Corrosion Under Insulation (CUI) Guidelines Apr 26 2022 Corrosion Under Insulation (CUI) Guidelines: Technical Guide for Managing CUI, Third Edition, Volume 55 builds upon the success of the first two editions to provide a fully up-to-date, practical source of information on how to monitor and manage insulated systems. In the first edition of this book published in 2008, the EFC Working Parties WP13 and WP15 engaged together to provide guidelines on managing CUI with contributions from a number of European refining, petrochemical, and offshore companies. The guidelines were intended for use on all plants and installations that contain insulated vessels, piping, and equipment, and cover a risk-based inspection methodology for CUI, inspection techniques, and recommended best practices for mitigating CUI. The guidelines include design of plant and equipment, coatings and the use of thermal spray techniques, types of insulation, cladding/jacketing materials, and protection guards. Corrosion-under-insulation (CUI) refers to the external corrosion of piping and vessels that occurs underneath externally clad/jacketed insulation as a result of the penetration of water. By its very nature CUI tends to remain undetected until the insulation and cladding/jacketing is removed to allow inspection, or when leaks occur. CUI is a common problem shared by the refining, petrochemical, power, industrial, onshore and offshore industries. Provides revised and updated technical guidance on managing CUI provided by EFC Working Parties 13 and 15 Discusses the standard approach to risk based inspection methodology Presents the argument that CUI is everywhere, and looks at mitigating actions that can be started from the onset Includes a wide array of concepts of corrosion mitigation

Collaborative Governance of Local Governments in China Sep 27 2019 China faces the problem of collaboration deficiency in local governance of metropolitan areas. With the evolution of regional spatial structure in China, this book is timely with its analysis on how China can approach current problems in China's regional governance through a holistic collaborative governance mechanism. The book applies the governance theory to the local government in metropolitan areas and explains how this approach may help to equalize regional public resources allocation. The author puts forth a convincing case for the use of holistic collaborative governance to better understand the problems of China's local government in metropolitan areas and to promote regional government collaboration. The book also looks at cross-jurisdiction collaboration organization, collaborative mechanism of

local government, private sector and non-governmental organizations in public affairs (environmental protection, transportation, public health, water resources).

Corrosion Under Insulation (CUI) Guidelines Oct 01 2022 Corrosion-under-insulation (CUI) refers to the external corrosion of piping and vessels that occurs underneath externally clad/jacketed insulation as a result of the penetration of water. By its very nature CUI tends to remain undetected until the insulation and cladding/jacketing is removed to allow inspection or when leaks occur. CUI is a common problem shared by the refining, petrochemical, power, industrial, onshore and offshore industries. In the first edition of this book published in 2008, the EFC Working Parties WP13 and WP15 engaged together to provide guidelines on managing CUI with contributions from a number of European refining, petrochemical and offshore companies. The guidelines are intended for use on all plants and installation that contain insulated vessels, piping and equipment. The guidelines cover a risk-based inspection methodology for CUI, inspection techniques and recommended best practice for mitigating CUI, including design of plant and equipment, coatings and the use of thermal spray techniques, types of insulation, cladding/jacketing materials and protection guards. The guidelines also include case studies. The original document first published in 2008 was very successful and provided an important resource in the continuing battle to mitigate CUI. Many members of the EFC corrosion community requested an update and this has taken between 18-24 months to do so. Hopefully this revised document will continue to serve the community providing a practical source of information on how to monitor and manage insulated systems. Revised and fully updated technical guidance on managing CUI provided by EFC Working Parties WP13 and WP 15 Contributions from a number of European refining, petrochemical and offshore companies Extensive appendices that provide additional practical guidance on the implementation of corrosion-under-insulation best practice, collected practical expertise and case studies

