*Lonely Children and Adolescents* Mar 25 2022 From texting and social networking sites to after-school activities, young people have many opportunities to interact with one another, and yet loneliness and isolation trouble today's youth in increasing numbers. Many children and teens report feeling lonely even in the midst of family and friends, and childhood loneliness is a prime risk factor for adult alienation. *Lonely Children and Adolescents: Self-Perceptions, Social Exclusion, and Hope* illuminates seldom-explored experiences of social isolation among young people as well as the frustrations of the parents and teachers who wish to help. This groundbreaking book conceptualizes loneliness not simply as the absence of social connections, but as a continuum of developmental experience, often growing out of the conflict between opposite needs: to be like one's peers yet be one's unique self. The author draws clear distinctions between loneliness and solitude and identifies genetic and environmental characteristics (i.e., social, psychological, familial, and educational) that can be reinforced to help children become more resilient and less isolated. In addition, therapeutic approaches are described that challenge loneliness by encouraging empowerment, resilience, and hope, from proven strategies to promising tech-based interventions. Highlights include: • Developmental perspectives on loneliness. • Schools and the role of teachers, from preschool to high school. • Peer relations (e.g., cliques, bullies, exclusion, and popularity). • Lonely children, lonely parents: models of coping. • Loneliness in the virtual world. • Prevention and intervention strategies at home, at school, in therapy. Asking its readers to rethink many of their assumptions about social competence and isolation, this volume is essential reading for researchers and professionals in clinical child, school, developmental, and educational psychology; allied education disciplines; social work; and social and personality psychology.

*Case Formulation with Children and Adolescents* Jun 27 2022 Highly practical and accessible, this book shows how to synthesize complex information about child and adolescent mental health problems into clinically useful, dynamic case formulations. Strategies and tools are provided for analyzing the biological, psychological, social, cultural, spiritual, and developmental factors that may be contributing to the difficulties of clients ages 4-18. Numerous case examples illustrate the steps in crafting a comprehensive formulation and using it to plan effective, individualized treatment. Strategies for overcoming frequently encountered pitfalls in case formulation are highlighted throughout.

**Treating ADHD/ADD in Children and Adolescents** Mar 01 2020 *Treating ADHD/ADD in Children and Adolescents: Solutions for Parents and Clinicians* was written for parents, clinicians, and teachers to learn a deeper understanding of ADHD and implement specific, clear, and effective ways to successfully evaluate and treat ADHD problems at home and school. Readers will learn not only research-based and traditional approaches for treating ADHD, but also proven newer and alternative methods. This book provides the tools for readers to feel more informed and competent in addressing the many challenges that children and adolescents with ADHD experience. Whether new or previously exposed to ADHD, readers should find the information to be very useful and effective in transforming ADHD. This book is comprehensive in addressing the complete range of challenges that ADHD presents to children, teens, and families, including accurately diagnosing ADHD and identifying the frequent co-existing conditions, better understandings of the condition, powerful parental behavioral management skills for home and school difficulties, ways to improve family and peer challenges, enhancing homework and learning problems, obtaining appropriate school services and addressing classroom issues, better partnerships with physicians for effective ADHD medication treatments, and utilizing a number of additional and alternative approaches to decrease and treat ADHD. The book has three main aims. The first is to provide a deeper understanding of ADHD. Without accurate perspectives, families may not address the difficulties and challenges appropriately, and treatment approaches may not be as successful or can fail. The second goal is to learn the fundamentals about managing and treating the many ADHD challenges at home and school. The third is for readers to learn a number of additional and alternative approaches to help treat ADHD symptoms and challenges. Some of these proven approaches are newer, while others have a history of effectiveness.

