Documentary Evidence Aug 19 2021 "Now in its 13th edition, Documentary Evidence is a comprehensive guide to the legal obligations of disclosure. Logically presented and lucidly written, it provides detailed analysis and sensible practical advice. Following a chronological structure, it shows when and how a practitioner should take action in relation to the obligation to disclose. It is a standard work that is often cited in court judgments. Under the Civil Procedure Rules the parties to an action are encouraged to adopt a "cards-on-the-table" approach toward the exchange of information, not just once litigation has commenced but before as well. It is likely in the early stages that a few documents will be identified as being relevant or key to the matter at hand. These will be used to provide advice as to the merit or not of proceeding with the dispute. If the decision is taken to proceed, the law imposes a requirement to make full and proper disclosure, which is the process whereby the parties to an action disclose to each other all documents in their possession, custody or power relating to matters in question in the action. This title deals with the nature and scope of the obligation to disclose."--Publisher's website.

Decision-Making in Midwifery Practice Nov 29 2019 The book looks at a broad perspective of decision making and each chapter focuses on a specific aspect related to making crucial decisions. Following an initial introduction the book explores the concept of autonomy and the many factors that influence autonomous practise. The role of knowledge in decision making, using evidence to inform decisions, as well as different approaches to decision making are also examined - including the traditional or rational approach, decision analysis and the development of professional judgement. Dilemmas arise when decisions are made and therefore ethical decision making is an important component of this book. Management decisions may be different from those related to giving specific care to women, hence one chapter focuses on making management decisions. Emphasis is also placed on the role of the midwife in helping women make their own decisions, the role of reflection in enhancing the decisions midwives make and the support midwives can receive from their Supervisor of Midwives. Flowcharts explain and facilitate the decision-making process. A very practical approach to decision-making in midwifery, with contributions from midwives who have considerable experience in this area Provides guidelines on how to achieve successful autonomous midwifery practice, enabling theory to be effectively applied to practice Includes coverage of management roles and decision-making as well as clinical scenarios, offering frameworks and flowcharts to guide the inexperienced Suggests different approaches to making difficult decisions
