The Republic of the Marshall Islands Jan 23 2022 Purpose: "The purpose of the Biodiversity action plan (BSAP) is the assist the Marshall Islands to plan for the conservation of its biodiversity and for the sustainable use of its biological resources. This is the first time that such a strategy and action plan has been formulated for the country. It provides an opportunity for the government of the Republic of the Marshall Islands to integrate principals of sustainable resource management and biodiversity conservation into the national development [Dictionary of the Holy Qur??n](#) Jul 29 2022

Wolves from the Sea Mar 01 2020 Review: "Collection of seven papers mostly new, refreshing perspectives on the Island Caribs of the Windward Islands. Drawn from ethnohistory, archaeology, linguistics, ethnology, critical theory, and cross-cultural comparisons, the papers reinvent the Island Carib, whose culture had become stultified as the war-like 'cannibal' opponents of the 'peaceful Arawaks.'"--Handbook of Latin American Studies, v. 57. <http://www.loc.gov/hlas/>

Faded Dreams Nov 08 2020 Faded Dreams paints a new and challenging picture of how racial inequality has evolved in America. Martin Carnoy shows that three dominant views of economic differences between blacks and whites--that blacks are individually responsible for not taking advantage of market opportunities, that the world economy has changed in ways that puts blacks at a tremendous disadvantage compared to whites, and that pervasive racism is holding blacks down--do not adequately explain why blacks made such large gains in the past and stopped making them in the 1980s and 1990s. Using a systematic analysis of fifty years of data on income, education, and the variety of jobs that both blacks and whites have held, Faded Dreams offers a powerful argument for active government intervention to improve the education and living conditions of disadvantaged black children.

Namibia Under South African Rule Oct 08 2020 The peoples of Namibia have been on the move throughout history. The South Africans took over from the Germans in 1915 in trying to fit them into a colonial landscape. This book is about the clashes and stresses which resulted from the determined efforts at containment during the first three decades of South African colonial rule. Wild Majesty Jul 25 2019 Wild Majesty presents an anthology of writings about the Amerindian inhabitants of the Caribbean, from such diverse sources as the first reports of Columbus, French missionary tracts, the diaries of English colonial administrators, and modern ethnographers, travel writers, and film makers. This written and visual material has been carefully selected to illustrate the development of non-Amerindian knowledge of and attitudes toward the society and culture of the so-called "Island Caribs", who once dominated the whole of the Lesser Antilles and continue to act today as a potent symbol of resistance to, and independence from, the modern nation-state. The volume breaks new ground in the anthropological use of literary and historical sources, as well as providing new translations of better-known texts, and original translations of rare printed works and previously unpublished documents from the European archives. This fascinating collection is essential for students of history, cultural studies, and anthropology, and all general readers interested in Columbia, the Caribbean, or exploration.

Invisible Genealogies Sep 18 2021 Invisible Genealogies is a landmark reinterpretation of the history of anthropology in North America. During the past two decades, theorizing by many American anthropologists has called for an "experimental moment" grounded in explicit self-reflexive scholarship and experimentation with alternate forms of presentation. Such postmodern anthropology has effectively downplayed connections with past luminaries in the field, whose scholarship is perceived to be uncomfortably colonialist and nonreflexive. Ironically, as the American Anthropological Association nears its one hundredth anniversary and interest in the history of the discipline is at an all-time high, that history has been effectively presented as removed from and irrelevant to the new generation. Invisible Genealogies offers an alternative, compelling vision of the development of anthropology in North America, one that emphasizes continuity rather than discontinuity from legendary founder Franz Boas to the present. Regna Darnell identifies key interpretive assumptions and practices that have persisted, sometimes in modified form, since the groundbreaking work of A. L. Kroeber, Boas, Ruth Benedict, Edward Sapir, Elsie Clews Parsons, Paul Radin, Benjamin Lee Whorf, and A. Irving Hallowell during the founding decades of anthropology. Also highlighted are the Americanist roots of postmodern anthropology and the work of innovative recent scholars like Claude Lévi-Strauss and Clifford Geertz.