**Case-Smith's Occupational Therapy for Children and Adolescents** Nov 28 2019 The number one book in pediatric OT is back! Focusing on children from infancy to adolescence, *Case-Smith's Occupational Therapy for Children and Adolescents, 8th Edition* provides comprehensive, full-color coverage of pediatric conditions and treatment techniques in all settings. Its emphasis on application of evidence-based practice includes: eight new chapters, a focus on clinical reasoning, updated references, research notes, and explanations of the evidentiary basis for specific interventions. Coverage of new research and theories, new techniques, and current trends, with additional case studies, keeps you in-step with the latest advances in the field. Developmental milestone tables serve as a quick reference throughout the book! Full-color, contemporary design throughout text includes high-quality photos and illustrations. Case-based video clips on the Evolve website demonstrate important concepts and rehabilitation techniques. Research Notes boxes and evidence-based summary tables help you learn to interpret evidence and strengthen clinical decision-making skills. Coverage of OT for children from infancy through adolescence includes the latest research, techniques and trends. Case studies help you apply concepts to actual situations you may encounter in practice. Learning objectives indicate what you will be learning in each chapter and serve as checkpoints when studying for examinations. A glossary makes it easy for you to look up key terms. NEW! Eight completely new chapters cover Theory and Practice Models for Occupational Therapy With Children, Development of Occupations and Skills From Infancy Through Adolescence, Therapeutic Use of Self, Observational Assessment and Activity Analysis, Evaluation Interpretation, and Goal Writing, Documenting Outcomes, Neonatal Intensive Care Unit, and Vision Impairment. NEW! A focus on theory and principles Practice Models promote clinical reasoning. NEW! Emphasis on application of theory and frames of reference in practice appear throughout chapters in book. NEW! Developmental milestone tables serve as quick reference guides. NEW! Online materials included to help facilitate your understanding of what's covered in the text. NEW! Textbook is organized into six sections to fully describe the occupational therapy process and follow OTPF.

**The Development of Children and Adolescents** Jul 29 2022 *The Development of Children and Adolescents*, by Penny Hauser-Cram, J. Kevin Nugent, Kathleen Thies, and John F. Travers, provides an integrated view of child development. Presenting the most pertinent research for each developmental stage and linking this to practical applications in the areas of Parenting, Policy, and Practice, this balanced approach emphasizes the relationship between research and theory and applications. The rich media program, including WileyPLUS with Real Development promotes active learning and allows for increased understanding and comprehension of the course content. Real Development, authored by Nicole Barnes, Ph.D., Montclair State University and Christine Hatchard, Psy.D., Monmouth University, uses authentic video showcasing real families, along with activities and assessments that put students in the place of a professional, to gain an understanding of key concepts. Through the combination of text and media, students are engaged in meaningful learning that deepens and enriches their understanding of developmental concepts. WileyPLUS sold separately from text.

*What Works with Children and Adolescents?* Sep 18 2021 *What Works with Children and Adolescents?* fulfils the need for a concise, empirically-based study of the types of psychological treatments that may be effective for common psychological problems in childhood and adolescence. Providing a solid foundation for evidence-based practice in the treatment of children and adolescents, the book offers evidence from over 150 rigorously conducted research trials. Examining problems which are of central concern to practising clinicians - including child abuse, enuresis and encopresis, ADHD, childhood conduct problems, adolescent violence, drug abuse, anxiety and depression, anorexia and bulimia nervosa, paediatric pain, and post-divorce adjustment problems - it also highlights priority areas for future research on the treatment of children and adolescents' psychological problems. *What Works with Children and Adolescents?* complements *The Handbook of Child and Adolescent Clinical Psychology* (Carr, 2006), and will be valuable to professionals in training.

**Encyclopedia of Children, Adolescents, and the Media** Apr 13 2021 Publisher Description

*Handbook of Evidence-Based Interventions for Children and Adolescents* Jul 17 2021 A step-by-step resource for treating more than 40 prevalent issues with proven strategies This comprehensive handbook for evidence-based mental health and learning interventions with children and adolescents is distinguished by its explicit yet concise guidance on implementation in practice. With a compendium of proven strategies for resolving more than 40 of the most pressing and prevalent issues facing young people, the book provides immediate guidance and uniform step-by-step instructions for resolving issues ranging from psychopathological disorders to academic problems. Busy academics, practitioners, and trainees in schools and outpatient clinical settings will find this resource to be an invaluable desktop reference for facilitating well-informed decision-making. Unlike other volumes that ignore or merely reference the evidence base of various interventions, this book focuses on providing immediate, empirically supported guidance for putting these

