its new heroes and heroines. It's time we knew it. DAVID MANDERSON

Glass Half-Empty, Glass Half-Full Jan 25 2022`Chris Mitchell was 20 when he was diagnosed with Asperger syndrome. Both his academic success and the horrendous bullying he suffered highlight the mixed blessings of mainstream education for a child with Asperger syndrome. While his eventual success is heartwarming, from today's understanding of Asperger, the ignorance and hostility Mitchell faced throughout his early life are shocking` - TES Extra for Special Needs 'This autobiographical account of a young man's discovery that Asperger's syndrome could explain his early problems and provide light at the end of the tunnel, is both insightful and inspiring. Parents of children with Asperger's syndrome and also older "aspies" will profit from Chris's hard won experience` - Dyslexia Contact '[This] is a straightforward read, full of concrete examples of how Asperger's syndrome affects the individual but at the same time acknowledging that every individual is different. Having experienced first-hand the vulnerability of the adolescent with Asperger's syndrome, desperate to make connections with those around him but constantly being knocked back, I was delighted to read about the friendships [Chris Mitchell] eventually establishes when he takes the brave decision to make contacts through the web and sets out on his travels. I would particularly recommend this book to those with little knowledge of Asperger's syndrome, especially for anyone involved in helping those with a diagnosis of Asperger's syndrome through further education` - British Journal of Special Education `This book is a 'must-read' for any parents of children with Aspergers syndrome and also older aspies themselves. They will be able to relate to the slightly quirky writing style and profit from Chris's hard won experience. These children are so individualistic and often isolated from like minds, so the book will provide some solace that there are other people like them` - Judith Stansfield, Chair North Richmondshire Community Partnership SEN ICT Consultant NASEN ICT Group BDACC Reviews and Literature Editor `This book shows how one individual with very severe handicaps due to Asperger's Syndrome won through in the end and achieved despite such a poor beginning. This is a book which should be read by anyone who has been diagnosed with Asperger's Syndrome or feels he or she might have this condition` - Dr L F Lowenstein, National Association Gifted Children Newsletter 'This is an unusual book in that it is written by a man where most autobiographical books about autism are written by women. It is both very readable and well-written, with a detached and honest account of his childhood, family life and life prior to diagnosis. He gets on well with his family, and they are happy that he has written this book, and happy with the book, despite some implied criticism of how they brought him up. Indeed, it comes across as less aggressive than some accounts, so it is particularly insightful for parents and other empathotypicals who might find more black-and-white descriptions of their mistakes hurtful. As with every book written by someone on the spectrum that I have seen, it is a short book, giving a snapshot of his difficulties and joys before and also after his diagnosis, giving highlights of specific problems and pleasures. Overall I think it would be a good book for someone who recognises himself in the author, or as a starting point for deepening your understanding of your brother, son or friend, or, if you are already interested in this condition, to broaden your understanding of the ways that it present itself` - Asperger United '[A]n especially uplifting read for a young person or adult newly diagnosed with Asperger's Syndrome. It also would help those unfamiliar with Asperger's Syndrome to understand the condition much better` - REACH This gripping and at times astonishing story will be inspirational to all adults either facing Asperger's Syndrome personally or interacting with someone who has been diagnosed. In his own imitable style, Chris Mitchell describes his life before and after diagnosis with Asperger's Syndrome. We

follow Chris through primary and secondary school, where his lack of social interaction and anger continually land him in trouble, and where he is bullied for being different. Only his excellent memory and specialist interests enable him to continue, and pass his GCSEs and a GNVQ in Media Studies. At university he is diagnosed with Asperger's Syndrome. Suddenly his life makes more sense, and his self-awareness means his self-confidence returns, resulting in world travel, a Masters qualification in Information and Library Management and finally, acceptance. Chris Mitchell is a Records Assistant at Durham County Record Office, and also does public speaking on the subject of Asperger's Syndrome.

The Glass Half Full Oct 02 2022 Rose-colored glasses may look silly, but they're actually quite practical. In *The Glass Half Full*, psychologist Suzanne Segerstrom surveys the scientific data on optimism (including her own award-winning research) to reveal that it's not what you believe about the future that matters, but what you do about it. While pessimists debate whether their goals are attainable, optimists are out there trying to achieve them. Without insisting that you learn to "think positive," *The Glass Half Full* teaches you practical ways to appropriate the habits and skills that optimists use to get what they want from life. Segerstrom - who reluctantly admits her research on the topic has transformed her into an optimist - imparts the lesson with a mix of humor and intelligence that will convince even the most cynical readers that a brighter tomorrow might be just around the corner.

As the founder of *Soberistas.com*, Lucy's blog also provides motivational and inspirational support for those seeking an alcohol-free life.

A Glass Half Full Mar 15 2021 Trade has played a critical role in global poverty reduction. In harnessing the potential of trade, some of the most successful countries have developed strong trade relationships with their neighbors. However, many South Asian countries have trade regimes that often offset the positive impact of geography and proximity. This report documents systematically the gaps between current and potential trade in South Asia and addresses important specific barriers that have held trade back. These barriers include tariffs and paratariffs, real and perceived nontariff barriers, connectivity costs, and the broader trust deficit. This policy-focused report unpacks these critical barriers to effective trade integration in South Asia through four in-depth studies that produce new, detailed, on-the-ground knowledge. Three of the studies are based on extensive stakeholder consultations. Two also rely on tailored surveys. The fourth study, on tariffs, benefits from new data on paratariffs. The report also marshals new evidence showing how trading regimes in South Asia discriminate against each other. Given the South Asian context, incremental, yet concrete steps aimed at tapping the potential of deeper integration are appropriate. The report has been drafted in this spirit. It offers precise, actionable policy recommendations that could help achieve measurable progress in key areas of trade and integration that would be to the advantage of all countries in the region.
