The Age of Spiritual Machines Aug 20 2021 Ray Kurzweil is the inventor of the most innovative and compelling technology of our era, an international authority on artificial intelligence, and one of our greatest living visionaries. Now he offers a framework for envisioning the twenty-first century—an age in which the marriage of human sensitivity and artificial intelligence fundamentally alters and improves the way we live. Kurzweil's prophetic blueprint for the future takes us through the advances that inexorably result in computers exceeding the memory capacity and computational ability of the human brain by the year 2020 (with human-level capabilities not far behind); in relationships with automated personalities who will be our teachers, companions, and lovers; and in information fed straight into our brains along direct neural pathways. Optimistic and challenging, thought-provoking and engaging, *The Age of Spiritual Machines* is the ultimate guide on our road into the next century.

The Age of Everything Dec 24 2021 Taking advantage of recent advances throughout the sciences, Matthew Hedman brings the distant past closer to us than it has ever been. Here, he shows how scientists have determined the age of everything from the colonization of the New World over 13,000 years ago to the origin of the universe nearly fourteen billion years ago. Hedman details, for example, how interdisciplinary studies of the Great Pyramids of Egypt can determine exactly when and how these incredible structures were built. He shows how the remains of humble trees can illuminate how the surface of the sun has changed over the past ten millennia. And he also explores how the origins of the earth, solar system, and universe are being discerned with help from rocks that fall from the sky, the light from distant stars, and even the static seen on television sets. Covering a wide range of time scales, from the Big Bang to human history, *The Age of Everything* is a provocative and far-ranging look at how science has determined the age of everything from modern mammals to the oldest stars, and will be indispensable for all armchair time travelers. "We are used to being told confidently of an enormous, measurable past: that some collection of dusty bones is tens of thousands of years old, or that astronomical bodies have an age of some billions. But how exactly do scientists come to know these things? That is the subject of this quite fascinating book. . . . As told by Hedman, an astronomer, each story is a marvel of compressed exegesis that takes into account some of the most modern and intriguing hypotheses."—Steven Poole, *Guardian* "Hedman is worth reading because he is careful to present both the power and peril of trying to extract precise chronological data. These are all very active areas of study, and as you read Hedman you begin to see how researchers have to be both very careful and incredibly audacious, and how much of our understanding of ourselves—through history, through paleontology, through astronomy—depends on determining the age of everything."—Anthony Doerr, *Boston Globe*

Italy in the Age of the Renaissance, 1380-1530 Oct 29 2019 Society, the state and the Church - Political histories - Learning, the arts and music.

Renaissance in Italy: The Age of the Despots Dec 12 2020

America in the Age of the Titans Sep 08 2020 The book contains the results of research into primary sources and recent scholarship with an emphasis on leading personalities and anecdotes about them.

Ballet and Opera in the Age of "Giselle" Jul 07 2020 Marian Smith recaptures a rich period in French musical theater when ballet and opera were intimately connected. Focusing on the age of *Giselle* at the Paris Opéra (from the 1830s through the 1840s), Smith offers an unprecedented look at the structural and thematic relationship between the two genres. She argues that a deeper understanding of both ballet and opera—and of nineteenth-century theater-going culture in general—may be gained by examining them within the same framework instead of following the usual practice of telling their histories separately. This handsomely illustrated book ultimately provides a new portrait of the Opéra during a period long celebrated for its box-office successes in both genres. Smith begins by showing how gestures were encoded in the musical language that composers used in ballet and in opera. She moves on to a wide range of topics, including the relationship between the gestures of the singers and the movements of the dancers, and the distinction between dance that represents dancing (entertainment staged within the story of the opera) and dance that represents action. Smith maintains that ballet-pantomime and opera continued to rely on each other well into the nineteenth century, even as they thrived independently. The "divorce" between the two arts occurred little by little, and may be traced through unlikely sources: controversies in the press about the changing nature of ballet-pantomime music, shifting ideas about originality, complaints about the ridiculousness of pantomime, and a little-known rehearsal score for *Giselle*.

The Age of Television Oct 22 2021 Analyses the impact of television on daily life, focusing on both the concepts and theories of the medium. This book also analyzes the way in which televised entertainment has radically altered human perceptions of place and time, multiplied opportunities for indirect social experience, and fueled the collective imagination.