strategies into direct practice. Issues covered include crisis interventions and response, social and emotional issues, academic/learning issues, psychopathological disorders, neuropsychological disorders, and the behavioral management of childhood health issues. Each chapter follows a consistent format including a brief description of the problem and associated characteristics, etiology and contributing factors, and three evidence-based, step-by-step sets of instructions for implementation. Additionally, each chapter provides several websites offering further information about the topic. Featuring contributions from leading scholars and practitioners on each issue covered, this book will be a valuable resource for child clinical and school psychologists, counselors, social workers, and therapists as well as other health and mental health professionals whose primary practice is with children and adolescents. Key Features: Demonstrates step-by-step, evidence-based interventions for more than 40 common childhood issues Provides treatment procedures that can be immediately put into practice Covers a wide range of mental health and academic/learning issues for children and adolescents Relevance for both school-based and clinically-based practice Includes contributions by noted experts in the field

**High-Impact Assessment Reports for Children and Adolescents** Jun 03 2020 Assessment provides rich opportunities for understanding the needs of children and adolescents, yet reports are often hard for parents, teachers, and other consumers to comprehend and utilize. This book provides step-by-step guidelines for creating psychoeducational and psychological reports that communicate findings clearly, promote collaboration, and maximize impact. Effective practices for written and oral reporting are presented, including what assessment data to emphasize, how to organize reports and convey test results, and how to craft useful recommendations. In a large-size format for easy photocopying, the book includes sample reports, training exercises, and reproducible templates, rubrics, and forms. Purchasers get access to a Web page where they can download and print the reproducible materials. This book is in The Guilford Practical Intervention in the Schools Series, edited by Sandra M. Chafouleas.

**Emotion Regulation in Children and Adolescents** Aug 25 2019 Emotion regulation difficulties are central to a range of clinical problems, yet many therapies for children and adolescents lack a focus on emotion and related skills. In a flexible modular format, this much-needed book presents cutting-edge strategies for helping children and adolescents understand and manage challenging emotional experiences. Each of the eight treatment modules can be used on its own or in conjunction with other therapies, and includes user-friendly case examples, sample dialogues, and engaging activities and games. Emotion-informed assessment and case conceptualization are also addressed. Reproducible handouts can be downloaded and printed in a convenient 8 1/2" x 11" size.

**Evidence-Based Psychotherapies for Children and Adolescents, Third Edition** Dec 22 2021 "Subject Areas/Keywords: adolescents, behavioral, CBT, childhood, children, cognitive-behavioral therapy, emotional, evidence-based practice, externalizing, families, family-based, internalizing, interventions, problems, programs, psychological disorders, psychotherapies, psychotherapy research, texts, treatment manuals, treatments DESCRIPTION Widely regarded as the standard reference and text on evidence-based therapies--and now substantially revised--this book has introduced tens of thousands of clinicians and students to exemplary treatments for social, emotional, and behavioral problems in children and youth. Concise chapters focus on specific psychotherapy models. The developers of the respective approaches review their conceptual underpinnings, describe how interventions are delivered on a session-by-session basis, and summarize what the research shows about treatment effectiveness. The book explores important questions and challenges facing the field and identifies best practices for treatment dissemination in real-world clinical contexts"--

**Health Promotion for Children and Adolescents** Oct 27 2019 This timely volume surveys the broad spectrum of interventions used in health promotion, and shows how they may be tailored to the developmental needs of children and adolescents. Its multilevel lifespan approach reflects concepts of public health as inclusive, empowering, and aimed at long- and short-term well-being. Coverage grounds readers in theoretical and ecological perspectives, while special sections spotlight key issues in social and behavioral wellness, dietary health, and children and teens in the health care system. And in keeping with best practices in the field, the book emphasizes collaboration with stakeholders, especially with the young clients themselves. Among the topics covered: Child mental health: recent developments with respect to risk, resilience, and interventions Health-related concerns among children and adolescents with ADD/ADHD Preventing risky sexual behavior in adolescents Violence affecting youth: pervasive and preventable Childhood and adolescent obesity Well-being of children in the foster care system Health Promotion for Children and Adolescents is a necessary text for graduate or advanced undergraduate courses in public health, education, medicine, psychology, health education, social work, curriculum, nutrition, and public affairs. It is also important reading for public health professionals; researchers in child health, health education, and child psychology; policymakers in education and public health; and teachers.

