Interests and Opportunities Sep 20 2021 In the late 1960s, colleges and universities became deeply embroiled in issues of racial equality. To combat this, hundreds of new programs were introduced to address the needs of "high-risk" minority and low-income students. In the years since, university policies have flip-flopped between calls to address minority needs and arguments to maintain "Standard English." Today, anti-affirmative action and anti-access sentiments have put many of these high-risk programs at risk. In *Interests and Opportunities*, Steve Lamos chronicles debates over high-risk writing programs on the national level, and locally, at the University of Illinois at Urbana-Champaign. Using critical race theorist Derrick Bell's concept of "interest convergence," Lamos shows that these programs were promoted or derailed according to how and when they fit the interests of underrepresented minorities and mainstream whites (administrators and academics). He relates struggles over curriculum, pedagogy, and budget, and views their impact on policy changes and course offerings. Lamos finds that during periods of convergence, disciplinary and institutional changes do occur, albeit to suit mainstream standards. In divergent times, changes are thwarted or undone, often using the same standards. To Lamos, understanding the past dynamics of convergence and divergence is key to formulating new strategies of local action and "story-changing" that can preserve and expand race-consciousness and high-risk writing instruction, even in adverse political climates.

From Old English to Standard English Jun 25 2019 "This practical and informative course book is a fascinating, visual volume which leads the student through the development of the language from Old English, through Middle and Early Modern English to the establishment of Standard English in the eighteenth century." "At the core of this substantially expanded second edition lies a series of nearly 200 historical texts, of which more than half are reproduced in facsimile, and which illustrate the progressive changes in the language. The book is firmly based upon linguistic description, with commentaries which form a series of case studies demonstrating the evidence for language change at every level - handwriting, spelling, punctuation, vocabulary, grammar and meaning." "Such a wealth of texts, as well as the structured activities and the various case studies, allow the volume to be used not only as a stimulating course text, guiding students through the analysis of data, but also as a comprehensive resource book and invaluable reference tool for teachers and students at all levels."--BOOK JACKET. Translation Quality Assessment Jun 05 2020 Outlining an original, discourse-based model for translation quality assessment that goes beyond conventional microtextual error analysis, this ground-breaking new work by Malcolm Williams explores the potential of transferring reasoning and argument as the prime criterion of translation quality. Assessment through error analysis is inevitably based on an error count – an unsatisfactory means of establishing, and justifying, differences in quality that forces the evaluator to focus on subsentence elements rather than on the translator's success in conveying the key messages of the source text. Williams counters that a judgement of translation quality should be based primarily on the degree to which the translator has adequately rendered the reasoning, or argument structure. An assessment of six aspects of argument structure is proposed: argument macrostructure, propositional functions, conjunctives, types of arguments, figures of speech, and narrative strategy. Williams illustrates the approach using three different types of instrumental text: letters, statistical reports, and argumentative articles for publication. He goes on to propose a new set of standards, flexible and modular, that will help a translation meet the minimum professional standard.

Language and Linguistic Diversity in the US Jul 19 2021 This highly engaging textbook presents a linguistic view of the history, society, and culture of the United States. It discusses the many languages and forms of language that have been used in the US – including standard and nonstandard forms of English, creoles, Native American languages, and immigrant languages from across the globe – and shows how this distribution and diversity of languages has helped shape and define America as well as an American identity. The volume introduces the basic concepts of sociolinguistics and the politics of language through cohesive, up-to-date and accessible coverage of such key topics as dialectal development and the role of English as the majority language, controversies concerning language use in society, languages other than English used in the US, and the policies that have directly or indirectly influenced language use. These topics are presented in such a way that students can examine the inherent diversity of the communicative systems used in the United States as both a form of cultural enrichment and as the basis for socio-political conflict. The author team outlines the different viewpoints on contemporary issues surrounding language in the US and contextualizes these issues within linguistic facts, to help students think critically and formulate logical discussions. To provide opportunities for further examination and debate, chapters are organized around key misconceptions or questions ("I don't have an accent" or "Immigrants don't want to learn English"), bringing them to the forefront for readers to address directly. *Language and Linguistic Diversity in the US* is a fresh and unique take on a widely taught topic. It is ideal for students from a variety of disciplines or with no prior knowledge of the field, and a useful text for introductory courses on language in the US, American English, language variation, language ideology, and sociolinguistics.