Fringe benefits e rimborsi spese Sep 19 2021 La quarta edizione del libro "Fringe benefits e rimborsi spese", rinnovata ed aggiornata con le previsioni della Legge Finanziaria per il 2010, L. 23 dicembre 2009, n. 191, in materia di tassazione agevolata dei premi di produttività, tiene conto di molte e importanti modifiche normative che sono diventate operative nel corso degli ultimi anni, per esempio l'eliminazione dei regimi agevolativi precedentemente previsti per le stock option o i limiti di deducibilità delle spese relative a prestazioni alberghiere e alle somministrazioni di alimenti e bevande. Il volume, pur conservando l'originaria agilità di consultazione, fornisce una trattazione completa ed esaustiva del quadro di riferimento per la qualificazione e quantificazione dei redditi di lavoro dipendente ed assimilati, ne analizza le varie fattispecie che si possono incontrare nella pratica professionale, con particolare attenzione alla disciplina delle trasferte, e le relative modalità di rimborso degli oneri sostenuti dai dipendenti, e a quella dei fringe benefits. L'ultimo capitolo è stato riservato all'esame della disciplina della deducibilità, sia ai fini delle imposte dirette (Irpef/Ires) sia ai fini IRAP, degli oneri connessi ai dipendenti e collaboratori, per aiutare nella determinazione degli importi deducibili specie quelli la cui deduzione è soggetta a limitazioni. Utile per chi deve affrontare la compilazione della dichiarazione dei redditi.

Seneca the Elder and His Rediscovered ›Historiae ab initio bellorum civilium‹ Nov 29 2019 The refreshed insights into early-imperial Roman historiography this book offers are linked to a recent discovery. In the spring of 2014, the binders of the archive of Robert Marichal were dusted off by the ERC funded project PLATINUM (ERC-StG 2014 n°636983) in response to Tiziano Dorandi's recollections of a series of unpublished notes on Latin texts on papyrus. Among these was an in-progress edition of the Latin rolls from Herculaneum, together with Marichal's intuition that one of them had to be ascribed to a certain 'Annaeus Seneca'. PLATINUM followed the unpublished intuition by Robert Marichal as one path of investigation in its own research and work. Working on the Latin P.Herc. 1067 led to confirm Marichal's intuitions and to go beyond it: P.Herc. 1067 is the only extant direct witness to Seneca the Elder's *Historiae*. Bringing a new and important chapter of Latin literature arise out of a charred papyrus is significant. The present volume is made up of two complementary sections, each of which contains seven contributions. They are in close dialogue with each other, as looking at the same literary matter from several points of view yields undeniable advantages and represents an innovative and fruitful step in Latin literary criticism. These two sections express the two different but interlinked axes along which the contributions were developed. On one side, the focus is on the starting point of the debate, namely the discovery of the papyrus roll transmitting the *Historiae* of Seneca the Elder and how such a discovery can be integrated with prior knowledge about this historiographical work. On the other side, there is a broader view on early-imperial Roman historiography, to which the new perspectives opened by the rediscovery of Seneca the Elder's *Historiae* greatly contribute.

The nEU-Med project: Vetricella, an Early Medieval royal property on Tuscany's Mediterranean Mar 26 2022 The nEU-Med project is part of the Horizon 2020 programme, in the ERC Advanced project category. It began in October 2015 and the University of Siena is the host institution of the project. The project is focussed upon two Tuscan riverine corridors leading from the Gulf of Follonica in the Tyrrhenian Sea to the Colline Metallifere. It aims to document and analyze the form and timeframe of economic growth in this part of the Mediterranean, which took place between the 7th and the 12thc. Central to this is an understanding of the processes of change in human settlements, in the natural and farming landscapes in relation to the exploitation of resources, and in the implementation of differing political strategies. This volume presents the multi-disciplinary research focussed upon the key site of the project, Vetricella, and its territory. Vetricella is thought to be the site of Valli, a royal property in the Tuscan march. It is the only Early Medieval property to be extensively studied in Italy. Located on Italy's Tyrrhenian coast, the archaeology and history of this site provide new insights on estate management, metal production and wider Mediterranean relations in the later first millennium. Apart from reports on the archaeology, the finds from excavations and environmental studies, three essays consider the wider European historical and archaeological context of Vetricella. Future monographs will feature studies by members of the project team on aspects of Vetricella, its finds and territory.
