A Handy-book of the Labour Laws Jun 25 2019

Effective Enforcement of EU Labour Law Nov 30 2019 This book by the ETUI Transnational Trade Union Rights Expert Network analyses enforcement as a key element making EU labour law effective or ineffective. Enforcement is the key ingredient that makes rights effective and ensures compliance. It can make or break a legal system. Despite this, enforcement of EU labour law has received little scholarly attention in recent decades and has rarely been examined in a comprehensive way. This book aims to fill

this gap. Intended for academics and practitioners alike, the book adopts a threefold approach to examine this issue. First of all, it explores the idea of effective enforcement and sets out the wider context in which EU labour law enforcement takes place. Secondly, it analyses how enforcement operates in particular areas, including non-discrimination, health and safety, information and consultation rights, and the rights of migrating workers. Thirdly, it critically assesses the role of specific actors (in particular collective actors like trade unions, as well as whistle-blowers and the European Labour Authority) and settings (public procurement, economic and monetary policy) regulated by EU law. Drawing on the insights produced by these analyses, the book concludes by proposing a comprehensive Draft for a Model Directive on 'Effective Enforcement of EU Labour Law' as an inspiration for policy development and scholarly debate in this area.

Global Trade, Labour Rights and International Law Mar 03 2020 This book provides a set of proposals for how best to guarantee effective enforcement of labour rights worldwide. The linkage between labour standards and global trade has been recurrent for some 200 years. At a time when the world is struggling to find a way out of crisis and is striving for economic growth, more than ever there is a need for up-to-date research on how to protect and promote labour rights in the global economy. This book explores the history of the field and also provides an overview of emerging trends and opportunities. It discusses the most recent problems including: the effectiveness and the role of the International Labour Organization (ILO) in the second century of its existence, the World Trade Organization (WTO) and its potential relevance in the protection of labour rights, the effectiveness of the US and the EU Generalised System of Preferences, the impact of corporate social responsibility (CSR) instruments on labour rights, and labour provisions in the international trade agreements concluded by the US and the EU. The book argues, inter alia, that trade agreements seem to be a useful tool to help pave the way out of the crisis and that the United States-Mexico-Canada Agreement (USMCA) can be perceived as a model agreement and a symbol of a shift in perspective from long global supply chains to a focus on regional ones, local production, jobs and a rise in wages. The book will be essential reading for academics and students in the fields of human rights law, international labour law, industrial relations law, international sustainable development law, international economic law and international trade law. It will also be of interest to practitioners, non-government organisations (NGOs) and policy makers.

European Labour Law and Social Policy Cases and Materials Volume 1 Social Dialogue Industrial Relations and Labour Law Nov 22 2021 This is the most comprehensive collection of primary source materials in the labour law and social policy of the European Community ever brought together. With documents and decisions reflecting the state of play at 1st June 2002, it includes: key legislative instruments in EC labour law and social policy; significant associated policy documents produced by the Commission; and important relevant decisions of the European Court of Justice. Since the first edition of this work in 1999, the pace of social policy change and innovation at the level of the European Community has increased dramatically. Indeed, developments during the past three years are little short of remarkable, with particularly important advances in relation to the promotion of information, consultation and participation for workers, along with growing concern for several much broader social policy issues. Recognition of the changes in emphasis and scale for European social policy, and the presence of substantially more material to be included, have caused this edition of the work to be divided into two volumes. Volume I covers social dialogue, industrial relations and labour law, while Volume II is concerned with a wide range of material touching "dignity at work" in the European Community. The arrangement of the material in two self-contained volumes also reflects a division of convenience. Thus, those whose main focus is upon the "labour law" aspects of European social policy may choose to utilise primarily the material contained in the first volume, while those who wish to concentrate more particularly upon fundamental social rights, equal opportunities, anti-discrimination, and dignity at work might wish to take advantage of the framework presented in the second volume. Advocates, judges, policy-makers, scholars and students will all appreciate this essential

sourcebook in EC labour law and social policy.

The Transformation of Labour Law in Europe Aug 20 2021 The labour laws of European democracies all underwent major transformations in the seven decades after the Second World War. Following reconstruction, these laws became an essential element in the building of welfare states; in the 1980s and 1990s they were the target of neo-liberal deregulation; and at the beginning of the 21st century new 'flexible' labour laws have attempted to integrate economic and social policy. This book, a sequel to 'The Making of Labour Law in Europe- A Comparative Study of Nine Countries up to 1945' (ed. B Hepple), compares the similarities and differences in the ways in which EU Member States reflected and shaped these general developments, in the context of economic, social and political changes over the period 1945-2004. Note: the Publishers are issuing a reprint of the first volume, 'The Making of Labour Law in Europe - A Comparative Study of Nine Countries up to 1945' to coincide with publication of the sequel. The great strength of the collection is on the focus on context, with chapters looking at developments in labour market trends and structures of worker representation.