[Indigenous Resurgence in the Contemporary Caribbean](#) Nov 20 2021 Views of the modern Caribbean have been constructed by a fiction of the absent aboriginal. Yet, all across the Caribbean Basin, individuals and communities are reasserting their identities as indigenous peoples, from Carib communities in the Lesser Antilles, the Garifuna of Central America, and the Taino of the Greater Antilles, to members of the Caribbean diaspora. Far from extinction, or permanent marginality, the region is witnessing a resurgence of native identification and organization. This is the only volume to date that focuses concerted attention on a phenomenon that can no longer be ignored. Territories covered include Belize, Cuba, Dominica, the Dominican Republic, French Guiana, Guyana, St. Vincent, Suriname, Trinidad and Tobago, and the Puerto Rican diaspora. Writing from a range of contemporary perspectives on indigenous presence, identities, the struggle for rights, relations with the nation-state, and globalization, fourteen scholars, including four indigenous representatives, contribute to this unique testament to cultural survival. This book will be indispensable to students of Caribbean history and anthropology, indigenous studies, ethnicity, and globalization.

Namibia's Red Line Sep 26 2019 Based on archival sources and oral history, this book reconstructs a border-building process in Namibia that spanned more than sixty years. The process commenced with the establishment of a temporary veterinary defence line against rinderpest by the German colonial authorities in the late nineteenth century and ended with the construction of a continuous two-metre-high fence by the South African colonial government sixty years later. This 1250-kilometre fence divides northern from central Namibia even today. The book combines a macro and a micro-perspective and differentiates between cartographic and physical reality. The analysis explores both the colonial state's agency with regard to veterinary and settlement policies and the strategies of Africans and Europeans living close to the border. The analysis also includes the varying perceptions of individuals and populations who lived further north and south of the border and describes their experiences crossing the border as migrant workers, African traders, European settlers and colonial officials. The Red Line's history is understood as a gradual process of segregating livestock and people, and of constructing dichotomies of modern and traditional, healthy and sick, European and African.

Blood Politics Dec 22 2021 "Blood Politics offers an anthropological analysis of contemporary identity politics within the second largest Indian tribe in the United States--one that pays particular attention to the symbol of "blood." The work treats an extremely sensitive topic with originality and insight. It is also notable for bringing contemporary theories of race, nationalism, and social identity to bear upon the case of the Oklahoma Cherokee."--Pauline Turner Strong, author of *Captive Selves, Captivating Others: The Politics and Poetics of Colonial American Captivity Narratives*

Settler Colonialism in the Twentieth Century Jun 15 2021 Postcolonial states and metropolitan societies still grapple today with the divisive and difficult legacies unleashed by settler colonialism. Whether they were settled for trade or geopolitical reasons, these settler communities had in common their shaping of landholding, laws, and race relations in colonies throughout the world. By looking at the detail of settlements in the twentieth century--from European colonial projects in Africa and expansionist efforts by the Japanese in Korea and Manchuria, to the Germans in Poland and the historical trajectories of Israel/Palestine and South Africa--and analyzing the dynamics set in motion by these settlers, the contributors to this volume establish points of comparison to offer a new framework for understanding the character and fate of twentieth-century empires.

The Indigenous People of the Caribbean Jun 23 2019 "A survey of the current state of study of indigenous Caribbean people by archaeologists, historians, and anthropologists. . . . Emphasizes that even though indigenous people were the victims of genocide, they helped to establish a persistent pattern of relations between other Caribbean settlers and their environment, and became central symbols of Caribbean identity and resistance to colonialism. . . . Strongly recommended for every library concerned with Caribbean and native American studies."--Choice "An excellent introduction to native peoples of the Caribbean region. . . . Will be useful to anthropologists, historians, and other social scientists working in the Caribbean."--Jerald T. Milanich, Florida Museum of Natural History This volume brings together nineteen Caribbean specialists to produce the first general introduction to the indigenous peoples of that region. Writing for both general and academic audiences, contributors provide an authoritative, up-to-date picture of these fascinating peoples--their social organization, religion, language, lifeways, and contribution to the culture of their modern descendants--in what is ultimately a comprehensive reader on Caribbean archaeology, ethnohistory, and ethnology. The New Resource Wars Feb 09 2021 Gedicks paints a disturbing picture of the current environmental crisis, but points to hopeful signs of resistance and coalition that could successfully block multinational corporations' resources colonization of native lands.

State of the Union 1994 Aug 06 2020 Clinton rode into office on the promise of "change." It was a safe, content-free slogan. After all, in recent years, the most radical proposals for change have come not from the Democrats but from the Republican right. "Change" could mean the further downsizing of government and neglect of social problems, or, of course, the reversal of these trends. When they went to the polls in 1992, however, most Americans had a good idea of what kind of change they wanted.

