## **Principles of Contractual Interpretation** Oct 11 2020

Written with the busy practitioner in mind, this concise and insightful book sets out the principles that guide the courts in interpreting contracts. Each principle is covered in its own dedicated chapter, supported by case law which illustrates how the principle works in practice and in its wider context. In addition to interpretation of contracts, the book also considers the implication of terms, rectification, and estoppel by convention. This new edition considers the implications of key decisions of the Supreme Court in *Arnold v Britton* and *Marks & Spencer v BNP Paribas*, and *BNY Mellon v LBG Capital*. Other writing, including from judges writing extra-judicially, is also analysed. This book provides

an invaluable reference for lawyers drafting, interpreting and litigating on contracts. *Construction Contracts* Nov 23 2021 The second edition of this well-regarded title continues to take a clear and practical approach to the law and practice relating to construction contracts in the UK. It provides comprehensive coverage of the substantive law and modern dispute resolution procedures in the field of construction. Throughout the work the author provides key practical tips including: where and when you issue proceedings; what the judges will expect and their preferences; and how trials can be made shorter. A separate section also examines enforcement of adjudicator's awards covering recent case law on this area. This is carefully examined and digested in detail to ensure the

reader has an understanding of the pitfalls of enforcement. The second edition covers all relevant case law and legislation since the publication of the first edition in 2006 including the changes proposed under the Local Democracy, Economic Development and Construction Bill. It includes a new chapter on partnering and revised and updated appendices to include the amendments to the Housing Grants, Construction, and Regeneration Act 1996. **Contract in Context** Sep 02 2022 *Contract in Context* provides an easy to read, in depth analysis of the purpose and role of contract law and the theories that surround it. It looks at the historical development of contract law as well as providing detailed analysis of some of the leading theoretical explanations and how they are applied on an

international level. **Creative Industries** Oct 23 2021 "To explain the logic of these arrangements, the author draws on the analytical resources of industrial economics and the theory of contracts. He addresses the winner-take-all character of many creative activities that brings wealth and renown to some artists while dooming others to frustration; why the "option" form of contract is so prevalent; and why even savvy producers get sucked into making "ten-ton turkeys," such as Heaven's Gate."--BOOK JACKET.

**Research Methods for Construction** Sep 21 2021 Research Methods for Construction will help you instil rigour into your problem-solving, and into your reports and publications. It will be of value to construction, surveying, architecture and civil engineering students undertaking research, whether for bachelors and masters degree dissertations, or for masters and doctoral research degree theses. Now in its Fourth Edition, this remains one of the few books to provide guidance on research formulation, methodologies, and methods specifically for construction students. Three main sections - Producing a Proposal, Executing the Research and Reporting the Results discuss the key issues in research and examine the primary approaches, both qualitative and quantitative. The methods adopted for scientific and engineering experiments, model building and simulations are discussed, as well as those employed for research into management, social and economic issues. The authors examine the requirements for data and analysis, including the important statistical considerations and a range of qualitative techniques that enable construction researchers to appreciate what needs to be evaluated in devising how research may be carried out effectively and efficiently. This new edition has

been updated to reflect current debates and concerns, including ethical issues, legislation and codes of practice concerning the collection, processing, storage, use and disposal of data. Pressures of time and funding to carry out the empirical work all too often lead to a lack of attention to how the study should be done and why. The authors address the importance of explaining the philosophical approach adopted (ontology, epistemology) and the consequent methodology. They advocate close scrutiny of the methods available for appropriateness, both academically and practically. The fundamental theme of the book remains to facilitate a researcher's informed and justified selection of a philosophical paradigm and of appropriate methods to execute the research.

Broken Contract Jan 14 2021 In 1986, 70 percent of the first-year class of Harvard Law School wanted to pursue careers in public-interest law. Ten years later, the same percentage of this class was pursuing careers in private corporate firms. How is it that these students began their careers interested in using law as a vehicle for social change, but ended up in those very law firms most resistant to change? How are law students able to reconcile liberal politics with

careers in corporate law? Richard D. Kahlenberg's *Broken Contract* serves to warn prospective law students on the transformation that happens during the second and third years. His memoir explores the intense competitiveness and insidious pressure leading to jobs that are lucrative, prestigious, and challenging-but ultimately unsatisfying. Though *Broken Contract* doesn't seek to convince every law student to go into public service, Kahlenberg means to challenge and restructure our social institutions to make it easier to follow our impulses toward good instead of toward the goods.

Whilst retaining its core structure of the three-phase cost planning process originally developed by Ferry and Brandon, the text provides a thorough grounding in contemporary issues including procurement innovation, whole life cycle costing and modelling techniques. Designed to support the core cost planning studies covered by students reading for degrees in quantity surveying and construction management, it provides a platform for understanding the fundamental importance of effective cost planning practice. The principals of elemental cost planning are covered from both pre- and

post- contract perspectives; the role of effective briefing and client/stakeholder engagement as best practice is also reinforced in this text. Stephens on Contractual Indemnities Jul 08 2020 Indemnities have become commonplace in modern commercial contracts, with a modern commercial contract often containing numerous indemnities and using familiar expressions such as "save and hold harmless". However, few lawyers can say with confidence what such expressions mean or even what the advantage of an indemnity is over a straight breach of warranty claim. Along with

their popularity in modern drafting, cases are starting to come along at an increasing rate and the courts are having to address exactly what indemnities are and what they mean in practice. Indeed, from these same cases it can be seen what the pitfalls are for the lawyer involved in drafting or negotiating indemnities in commercial contracts. While cases on indemnities go back centuries, this book focuses on the recent cases to draw out the practical implications for lawyers. There are many cases on the subject and the decisions are not always easy to reconcile, but this book tries to draw out the lessons that can be learned from the cases to demystify the indemnity and explain its practical implications. It is strange that the indemnity has become so popular while at the same time there is a dearth of academic or practical literature on the subject. This book attempts to state in a coherent fashion a modern "law of indemnities" for the modern commercial lawyer. ABOUT THE AUTHOR Richard Stephens has been in practice for some forty years, working primarily in the technology sector. He has seen the law from the angle of both a litigator and a non-contentious lawyer and brings to bear his experience in both of these fields. Richard first qualified as a barrister before moving in-house to work at two prominent IT companies in the 90's and then requalifying as a solicitor to become a partner in two City of London Law firms. He set up his own practice in 2004 and since then has

worked as mediator and arbitrator in numerous cases as well as establishing himself as a trainer in the area of commercial legal subjects, including a half-day session looking specifically at contractual indemnities. He is a Fellow of the Chartered Institute of Arbitrators, of the
