Money and the Morality of Exchange Nov 01 2022 This collection is concerned with the symbolic representation of money in a range of different societies, and more specifically with the moral evaluation of monetary and commercial exchanges. It focuses on the different cultural meanings surrounding monetary transactions, emphasizing the enormous cultural variation in the way money is symbolized and how this symbolism relates to culturally constructed notions of production, consumption, circulation, and exchange.

Uncreative Writing Sep 26 2019 "In addition to explaining his concept of uncreative writing, Goldsmith reads the work of writers who have engaged in 'uncreative writing'. Examining a wide range of texts and techniques, including the use of Internet searches to create poetry, the appropriation of courtroom testimony, and the possibility of robo-poetics, Goldsmith joins this recent work to practices adopted by writers and artists such as Walter Benjamin, Gertrude Stein, James Joyce, and Andy Warhol. Yet, more than just a reconfiguration of texts, uncreative writing can also be suffused with emotion and offer new ways of thinking about identity, the making of meaning, and the ethos of our time."--Publisher.

The Mandaean Book of John Dec 22 2021 Given the degree of popular fascination with Gnostic religions, it is surprising how few pay attention to the one such religion that has survived from antiquity until the present day: Mandaism. Mandaeans, who esteem John the Baptist as the most famous adherent to their religion, have in our time found themselves driven from their historic homelands by war and oppression. Today, they are a community in crisis, but they provide us with unparalleled access to a library of ancient Gnostic scriptures, as part of the living tradition that has sustained them across the centuries. Gnostic texts such as these have caught popular interest in recent times, as traditional assumptions about the original forms and cultural contexts of related religious traditions, such as Judaism, Christianity, and Islam, have been called into question. However, we can learn only so much from texts in isolation from their own contexts. Mandaean literature uniquely allows us not only to increase our knowledge about Gnosticism, and by extension all these other religions, but also to observe the relationship between Gnostic texts, rituals, beliefs, and living practices, both historically and in the present day.

Asian Informal Workers Jan 11 2021 This thoroughly researched volume surveys the nature and extent of 'informal' work in Asia, which is a powerful and under-studied force in the region. After over half a century of development, even in the fast growing economies of Asia, the formal sector, and industrial jobs have grown rather slowly, and most non-agricultural employment growth has occurred in the informal economy. At the same time as this, there has been a feminization of informal workers and growth in subcontracted homework. Drawing on detailed case studies carried out in five Asian countries - two low income (India and Pakistan) and three middle income (Indonesia, Thailand and the Philippines) - where subcontracted production, usually by women and children working out of home, is now widespread, this insightful book acknowledges that home-based work is the source of income diversification for poor families, but is also the source of exploitation of vulnerable workers and child labour as firms attempt to contain costs. This wide-ranging and accessible survey, edited by key specialists in this field, along with an impressive team of contributors, examines the social protection needs of these workers arguing convincingly for public action to promote such work and protect these workers as a possible new labour intensive growth strategy in developing countries.

Cultural Democracy Dec 30 2019 Cultural Democracy explores the crisis of our national cultural vitality, as access to the arts becomes increasingly mediated by a handful of corporations and the narrow tastes of wealthy elites. Graves offers the concept of cultural democracy as corrective--an idea with important historic and contemporary validation, and an alternative pathway toward ethical cultural development that is part of a global shift in values. Drawing upon a range of scholarship and illustrative anecdotes from his own experiences with cultural programs in ethnically diverse communities, Graves explains in convincing detail the dynamics of how traditional and grassroots cultures may survive and thrive--or not--and what we can do to provide them opportunities equal to those of mainstream, Eurocentric culture.