**Eating Disorders in Children and Adolescents** Sep 06 2020 Bringing together leading authorities, this comprehensive volume integrates the best current knowledge and treatment approaches for eating disorders in children and adolescents. The book reveals how anorexia nervosa, bulimia nervosa, and other disorders present differently developmentally and explains their potentially far-reaching impact on psychological, physical, and neurobiological development. It provides guidelines for developmentally sound assessment and diagnosis, with attention to assessment challenges unique to this population. Detailed descriptions of evidence-based therapies are illustrated with vivid case examples. Promising directions in prevention are also addressed. A special chapter offers a parent's perspective on family treatment.

**Mental Health and Illness of Children and Adolescents** Nov 01 2022

**Hypertension in Children and Adolescents** Jan 23 2022 This book is devoted to hypertension in children and adolescents, a clinical issue that – thanks to the strides made in several areas of pathophysiological and clinical research – has received growing interest in cardiovascular medicine over the last several years. Given the increasing prevalence of hypertension in children and adolescents, this book represents an important and useful tool to address what has become a significant public health issue. It covers a diverse range of topics, from advances in the definition of hypertension and the identification of new risk factors, to current treatment strategies. The book also presents an overview of the latest findings, including the clinical significance of isolated systolic hypertension (ISH) in youth, the importance of out-of-office and central blood pressure measurement, new methods for assessing vascular phenotypes, and clustering of CV risk factors. Gathering contributions by international experts and pursuing a practice-oriented approach, the book offers a valuable tool for cardiologists, pediatricians and nephrologists, as well as general practitioners.

**Counseling Children and Adolescents** Aug 18 2021 Counseling Children and Adolescents focuses on relationship building and creating a deep level of understanding of developmental, attachment, and brain-based information. Chapters place a clear emphasis on building strengths and developing empathy, awareness, and skills. By going beyond theory, and offering a strengths-based, attachment, neuro- and trauma-informed perspective, this text offers real-world situations and tried and true techniques for working with children and adolescents. Grounded in research and multicultural competency, the book focuses on encouragement, recognizing resiliency, and empowerment. This book is an ideal guide for counselors looking for developmentally appropriate strategies to empower children and adolescents.

**Children, Adolescents, and the Media** Sep 26 2019 Taking an approach grounded in the media effects tradition, this book provides a comprehensive, research-oriented treatment of how children and adolescents interact with the media. Chapters review the latest findings as well as seminal studies that have helped frame the issues in such areas as advertising, violence, video games, sexuality, drugs, body image and eating disorders, music, and the Internet. Each chapter is liberally sprinkled with illustrations, examples from the media, policy debates, and real-life instances of media impact.

**Children, Adolescents, and the Media** Nov 20 2021 Children, Adolescents, and the Media, Third Edition provides a comprehensive, research-oriented overview of how the media impact the lives of children and adolescents in modern society. The approach is grounded in a developmental perspective, focusing on how young people of different ages and levels of cognitive, emotional, and social development interact with the media. Incorporating the most up-to-date research available, Authors Victor C. Strasburger, Barbara J. Wilson, and Amy B. Jordan target areas most controversial and at the heart of debates about the media and public health—equipping students to approach the media as critical consumers.

**Functional Somatic Symptoms in Children and Adolescents** Jun 15 2021 This open access book sets out the stress-system model for functional somatic symptoms in children and adolescents. The book begins by exploring the initial encounter between the paediatrician, child, and family, moves through the assessment process, including the formulation and the treatment contract, and then describes the various forms of treatment that are designed to settle the child's dysregulated stress system. This approach both provides a new understanding of how such symptoms emerge -- typically, through a history of recurrent or chronic stress, either physical or psychological -- and points the way to effective assessment, management, and treatment that put the child (and family) back on the road to health and well-being.