The Age of Innocence Nov 22 2021

The Age of Kali Jul 31 2022 The Age of Kali is a panorama of the Indian subcontinent, poised between chaos, westernization and immemorial tradition& It is like Dalrymple's previous books, erudite, engaging and entertaining Martin Gayford, *Spectator* Books of the Year

The Age of Heretics Mar 15 2021 In this second edition of his bestselling book, author Art Kleiner explores the nature of effective leadership in times of change and defines its importance to the corporation of the future. He describes a heretic as a visionary who creates change in large-scale companies, balancing the contrary truths they can't deny against their loyalty to their organizations. The Age of Heretics reveals how managers can get stuck in counterproductive ways of doing things and shows why it takes a heretical point of view to get past the deadlock and move forward.

The Age of Sage Sep 20 2021 A reading adventure that includes exploration, research, and identifying and realizing that dreams and desires do come true! Pepper presents a guide for achieving dreams and desires. Her advice and exercises are simple, fun to do, and highly effective.

The Age of Catastrophe Feb 11 2021 One of Germany's leading historians presents an ambitious and masterful account of the years encompassing the two world wars. Characterized by global war, political revolution and national crises, the period between 1914 and 1945 was one of the most horrifying eras in the history of the West. A noted scholar of modern German history, Heinrich August Winkler examines how and why Germany so radically broke with the normative project of the West and unleashed devastation across the world. In this total history of the thirty years between the start of World War One and the dropping of atomic bombs on Hiroshima and Nagasaki, Winkler blends historical narrative with political analysis and encompasses military strategy, national identity, class conflict, economic development and cultural change. The book includes astutely observed chapters on the United States, Japan, Russia, Britain, and the other European powers, and Winkler's distinctly European perspective offers insights beyond the accounts written by his British and American counterparts. As Germany takes its place at the helm of a unified Europe, Winkler's fascinating account will be widely read and debated for years to come.

The Age of the Earth Jul 19 2021 A synthesis of all that has been postulated and is known about the age of the Earth

The Age of Violence Jun 17 2021 Exploring the fury of the young in a world or crisis that seems to offer no alternatives "Only martyrs know neither pity nor fear. Believe me, the day when the martyrs are victorious will be the day of universal conflagration". Jacques Lacan made this gloomy prophecy back in 1959: but doesn't it also apply to our own time? Faced with a rise in attacks around the world, can we really just blame the 'radicalization of Islam'? What hope is there for the alienated youth, as the wars that have ravaged the Middle East spill out across the globe? For Alain Bertho, the mounting chaos we see today is above all driven by the weakening of states' legitimacy under the pressure of globalization. Add to this the hypocrisy of the elites who beat the drum of 'security measures', even as they sow the seeds of violence around the world. This disorder is the swamp of despair which can only produce fresh atrocities. Today's youth are the lost children of neoliberal globalization, the inheritors of the political and human chaos it produces. When they find it easier to imagine the end of the world than the end of capitalism, their revolt tends to take the paths of martyrdom and despair. The closing of the revolutionary hypothesis allows only fury. The answer, Bertho argues, is a new radicalism, able to inspire a collective hope in the future.

The Age of Misadventure Mar 27 2022 The gloriously funny comfort read from the author of A Grand Old Time You're never too old to live dangerously...

Daniel: The Age of Dissolution Jan 13 2021 With the stock market collapse, Daniel's year-long quest to warn people about the imminent crash and its consequences has ended. He has been vindicated for the mockery and scorn that were heaped upon him, but he feels that he has failed because he had not convinced more people to leave the market. There is little satisfaction in being right when people have lost their life savings and more. To visit the New York Stock Exchange where hundreds of men are standing silently in the streets, or sitting on the curbs crying, embarrassed, dejected, and dispirited brings Daniel only pain. He receives threatening letters and is physically attacked by those who believe that he has caused the market's collapse and their misfortune. Through his own strong-willed determination and the support of his family and friends, Daniel begins to make the transition from warning people to providing relief for those who have already or soon will become victims of the imminent depression. And yet, Professor Vogel is even more determined to discredit and destroy him.

The Age of Em Jun 29 2022 Robots may one day rule the world, but what is a robot-ruled Earth like? Many think that the first truly smart robots will be brain emulations or "ems." Robin Hanson draws on decades of expertise in economics, physics, and computer science to paint a detailed picture of this next great era in human (and machine) evolution - the age of em.