Handbook for the Development of Performance Standards Jul 27 2019 Title I of the Improving America's Schools Act (IASA) of 1994 provides funds for schools with large concentrations of children from low-income families. A fundamental requirement is that children served by Title I funds must be educated according to the same academic standards as all other students. This handbook focuses on methods for developing performance standards in the aligned system of standards and assessments required by IASA Title I. The handbook aims to capture the best of current practice, without relying solely on the published literature, by drawing on the experiences of educators and recent research. The first section (chapters 1-4) defines performance standards in the context of an aligned education system and provides advice for developing a system of performance standards. Chapters introduce the idea of performance standards as a system, provide background about Title I legislation, and define terms related to performance standards. The second section (chapters 5-8) contains several state stories about initiating and developing performance standards and standards-based assessment programs. Chapters focus on Colorado, Maryland, Oregon, and Wyoming. The third section (chapters 9-10) contains the work of nationally recognized researchers in the field of assessment. Chapter 9, "Creating Descriptions of Desired Student Achievement When Setting Performance Standards" by Craig N. Mills and Richard M. Jaeger, describes a method for developing performance standards. Chapter 10, "Setting Performance Standards on Achievement Tests: Meeting the Requirements of Title I" by Ronald K. Hambleton, synthesizes research related to cutting scores. Most chapters contain references. Four appendixes present the instruments. (Contains 16 figures and 4 tables.) (SLD)

The changing face of ESP in today's classroom and workplace Sep 08 2020 Despite the growth and development

of English for Specific Purposes (ESP) as an area of study since the 1960s, few books related to classroom applications in combination with other disciplines such as Content and Language Integrated Learning (CLIL), English Language Teaching (ELT), or English as a Medium of Instruction (EMI), exist. Each section of this volume includes scholarly written studies from across the globe, indicating the extent and the importance ESP has in the current academic world. Filling the present void in available material on this subject, this book contains various useful and effective applications of ESP, teaching activities for classroom settings, as well as insights on how ESP can be combined with, and adopted by, other disciplines. Written from a variety of backgrounds and perspectives, this text is sure to contribute to this field and will be of interest to ESP teachers, as well as postgraduate and undergraduate students.

The Multiple Realities of Multilingualism Mar 03 2020 This book is the very first collection of first-person language learning narratives that offers rich introspective data on the various processes and forces shaping the development and maintenance of multiple languages (seven and more) in a single individual. The writers are twelve multilinguals who have been influenced by quite different contextual factors and who have learned a wide range and combination of dialects and languages from both similar and very different linguistic families. The combinations explored in the narratives include some lesser-known languages that come from under-researched areas, such as the African continent, certain parts of Asia, the Middle East, and Eastern Europe. Also unique are two theoretical chapters which analyze the narrative data against the background of language development research findings within several thematic areas: multiple language learning as a complex dynamic system; the

influence of bilingualism/multilingualism on the acquisition of additional languages; cross-linguistic influence; and also emotions, motivation, and identity. The aim of this juxtaposition and analysis is to allow a meaningful comparison of the extent to which etic, researcher-generated, and emic, learner-offered perspectives match or diverge, and to identify new questions that the emic data may add to research agendas. The book is an excellent resource not only for researchers but also for teachers as well as for students of language at the graduate and undergraduate level.