**Psychiatric Interview of Children and Adolescents** Apr 25 2022 Eliciting useful information from young patients and their families is both a skill and an art, and Psychiatric Interview of Children and Adolescents, an exceptionally practical and comprehensive guide, enables mental health clinicians and trainees to first improve their interviewing skills and then organize and integrate the information derived from the interview to construct an effective treatment program. This book, building on the success of its predecessor, Clinical Manual of Psychiatric Interview of Children and Adolescents, offers updated and revised material, as well as expanded coverage that includes new findings and addresses emerging issues in the field. For example, a new chapter focusing on the psychiatric evaluation of preschoolers and very young children has been added, and the section on bullying in the chapter on abuse has been expanded to include cyber bullying. Clinical vignettes illustrate important concepts and techniques, providing a real-world component that readers will find both fascinating and instructive, and the key points at the end of each chapter and numerous quick-reference tables facilitate consolidation of learning. Easy to read, yet rigorous in its clinical focus, Psychiatric Interview of Children and Adolescents provides a solid foundation and expert guidance for clinicians evaluating and treating this critically important population.

**Play Therapy with Children and Adolescents in Crisis, Fourth Edition** May 03 2020 "This book aims to provide professionals and clinicians-in-training with the latest forms of treatment for children and adolescents who have been impacted by crises and trauma. The various treatment options presented here include approaches that focus on the individual as well as many that include a parent in conjoint or filial therapy, and others that employ a family treatment model. Many chapters in this book demonstrate the use of a variety of creative methods with young people who have suffered traumatic experiences such as sexual abuse, bullying, immigration, natural disasters, and witnessing violence"--

**OCD in Children and Adolescents** Oct 08 2020 This book has been replaced by Treating OCD in Children and Adolescents: A Cognitive-Behavioral Approach, ISBN 978-1-4625-3803-4.

**OCD in Children and Adolescents** Aug 30 2022 In a large-size format for easy photocopying, this user-friendly manual presents a tested treatment protocol for children and adolescents (ages 6 to 18) struggling with obsessive-compulsive disorder (OCD). Ten flexible modules give clinicians tools for engaging kids and their parents and implementing successful exposure and response prevention activities, as well as other cognitive-behavioral therapy (CBT) strategies. Each module includes vivid clinical vignettes, sample scripts, “tips and tricks” drawn from the authors’ extensive experience, and numerous reproducible child and parent handouts and worksheets. Purchasers get access to a Web page where they can download and print additional copies of the reproducible materials, in color.

**Infants, Children, and Adolescents** Feb 21 2022 NOTE: You are purchasing a standalone product; MyDevelopmentLab does not come packaged with this content. If you would like to purchase both the physical text and MyDevelopmentLab, search for ISBN-10:

0134130146 / ISBN-13: 9780134130149. That package includes ISBN-10: 0133936732 / ISBN-13: 9780133936735 and ISBN-10: 0205909744 / ISBN-13: 9780205909742. MyDevelopmentLab should only be purchased when required by an instructor. For courses in Child Development Visit the Preview Website to see sample chapters, get information on the supplements (including sample videos and on-line simulations), and much more. Click here. A best-selling, chronologically organized child development text, Berk and Meyers' *Infants, Children, and Adolescents* is relied on in classrooms worldwide for its clear, engaging writing style, exceptional multicultural and cross-cultural focus, rich examples, and long-standing commitment to presenting the most up-to-date scholarship while also offering students research-based, practical applications that they can relate to their personal and professional lives. The authors takes an integrated approach to presenting development in the physical, cognitive, emotional, and social domains; emphasize the complex interchanges between heredity and environment; and provide exceptional attention to culture. Renowned professor, researcher, and author Laura Berk is joined by new coauthor Adena Meyers. As faculty colleagues in the Department of Psychology at Illinois State University, they have collaborated on numerous projects, and their distinct areas of specialization and tremendous expertise make them a great team for coauthoring this new edition. Together, they present the latest theories and findings in the field to students in a manageable and relevant way. Berk and Meyers' signature story-like, conversational style invites students to actively learn beside the text's "characters," who experience real issues in development, including physical, cognitive, and peer challenges, as well as parenting and educational concerns. Berk and Meyers also help students connect their learning to their personal and professional areas of interest, speaking directly about issues students will face in their future pursuits as parents, educators, health care providers, social workers, and researchers. As members of a global and diverse human community, students are called on to intelligently approach the responsibility of understanding and responding to the needs and concerns of children. While carefully considering the complexities of child development, the authors present classic and emerging theories in an especially clear, engaging writing style, with a multitude of research-based, real-world, cross-cultural, and multicultural examples. Strengthening the connections among developmental domains and of theory and research with applications, this edition's extensive revision brings forth the most recent scholarship, representing the changing field of child development. This book is also available in an abridged paperback version, *Infants and Children: Prenatal Through Middle Childhood*, comprising the complete Chapters 1--13. *Infants, Children, and Adolescents, Eighth Edition* is also available via REVEL(tm), an immersive learning experience designed for the way today's students read, think, and learn. Learn more.