The Age of Bowie Aug 27 2019 Respected arts commentator and author Paul Morley, an artistic advisor to the curators of the highly successful retrospective exhibition 'David Bowie Is...' for the Victoria & Albert Museum in London, constructs a definitive story of Bowie that explores how he worked, played, aged, structured his ideas, influenced others, invented the future, and entered history as someone who could and would never be forgotten. Morley captures the greatest moments from across Bowie's life and career; how young Davie Jones of South London became the international David Bowie; his pioneering collaborations in the recording studio with the likes of Tony Visconti, Mick Ronson, and Brian Eno; to iconic live, film, theatre, and television performances from the 1970s, 80s, and 90s, as well as the various encounters and artistic relationships he developed with musicians from John Lennon, Lou Reed, and Iggy Pop to Trent Reznor and Arcade Fire. And of course, discusses in detail his much-heralded and critically acclaimed finale with the release of *Blackstar* just days before his shocking death in New York.

Atom and Individual in the Age of Newton Aug 08 2020 In this stimulating investigation, Gideon Freudenthal has linked social history with the history of science by formulating an interesting proposal: that the supposed influence of social theory may be seen as actual through its coherence with the process of formation of physical concepts. The reinterpretation of the development of science in the seventeenth century, now widely influential, receives at Freudenthal's hand its most persuasive statement, most significantly because of his attention to the theoretical form which is characteristic of classical Newtonian mechanics. He pursues the sources of the parallels that may be noted between that mechanics and the dominant philosophical systems and social theories of the time; and in a fascinating development Freudenthal shows how a quite precise method - as he descriptively labels it, the 'analytic-synthetic method' - which underlay the Newtonian form of theoretical argument, was due to certain interpretive premisses concerning particle mechanics. If he is right, these depend upon a particular stage of conceptual achievement in the theories of both society and nature; further, that the conceptual was generalized philosophically; but, strikingly, Freudenthal shows that this concept-formation itself was linked to the specific social relations of the times of Newton and Hobbes.

Relationship Marketing Jan 01 2020 From the author of the bestselling *The Regis Touch*, a simple process for building the crucial relationships that help a company dominate—and own—the market in the Age of the Customer.

The Age of the Garden Jan 25 2022 For the most part, the first five books of the Bible are glossed over. The basic information is noted and we move on. However, when I was teaching in the State prisons, I decided to use these books at times to explain the beginning of things. In this present time, it appears that answers are popping up that want to explain these books. These books are the motive for the Bible. They satisfy God's plan for Why. That is the intention here. The Why of it all. From the smallest to the Greatest,

there is always a Motive.

The Age of Ageing Better? Feb 23 2022 'Dr Anna Dixon has written a must-read for anyone interested in the future of ageing. Learn from one of the best informed about an issue, and opportunity, that is facing us all.' Andy Briggs, Head of FTSE 100 life insurer Phoenix Group 'A very important book' Sir Muir Gray **The Age of Ageing Better?** takes a radically different view of what our ageing society means. Dr Anna Dixon turns the misleading and depressing narrative of burden and massive extra cost of people living longer on its head and shows how our society could thrive if we started thinking differently. This book shines a spotlight on how as a society we're currently failing to respond to the shifting age profile - and what needs to change. Examining key areas of society including health, financial security, where and how people live, and social connections, Anna Dixon presents a refreshingly optimistic vision for the future that could change the way we value later life in every sense.

Human Work In the Age of Smart Machines May 17 2021 We are living through a time of upheaval, with increasing threats to global health, democratic institutions, and the world's economies. But behind the alarming headlines is another issue that must be quickly addressed: the role of workers is being transformed—and often rendered obsolete—by automation and artificial intelligence. As Jamie Merisotis, the president and CEO of Lumina Foundation, argues in *Human Work In the Age of Smart Machines*, we can—and must—rise to this challenge by preparing to work alongside smart machines doing that which only humans can: thinking critically, reasoning ethically, interacting interpersonally, and serving others with empathy. In *Human Work*, Merisotis, author of the award-winning 2015 book *America Needs Talent*, offers a roadmap for the large-scale, radical changes we must make in order to find abundant and meaningful work in the 21st century. His vision centers on developing our unique capabilities as humans through a lifetime of learning opportunities that are easy to navigate, deliver fair results, and offer a broad range of credentials—from college degrees to occupational certifications. By shifting long-held ideas about how the workforce should function and expanding our concept of work, he argues that we can harness the population's potential, encourage a deeper sense of community, and erase a centuries-long system of inequality. As the headlines blink red, now is the time to redesign education, training, and the workplace as a whole. Yes, many jobs will be lost to technology, but if we promote people's deeper potential, engaging human work will always be available.