Creole Indigeneity Mar 13 2021 During the colonial period in Guyana, the country's coastal lands were worked by enslaved Africans and indentured Indians. In "Creole Indigeneity," Shona N. Jackson investigates how their descendants, collectively called Creoles, have remade themselves as Guyana's new natives, displacing indigenous peoples in the Caribbean through an extension of colonial attitudes and policies. Looking particularly at the nation's OCOs politically fraught decades from the 1950s to the present, Jackson explores aboriginal and Creole identities in Guyanese society. Through government documents, interviews, and political speeches, she reveals how Creoles, though unable to usurp the place of aboriginals as First Peoples in the New World, nonetheless managed to introduce a new, more socially viable definition of belonging, through labor. The very reason for bringing enslaved and indentured workers into Caribbean labor became the organizing principle for Creoles' OCO new identities. Creoles linked true belonging, and so political and material right, to having performed modern labor on the land; labor thus became the basis for their subaltern, settler modes of indigeneity. OCOa contradiction for belonging under postcoloniality that Jackson terms OC Creole indigeneity. OCO In doing so, her work establishes a new and productive way of understanding the relationship between national power and identity in colonial, postcolonial, and anticolonial contexts.

High Stakes Feb 21 2022 In 1979, Florida Seminoles opened the first tribally operated high-stakes bingo hall in North America. At the time, their annual budget stood at less than \$2 million. By 2006, net income from gaming had surpassed \$600 million. This dramatic shift from poverty to relative economic security has created tangible benefits for tribal citizens, including employment, universal health insurance, and social services. Renewed political self-governance and economic strength have reversed decades of U.S. settler-state control. At the same time, gaming has brought new dilemmas to reservation communities and triggered outside accusations that Seminoles are sacrificing their culture by embracing capitalism. In *High Stakes*, Jessica R. Cattellino tells the story of Seminoles' complex efforts to maintain politically and culturally distinct values in a time of new prosperity. Cattellino presents a vivid ethnographic account of the history and consequences of Seminole gaming. Drawing on research conducted with tribal permission, she describes casino operations, chronicles the everyday life and history of the Seminole Tribe, and shares the insights of individual Seminoles. At the same time, she unravels the complex connections among cultural difference, economic power, and political rights. Through analyses of Seminole housing, museum and language programs, legal disputes, and everyday activities, she shows how Seminoles use gaming revenue to enact their sovereignty. They do so in part, she argues, through relations of interdependency with others. *High Stakes* compels rethinking of the conditions of indigeneity, the power of money, and the meaning of sovereignty.

Hydraulic City Dec 30 2019 In *Hydraulic City* Nikhil Anand explores the politics of Mumbai's water infrastructure to demonstrate how citizenship emerges through the continuous efforts to control, maintain, and manage the city's water. Through extensive ethnographic fieldwork in Mumbai's settlements, Anand found that Mumbai's water flows, not through a static collection of pipes and valves, but through a dynamic infrastructure built on the relations between residents, plumbers, politicians, engineers, and the 3,000 miles of pipe that bind them. In addition to distributing water, the public water network often reinforces social identities and the exclusion of marginalized groups, as only those actively recognized by city agencies receive legitimate water services. This form of recognition—what Anand calls "hydraulic citizenship"—is incremental, intermittent, and reversible. It provides residents an important access point through which they can make demands on the state for other public services such as sanitation and education. Tying the ways Mumbai's poorer residents are seen by the state to their historic, political, and material relations with water pipes, the book highlights the critical role infrastructures play in consolidating civic and social belonging in the city.

Colonial Entanglement Mar 25 2022 From 2004 to 2006 the Osage Nation conducted a contentious governmental reform process in which sharply differing visions arose over the new government's goals, the Nation's own history, and what it means to be Osage. The primary debates were focused on biology, culture, natural resources, and sovereignty. Osage anthropologist Jean Dennison documents the reform process in order to reveal the lasting effects of colonialism and to illuminate the possibilities for indigenous sovereignty. In doing so, she brings to light the many complexities of defining indigenous citizenship and governance in the twenty-first century. By situating the 2004-6 Osage Nation reform process within its historical and current contexts, Dennison illustrates how the Osage have creatively responded to continuing assaults on their nationhood. A fascinating account of a nation in the midst of its own remaking, *Colonial Entanglement* presents a sharp analysis of how legacies of European invasion and settlement in North America continue to affect indigenous people's views of selfhood and nationhood.

The Dominica Story Jan 11 2021 This text traces the origin and development of this island from its volcanic formation to 1994. The author interweaves the island's history with geography, ecology, folklore and social custom to inform the reader about both Dominica and Caribbean history as a whole.