**Schema Therapy with Children and Adolescents** May 27 2022 This book presents the first English language guide to adapting schema therapy (ST) for children and adolescents. Written by the developers of the approach, it presents a wide range of innovative child- and parent-specific techniques, with detailed guidance on how to apply them across five key developmental stages from infancy to young adulthood. With detailed guidance on how to enact age-appropriate schema dialogues and imaginative use of play to reinforce or replace imagery rescripting, Schema Therapy for Children and Adolescents allows therapists to help young people put difficult events behind them and choose new, healthier ways forward.

Prescriber's Guide – Children and Adolescents Dec 30 2019 Presents a user-friendly step-by-step manual on the psychotropic drugs prescribed for children and adolescents by clinicians and nurse practitioners.

Media and the Well-being of Children and Adolescents Mar 13 2021 The volume is divided into four parts. Part One provides up-to-date trends on children and adolescents' access to media in the home, as well as the time they spend with television, computers, and the Internet. Part Two presents research that highlights the potentially negative impact of age-inappropriate or excess media use on children's physical, cognitive, social, and emotional well-being. Part Three offers examples of how media enhance children's education, health, and social connections. Part Four explores implications for the creation of high-quality, enriching content that speaks to the needs and interests of young people today.

*The Handbook of Jungian Play Therapy with Children and Adolescents* Jan 11 2021 Child and family psychotherapist Eric J. Green draws on years of clinical experience to explain his original model of Jungian play therapy. The empathic techniques he illuminates in this book can effectively treat children who are traumatized by abuse, natural disasters, and other losses, as well as children who have attention deficit and autism spectrum disorders.

Separation Anxiety in Children and Adolescents Dec 10 2020 This volume presents a unique, research-based approach to treating the prevalent, distressing, yet highly treatable problem of separation anxiety. The authors provide step-by-step guidelines for planning and implementing the entire process of therapy with children, adolescents, and their families--from intake and assessment through coping skills training, cognitive-behavioral interventions, and relapse prevention. Comprehensive case examples illustrate the complexities of building strong relationships with families under stress and effectively intervening with 3- to 17-year-olds across multiple situations (day and night) and settings (home, extracurricular, school, and camp). The book is written for maximum accessibility for clinicians from any background, even those with limited cognitive-behavioral therapy experience.

**Anxiety and Depression in Children and Adolescents** Jun 23 2019 Although generally considered adult disorders, anxiety and depression are widespread among children and adolescents, affecting academic performance, social development, and long-term outcomes. They are also difficult to treat and, especially when they occur in tandem, tend to fly under the diagnostic radar. *Anxiety and Depression in Children and Adolescents* offers a developmental psychology perspective for understanding and treating these complex disorders as they manifest in young people. Adding the school environment to well-known developmental contexts such as biology, genetics, social structures, and family, this significant volume provides a rich foundation for study and practice by analyzing the progression of pathology and the critical role of emotion regulation in anxiety disorders, depressive disorders, and in combination. Accurate diagnostic techniques, appropriate intervention methods, and empirically sound prevention strategies are given accessible, clinically relevant coverage. Illustrative case examples and an appendix of forms and checklists help make the book especially useful. Featured in the text: Developmental psychopathology of anxiety, anxiety disorders, depression, and mood disorders. Differential diagnosis of the anxiety and depressive disorders. Assessment measures for specific conditions. Age-appropriate interventions for anxiety and depression, including CBT and pharmacotherapy. Multitier school-based intervention and community programs. Building resilience through prevention. *Anxiety and Depression in Children and Adolescents* is an essential reference for practitioners, researchers, and graduate students in school and clinical child psychology, mental health and school counseling, family therapy, psychiatry, social work, and education.