Human Development and Interaction in the Age of Ubiquitous Technology Apr 03 2020 The human condition is affected by numerous factors in modern society. In modern times, technology is so integrated into culture that it has become necessary to perform even daily functions. *Human Development and Interaction in the Age of Ubiquitous Technology* is an authoritative reference source for the latest scholarly research on the widespread integration of technological innovations around the globe and examines how human-computer interaction affects various aspects of people's lives. Featuring emergent research from theoretical perspectives and case studies, this book is ideally designed for professionals, students, practitioners, and academicians.

The Age of Drake Mar 03 2020

The Age of A.I. Nov 30 2019

The Age-Well Plan May 05 2020 **The Age-Well Project** dived deep into the science of ageing well, and authors Annabel and Susan explained how they overhauled their own lives to prioritise healthy longevity. In *The Age-Well Plan* Susan gives you a simple, clear and easy-to-follow six-week plan that will show you how to make changes -- small and large -- to support healthy ageing.

Military Experience in the Age of Reason Nov 10 2020 First published in 1987. Routledge is an imprint of Taylor & Francis, an informa company.

The Beginning of the Age of Mammals May 29 2022 Publisher description

The Age of Absurdity Apr 27 2022 In a world that demands conspicuous consumption, high-octane relationships and perpetual youth, we can find ourselves tormented by dissatisfaction and anxiety, fearful that everyone is having a better time than we are

The Age of the Horse Jul 27 2019 A "superb" account of the enduring connection between humans and horses—"Full of the sort of details that get edited out of more traditional histories" (*The Economist*). Fifty-six million years ago, the earliest equid walked the earth—and beginning with the first-known horse-keepers of the Copper Age, the horse has played an integral part in human history. It has sustained us as a source of food, an industrial and agricultural machine, a comrade in arms, a symbol of wealth, power, and the wild. Combining fascinating anthropological detail and incisive personal anecdote, equestrian expert Susanna Forrest draws from an immense range of archival documents as well as literature and art to illustrate how our evolution has coincided with that of horses. In paintings and poems (such as Byron's famous "Mazeppa"), in theater and classical music (including works by Liszt and Tchaikovsky), representations of the horse have changed over centuries, portraying the crucial impact that we've had on each other. Forrest combines this history with her own experience in the field, and travels the world to offer a comprehensive look at the horse in our lives today: from Mongolia where she observes the endangered takhi, to a show-horse performance at the Palace of Versailles; from a polo club in Beijing to Arlington, Virginia, where veterans with PTSD are rehabilitated through interaction with horses. "For the horse-addicted, a book can get no better than this . . . original, cerebral and from the heart." —*The Times* (London)

The Age of Turbulence Nov 03 2022 From the bestselling author of *The Map and the Territory* and *Capitalism in America* **The Age of Turbulence** is Alan Greenspan's incomparable reckoning with the contemporary financial world, channeled through his own experiences working in the command room of the global economy longer and with greater effect than any other single living figure. Following the arc of his remarkable life's journey through his more than eighteen-year tenure as chairman of the Federal Reserve Board to the present, in the second half of *The Age of Turbulence* Dr. Greenspan embarks on a magnificent tour d'horizon of the global economy. The distillation of a life's worth of wisdom and insight into an elegant expression of a coherent worldview, *The Age of Turbulence* will stand as Alan Greenspan's personal and intellectual legacy.