Contemporary Editing Aug 20 2021 Contemporary Editing offers journalism students a forward-looking introduction to news editing, providing instruction on traditional newsroom conventions along with a focus on emerging news platforms. This comprehensive text provides students with a strong understanding of everything an editor does, addressing essential copy editing fundamentals such as grammar and style; editorial decision making; photo editing, information graphics, and page design; and new media approaches to storytelling. Throughout, the book focuses on how "the editor's attitude"—a keen awareness of news values, ethics, and audience—comes into play in all facets of news editing. This new edition offers expanded coverage of web publishing and mobile media, giving students solid editing skills for today's evolving media and news forums. Features of the Third Edition: -Editing 2.0 boxes discuss the impact of digital technology and social media on editing. -Coverage of grammar problems and a new chapter on working with numbers provide students with a strong grasp of math and grammar, which are the underpinnings for all writing and editing. -An emphasis on editing for brevity prepares students to write and edit clearly and briefly, for print and for the web. -A chapter on the art of headline writing guides students through one of the editor's most important tasks, and introduces the task of search engine optimization. -Examples of ethics and legal situations show students how issues arise in even the most basic stories, and how to address them. -Online exercises present additional practice for students, without needing to purchase a workbook.

Human Communication Technology Sep 28 2019 HUMAN COMMUNICATION TECHNOLOGY A unique book explaining how perception, location, communication, cognition, computation, networking, propulsion, integration of federated Internet of Robotic Things (IoRT) and digital platforms are important components of new-generation IoRT applications through continuous, real-time interaction with the world. The 16 chapters in this book discuss new architectures, networking paradigms, trustworthy structures, and platforms for the integration of applications across various business and industrial domains that are needed for the emergence of intelligent things (static or mobile) in collaborative autonomous fleets. These new apps speed up the progress of paradigms of autonomous system design and the proliferation of the Internet of Robotic Things (IoRT). Collaborative robotic things can communicate with other things in the IoRT, learn independently, interact securely with the world, people, and other things, and acquire characteristics that make them self-maintaining, self-aware, self-healing, and fail-safe operational. Due to the ubiquitous nature of collaborative robotic things, the IoRT, which binds together the sensors and the objects of robotic things, is gaining popularity. Therefore, the information contained in this book will provide readers with a better understanding of this interdisciplinary field. Audience Researchers in various fields including computer science, IoT, artificial intelligence, machine learning, and big data analytics.

English for Research: Usage, Style, and Grammar Nov 30 2019 This guide is based on a study of referees' reports and letters from journal editors on the reasons why papers written by non-native researchers are rejected due to problems with English usage, style and grammar. It draws on English-related errors from around 5000 papers written by non-native authors, 500 abstracts by PhD students, and over 1000 hours of teaching researchers how to write and present research papers. English for Research: Usage, Style, and Grammar covers those areas of English usage that typically cause researchers difficulty: articles (a/an, the), uncountable nouns, tenses (e.g., simple present, simple past, present perfect), modal verbs, active vs. passive form, relative clauses, infinitive vs. -ing form, the genitive, noun strings, link words (e.g., moreover, in addition), quantifiers (e.g., each vs. every),

word order, prepositions, acronyms, abbreviations, numbers and measurements, punctuation, and spelling. Due to its focus on the specific errors that repeatedly appear in papers written by non-native authors, this manual is an ideal study guide for use in universities and research institutes. The book is cross-referenced with the following titles: • English for Academic Research: Grammar Exercises • English for Academic Research: Vocabulary Exercises • English for Academic Research: Writing Exercises • English for Writing Research Papers Adrian Wallwork is the author of more than 30 English Language Teaching (ELT) and English for Academic Purposes (EAP) textbooks. He has trained several thousand PhD students and researchers from 40 countries to prepare and give presentations. Since 1984 he has been revising research manuscripts through his own proofreading and editing service.

Structured Reporting in Radiology Nov 10 2020 This book provides practitioners and scientists with insights into diverse aspects of structured reporting to allow them to develop tools and a knowledge base to ensure that this electronic reporting trend is widely applied. After an introduction to reporting in radiology, various parts of structured reporting are discussed in detail, including an overview of standardized reporting systems, standardized reporting language, DICOM structured reporting, template based structured reporting, and modular reporting. The last chapter addresses the interaction of structured reporting with artificial intelligence and its impact on the future of radiology. The last chapter addresses the interaction of structured reporting with artificial intelligence and its impact on the future of radiology. Endorsed by the European Society of Medical Imaging Informatics (EuSoMII), the scope of the book is based on the Medical Imaging Informatics sub-sections of the European Society of Radiology (ESR) European Training Curriculum Level I and II. It is a valuable resource for residents, radiologists and students.