**Children and Adolescents in Times of Crises in Europe** Sep 30 2022 This book presents an analysis of the impact of the social crisis on the well-being of children and adolescents in Europe. Focusing on the fields of health, employment and social status, this book highlights that the impact of crisis has to be viewed in light of the state policies in reaction to crisis. Chapters in the book offer new perspectives of a reflexive crisis research objectifying crisis and analyzing what is referred to as crisis by whom, how, for what purposes and with which implicit or explicit solutions. This book offers empirical evidence and unique analytical approaches in the field of a child- and adolescent-oriented crisis research.

**Occupational Therapy for Children and Adolescents** Oct 20 2021 Provides comprehensive, full-color coverage of pediatric conditions and treatment techniques in all settings while its emphasis on evidence-based practice includes updated references, research notes and explanations of the evidentiary basis for specific interventions.

**CBT Strategies for Anxious and Depressed Children and Adolescents** Aug 06 2020 In a large-size format for easy photocopying, this book provides 167 engaging full-color reproducible tools for use in cognitive-behavioral therapy (CBT) with 7- to 18-year-olds. Beautifully designed handouts and worksheets are presented for each phase of treating anxiety and depression, organized in a state-of-the-art modular framework that encourages therapeutic flexibility. Introductions to each module offer vital clinical pointers and describe when and how to use the various forms, illustrated with vivid case examples. The authors provide tips for sequencing treatment, troubleshooting common difficulties, and addressing developmental and cultural considerations. Purchasers get access to a Web page where they can download and print the reproducible handouts and worksheets. ÿ

**Resilience in Children, Adolescents, and Adults** Nov 08 2020 *Resilience in Children, Adolescents, and Adults: Translating Research into Practice* recognizes the growing need to strengthen the links between theory, assessment, interventions, and outcomes to give resilience a stronger empirical base, resulting in more effective interventions and strength-enhancing practice. This comprehensive volume clarifies core constructs of resilience and links these definitions to effective assessment. Leading researchers and clinicians examine effective scales, questionnaires, and other evaluative tools as well as instructive studies on cultural considerations in resilience, resilience in the context of disaster, and age-appropriate interventions. Key coverage addresses diverse approaches and applications in multiple areas across the lifespan. Among the subject areas covered are: - Perceived self-efficacy and its relationship to resilience. - Resilience and mental health promotion in the schools. - Resilience in childhood disorders. - Critical resources for recovering from stress. - Diversity, ecological, and lifespan issues in resilience. - Exploring resilience through the lens of core self-evaluation. *Resilience in Children, Adolescents, and Adults* is an important resource for researchers, clinicians and allied professionals, and graduate students in such fields as clinical child, school, and developmental psychology, child and adolescent psychiatry, education, counseling psychology, social work, and pediatrics.