The Age of Earthquakes Sep 01 2022 A highly provocative, mindbending, beautifully designed, and visionary look at the landscape of our rapidly evolving digital era. 50 years after Marshall McLuhan's ground breaking book on the influence of technology on culture in *The Medium is the Massage*, Basar, Coupland and Obrist extend the analysis to today, touring the world that's redefined by the Internet, decoding and explaining what they call the "extreme present". **THE AGE OF EARTHQUAKES** is a quick-fire paperback, harnessing the images, language and perceptions of our unfurling digital lives. The authors offer five characteristics of the Extreme Present (see below); invent a glossary of new words to describe how we are truly feeling today; and "mindsources" images and illustrations from over 30 contemporary artists. Wayne Daly's striking graphic design imports the surreal, juxtaposed, mashed mannerisms of screen to page. It's like a culturally prescient, all-knowing email to the reader: possibly the best email they will ever read. Welcome to **THE AGE OF EARTHQUAKES**, a paper portrait of Now, where the Internet hasn't just changed the structure of our brains these past few years, it's also changing the structure of the planet. This is a new history of the world that fits perfectly in your back pocket. 30+ artists contributions: With contributions from Farah Al Qasimi, Ed Atkins, Alessandro Bavo, Gabriele Basilico, Josh Bitelli, James Bridle, Cao Fei, Alex Mackin Dolan, Thomas Dozol, Constant Dullaart, Cecile B Evans, Rami Farook, Hans-Peter Feldmann, GCC, K-Hole, Liam Gillick, Dominique Gonzalez-Foerster, Eloise Hawser, Camille Henrot, Hu Fang, K-Hole, Koo Jeong-A, Katja Novitskova, Lara Ogel, Trevor Paglen, Yuri Patterson, Jon Rafman, Bunny Rogers, Bogosi Sekhukhuni, Taryn Simon, Hito Steyerl, Michael Stipe, Rosemarie Trockel, Amalia Ulman, David Weir, Trevor Yeung.

The Age of Decadence Apr 15 2021 'A riveting account of the pre-First World War years . . . The Age of Decadence is an enormously impressive and enjoyable read.' Dominic Sandbrook, *Sunday Times* 'A magnificent account of a less than magnificent epoch.' Jonathan Meades, *Literary Review* The folk-memory of Britain in the years before the Great War is of a powerful, contented, orderly and thriving country. She commanded a vast empire. She bestowed international commerce. Her citizens were living longer, profiting from civil liberties their grandparents only dreamt of, and enjoying an expanding range of comforts and pastimes. The mood of pride and self-confidence is familiar from Elgar's *Pomp and Circumstance* marches, newsreels of George V's coronation and the London's great Edwardian palaces. Yet things were very different below the surface. In *The Age of Decadence* Simon Heffer exposes the contradictions of late-Victorian and Edwardian Britain. He explains how, despite the nation's massive power, a mismanaged war against the Boers in South Africa created profound doubts about her imperial destiny. He shows how attempts to secure vital social reforms prompted the twentieth century's gravest constitutional crisis and coincided with the worst industrial unrest in British history. He describes how politicians who conceded the vote to millions more men disregarded women so utterly that female suffragists' public protest bordered on terrorism. He depicts a ruling class that fell prey to degeneracy and scandal. He analyses a national psyche that embraced the motor-car, the sensationalist press and the science fiction of H. G. Wells, but also the Arts and Crafts of William Morris and the nostalgia of A. E. Housman. And he concludes with the crisis that in the summer of 1914 threatened the existence of the United Kingdom - a looming civil war in Ireland. He lights up the era through vivid pen-portraits of the great men and women of the day - including Gladstone, Parnell, Asquith and Churchill, but also Mrs Pankhurst, Beatrice Webb, Baden-Powell, Wilde and Shaw - creating a richly detailed panorama of a great power that, through both accident and arrogance, was forced to face potentially fatal challenges. 'A devastating critique of prewar Britain . . . disturbingly relevant to the world in which we live.' Gerard DeGroot, *The Times* 'You won't put it down . . . A really riveting read.' Rana Mitter, *BBC Radio 3 Free Thinking*

Flesh in the Age of Reason Oct 02 2022 In this sequel to the prize-winning 'Enlightenment', Roy Porter completes his lifetime's work, offering an account of the writings of some of the most attractive figures ever to write in English.