Language in the Americas Sep 30 2022 This book is concerned primarily with the evidence for the validity of a genetic unit, Amerind, embracing the vast majority of New World languages. The only languages excluded are those belonging to the Na-Dene and Eskimo-Aleut families. It examines the now widely held view that Haida, the most distant language genetically, is not to be included in Na-Dene. It confined itself to Sapir's data, although the evidence could have been buttressed considerably by the use of more recent materials. What survives is a body of evidence superior to that which could be adduced under similar restrictions for the affinity of Albanian, Celtic, and Armenian, all three universally recognized as valid members of the Indo-European family of languages. A considerable number of historical hypotheses emerge from the present and the forthcoming volumes. Of these, the most fundamental bears on the question of the peopling of the Americas. If the results presented in this volume and in the companion volume on Eurasian are valid, the classification of the world's languages based on genetic criteria undergoes considerable simplification.

Lughat-ul-Quran 2 Nov 01 2022 In order to understand the true message and spirit of the Holy Quran, it is essential to know the language it has been revealed in. The first step is to understand the meaning of individual words. One needs to understand how words were used by the ancient Arabs by the time of Quranic revelation, and not depend on anyone's explanation or understanding as to what they mean today. Along with proper understanding of Arabic grammar, the true meanings of Quranic words, and their use with respect to the context in which they have been revealed in, one student of Quran may get closer to the Truth. The task of creating a Quranic dictionary or encyclopedia that would explain the classical meanings of Quranic words and their use along with significance was undertaken by Allama Ghulam Ahmed Parwez in 1960, where he compiled *Lughat-ul-Quran* in Urdu language. Now this dictionary has been translated to English by Quranic Education Society in Norway, in order to appeal to a larger audience worldwide and to inspire modern Quranic students.

The Image of Whiteness May 27 2022 How contemporary photographers have subverted the constructions and complicities of whiteness From the advent of early colonial photography in the 19th century to contemporary "white savior" social-media images, photography continues to play an integral role in the maintenance of white sovereignty. As various scholars have shown, the technology of the camera is not innocent, and nor are the images it produces. In this way, the invention and continuance of the "white race" is not just a political, social and legal phenomenon, it is also a complexly visual one. In a time of revived fascisms, from Donald Trump to Tommy Robinson, we must attempt to locate the image of whiteness anew, so that we can better understand its nonsensical construction. What does whiteness look like, and how might we begin to trace an anti-racist history of artistic resistance that works against it? The *Image of Whiteness* seeks to introduce its reader to some important extracts from the troubling story of whiteness, to describe its falsehoods, its paradoxes and its oppressive nature, and to highlight some of the crucial work photographic artists have done to subvert and critique its image. Edited by writer and photography scholar Daniel C. Blight, *The Image of Whiteness* includes the work of artists Abdul Abdullah, Agata Madejska, Broomberg & Chanarin, Buck Ellison, John Lucas & Claudia Rankine, David Birkin, Hank Willis Thomas, Kajal Nisha Patel, Michelle Dizon & Viet Le, Nancy Burson, Nate Lewis, Libita Clayton, Paul Mpagi Sepuya, Richard Misrach, Sophie Gabrielle, Stacy Kranitz and Stanley Wolukau-Wanambwa.

The North American Mosaic Jun 27 2022 The North American Mosaic has four overarching features. First, it is, to the extent feasible, based on comparable information on the status and trends of major indicators of the state of the environment in Canada, Mexico, and the United States. Second, the report confirms that these three countries together make up an incredibly complex, dynamic, and interconnected ecosystem in which humans play a dominant and decisive role. Third, the report raises important and sometimes disquieting questions concerning the sustainability of some current trends. Finally, the report is a reminder that our economic, social, and physical well-being are utterly dependent on the life-sustaining services provided by nature. This report emphasizes the importance of developing mutually compatible economic, social, and environmental goals and policies across the three-country region.

Democracy's Infrastructure Aug 18 2021 In the past decade, South Africa's "miracle transition" has been interrupted by waves of protests in relation to basic services such as water and electricity. Less visibly, the post-apartheid period has witnessed widespread illicit acts involving infrastructure, including the nonpayment of service charges, the bypassing of metering devices, and illegal connections to services. *Democracy's Infrastructure* shows how such administrative links to the state became a central political terrain during the anti-apartheid struggle and how this terrain persists in the post-apartheid present. Focusing on conflicts surrounding prepaid water meters, Antina von Schnitzler examines the techno-political forms through which democracy takes shape. Von Schnitzler explores a controversial project to install prepaid water meters in Soweto—one of many efforts to curb the nonpayment of service charges that began during the anti-apartheid struggle—and she traces how infrastructure, payment, and technical procedures become sites where citizenship is mediated and contested. She follows engineers, utility officials, and local bureaucrats as they consider ways to prompt Sowetans to pay for water, and she shows how local residents and activists wrestle with the constraints imposed by meters. This investigation of democracy from the perspective of infrastructure reframes the conventional story of South Africa's transition, foregrounding the less visible remainders of apartheid and challenging readers to think in more material terms about citizenship and activism in the postcolonial world. *Democracy's Infrastructure* examines how seemingly mundane technological domains become charged territory for struggles over South Africa's political transformation.