The Age of Wonder Jun 05 2020 Shortlisted for the BBC Samuel Johnson Prize for Non-Fiction and the Royal Society Prize for Science Books Richard Holmes, prize-winning biographer of Coleridge and Shelley, explores the scientific ferment that swept across Britain at the end of 18th century in this ground-breaking new biography. 'The Age of Wonder' is Richard Holmes's first major work of biography in over a decade. It has been inspired by the scientific ferment that swept through Britain at the end of the eighteenth century, 'The Age of Wonder' and which Holmes now radically redefines as 'the revolution of Romantic Science'. The book opens with Joseph Banks, botanist on Captain Cook's first Endeavour voyage, stepping onto a Tahitian beach in 1769, hoping to discover Paradise. Many other voyages of discovery swiftly follow, while Banks, now President of the Royal Society in London, becomes our narrative guide to what truly emerges as an Age of Wonder. Banks introduces us to the two scientific figures that dominate the book: astronomer William Herschel and chemist Humphry Davy. Herschel's tireless dedication to the stars, assisted (and perhaps rivalled) by his comet-finding sister Caroline, changed forever the public conception of the solar system, the Milky Way galaxy and the meaning of the universe itself. Davy first shocked the scientific community with his near-suicidal gas experiments in Bristol, then went on to save thousands of lives with his Safety Lamp and established British chemistry as the leading professional science in Europe. But at the cost, perhaps, of his own heart. Holmes proposes a radical vision of science before Darwin, exploring the earliest ideas of deep time and deep space, the creative rivalry with the French scientific establishment, and the startling impact of discovery on great writers and poets such as Mary Shelley, Coleridge, Byron and Keats. With his trademark sense of the human drama, he shows how great ideas and experiments are born out of lonely passion, how scientific discoveries (and errors) are made, how intense relationships are forged and broken by research, and how religious faith and scientific truth collide. The result is breathtaking in its originality, its story-telling energy, and not least, in its intellectual significance.

Merchants and Profit in the Age of Commerce, 1680-1830 Oct 10 2020 Merchant activity across Europe, America and China during the long eighteenth century is explored in this collection of essays. Using a unique data set from accounts and correspondence, contributors are able to show the fragmented nature of merchant activity and the importance of trust-based social and cultural networks.

British Warships in the Age of Sail 1817-1863 Jan 31 2020 The publication of this book sees the completion of a monumental work listing the technical details and career histories of every significant British warship between 1603 and 1863. Following three earlier volumes, this one carries forward the story from the post-Napoleonic War reorganisation of the Royal Navy's rating system to the end of sail as the principal mode of propulsion. ??Although apparently well documented, this is a period of great complexity in the procurement and naval architecture of ships. The introduction of steam radically altered the design of vessels under construction and was later retro-fitted to others, while many 'names' lived a ghostly existence on the Navy List: ships ordered but not started, and in some cases having their intended draughts altered more than once before being cancelled entirely.??This book meticulously sorts out and clarifies these confusions - a major contribution in itself - but for the first time it also provides outline service histories for an era that is largely neglected. Like its companion volumes, the book is organised by Rate, classification and class, with significant technical and building data, followed by a concise summary of the careers of each ship in every class. ??With its unique depth of information, this is a work of the utmost importance to every naval historian and general reader interested in the navy of the sailing era and the formative years of the steam navy that supplanted it.

The age of admission of children to employment in non-Industrial occupations Jun 25 2019

Make My Day Sep 28 2019 Acclaimed media critic J. Hoberman's masterful and majestic exploration of the Reagan years as seen through the unforgettable movies of the era *The third book in a brilliant and ambitious trilogy, celebrated cultural and film critic J. Hoberman's Make My Day is a major new work of film and pop culture history. In it he chronicles the Reagan years, from the waning days of the Watergate scandal when disaster films like Earthquake ruled the box office to the nostalgia of feel-good movies like Rocky and Star Wars, and the delirium of the 1984 presidential campaign and beyond. Bookended by the Bicentennial celebrations and the Iran-Contra affair, the period of Reagan's ascendancy brought such movie events as Jaws, Apocalypse Now, Blade Runner, Ghostbusters, Blue Velvet, and Back to the Future, as well as the birth of MTV, the Strategic Defense Initiative, and the Second Cold War. An exploration of the synergy between American politics and popular culture, Make My Day is the concluding volume of Hoberman's Found Illusions trilogy; the first volume, The Dream Life, was described by Slate's David Edelstein as "one of the most vital cultural histories I've ever read"; Film Comment called the second, An Army of Phantoms, "utterly compulsive reading." Reagan, a supporting player in Hoberman's previous volumes, here takes center stage as the peer of Indiana Jones and John Rambo, the embodiment of a Hollywood that, even then, no longer existed.*