Herero Heroes Jul 17 2021 This text describes the manner in which the Herero of Namibia struggled to maintain control over their own freedom in the face of advancing German colonial control. The Herero-German war led to the destruction of Herero society in all of its pre-war facets. Yet Herero society re-emerged, re-organizing itself around the structures and beliefs of the German colonial army and Rhenish missionary activity. Taking advantage of the South African invasion of Namibia in World War I the Herero established themselves in areas of their own choosing. The effective re-occupation of land by the Herero forced the new colonial state, anxious to maintain peace and cut costs, to come to terms with the existence of Herero society. The study ends in 1923 when the death and funeral of Samuel Maherero - first paramount of the Herero and then resistance leader - the catalyst that brought the disparate groups of Herero together to establish a single unitary Herero identity.

Southeast Asian Tribes, Minorities, and Nations, Volume 1 May 03 2020 A major source of political instability in Southeast Asia has been ethnic diversity and the lack of congruence between ethnic distributions and national boundaries. Here twenty specialists base their papers largely on original field work in Burma, China, India, Laos, Malaysia, Thailand, and Vietnam. Contrary to the usual picture of tribal people as isolated, homogeneous, stable, and conservative, the papers show tribesmen are often a dynamic force in the modern history of Southeast Asian states. Descriptions of tribal life and government programs, together with charts, tables, maps, and photographs give a wealth of data. Originally published in 1967. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Mexico since Independence Apr 13 2021 Mexico Since Independence brings together six chapters from Volumes III, V and VII of the Cambridge History of Latin America to provide in a single volume an economic, social and political history of Mexico since independence from Spain in 1821. This, it is hoped, will be useful for both teachers and students of Latin American history. Each chapter is accompanied by a bibliographical essay.

Reflections of a Culture Broker Dec 10 2020 Is culture brokered like stocks, real estate, or marriage? In this engaging book, Richard Kurin shows that cultures are also mediated and indeed brokered by countries, organizations, communities, and individuals -- all with their own vision of the truth and varying abilities to impose it on others. Drawing on his diverse experiences in producing exhibitions and public programs, Kurin challenges culture brokers -- defined broadly to include museum professionals, film-makers, journalists, festival producers, and scholars of many disciplines -- to reveal more clearly the nature of their interpretations, to envision the ways in which their messages can "play" to different audiences, and to better understand the relationship between knowledge, art, politics, and entertainment. The book documents a variety of cases in which the Smithsonian has brokered culture for the American public: a planned exhibit on Jerusalem had to balance both Israeli and Palestinian agendas; debates over the 1996 Olympic Arts Festival presented differing visions of the American South; and the National Air and Space Museum's controversial display of the Enola Gay prompted the Smithsonian to re-examine the role of national museums. Arguing that cultural exhibits reflect a series of decisions about representing someone, someplace, and something, Reflections of a Culture Broker discusses the ethical and technical problems faced by not only those who practice in a museum setting but also anyone charged with representing culture in a public forum.

Law and Anthropology Apr 25 2022 The "Law & Anthropology Yearbook" brings together a collection of studies that discuss legal problems raised by cultural differences between people and the law to which they are subject. "Volume 8" contains a selection of edited papers presented at the VIth International Symposium of the Commission on Folk Law and Legal Pluralism, dealing with the topic of Indigenous Self-Determination and Legal Pluralism'.

Text and Nation Jan 29 2020 Text and Nation: Cross-Disciplinary Essays on National and Cultural Identities consists of eleven articles that address how struggles to demarcate the borderlines of nations affect texts and how these texts are, in turn, narrated in them. Written by eminent scholars from African American Studies, Art History, Comparative Literature, East Asian Studies, English, French, German, Government, Linguistics, Philosophy, and Spanish, the essays explore relationships between national identity and textual genres of literature, music, the visual arts, and language policies. The volume places particular emphasis on the need to understand how the end of the Cold War has affected our interpretation of national and cultural identities. It provides a combination of textual analyses with an invitation to move the interpretive enterprise across the disciplines.