*Treating Trauma and Traumatic Grief in Children and Adolescents, Second Edition* Apr 01 2020 This authoritative guide has introduced many tens of thousands of clinicians to Trauma-Focused Cognitive-Behavioral Therapy (TF-CBT), a leading evidence-based treatment for traumatized children and their parents or caregivers. Preeminent clinical researchers provide a comprehensive framework for assessing posttraumatic stress disorder (PTSD), other trauma-related symptoms, and traumatic grief in 3- to 18-year-olds; building core coping skills; and directly addressing and making meaning of children's trauma experiences. Implementation is facilitated by sample scripts, case examples, troubleshooting tips, and reproducible client handouts. Purchasers get access to a Web page where they can download and print the reproducible materials in a convenient 8 1/2" x 11" size. TF-CBT is listed in SAMHSA's National Registry of Evidence-Based Programs and Practices. New to This Edition \*Incorporates a decade's worth of advances in TF-CBT research and clinical practice. \*Updated for DSM-5. \*Chapter on the model's growing evidence base. \*Chapter on group applications. \*Expanded coverage of complex trauma, including ways to adapt TF-CBT for children with severe behavioral or affective dysregulation. See also the edited volume *Trauma-Focused CBT for Children and Adolescents: Treatment Applications* for more information on tailoring TF-CBT to children's varying developmental levels and cultural backgrounds.

**The Routledge International Handbook of Children, Adolescents, and Media** Jan 29 2020 This second, thoroughly updated edition of *The Routledge International Handbook of Children, Adolescents, and Media* analyzes a broad range of complementary areas of study, including children as media consumers, children as active participants in media making, and representations of children in the media. The roles that media play in the lives of children and adolescents, as well as their potential implications for their cognitive, emotional, social, and behavioral development, have attracted growing research attention in a variety of disciplines. This handbook presents a collection that spans a variety of disciplines including developmental psychology, media studies, public health, education, feminist studies, and the sociology of childhood. Chapters provide a unique intellectual mapping of current knowledge, exploring the relationship of children and media in local, national, and global contexts. Divided into five parts, each with an introduction explaining the themes and topics covered, the handbook features over fifty contributions from leading and upcoming academics from around the globe. The revised and new chapters consider vital questions by analyzing texts, audience, and institutions, including: media and its effects on children's mental health; children and the internet of toys; media and digital inequalities; news and citizenship in the aftermath of COVID-19 The Handbook's interdisciplinary approach and comprehensive, current, and international scope

make it an authoritative, state of the art guide to the nascent field of Children's Media Studies. It will be indispensable for media scholars and professionals, policy makers, educators, and parents.

**Treating Somatic Symptoms in Children and Adolescents** Feb 09 2021 Persistent physical symptoms that may not be associated with a known medical disease can be perplexing and distressing for children and families. This book gives mental health professionals a complete understanding of somatic symptoms in 6- to 18-year-olds and presents an innovative treatment approach grounded in cognitive-behavioral therapy (CBT). Numerous case examples and sample dialogues illustrate how to collaborate with health care and school professionals and conduct effective assessment, psychoeducation, and intervention, within a biopsychosocial framework. User-friendly features include 36 reproducible handouts, worksheets, and templates. Purchasers get access to a companion website where they can download and print the reproducible materials in a convenient 8 1/2" x 11" size. ÿ

**Palliative Care for Infants, Children, and Adolescents** May 15 2021 There are few things requiring more expertise, delicacy, and compassion than caring for an infant, child, or young adult with a life-limiting condition. This guide provides professionals involved in pediatric palliative and end-of-life care with comprehensive information.

**Anxiety Disorders in Children and Adolescents** Jul 25 2019 Anxiety disorders are among the most prevalent mental health problems in childhood and adolescence. This fully revised new edition is an authoritative guide to the understanding and assessment of anxiety disorders in the young. The first section covers historical and conceptual issues, including cognitive and developmental processes, clinical and theoretical models, phenomenology and classification, and evidence-based assessment. Subsequent sections cover the biology of child and adolescent anxiety, and environmental influences including traumatic events, parenting and the impact of the peer group. The final section addresses prevention and treatment of anxiety. All chapters incorporate new advances in the field, explicitly differentiate between children and adolescents, and incorporate a developmental perspective. Written and edited by an international team of leading experts in the field, this is a key text for researchers, practitioners, students and clinical trainees with interests in child and adolescent anxiety.

**CBT for Children and Adolescents with High-Functioning Autism Spectrum Disorders** Jul 05 2020 This book helps clinicians harness the benefits of cognitive-behavioral therapy (CBT) for children and adolescents with high-functioning autism spectrum disorders (ASD). Leading treatment developers describe promising approaches for treating common challenges faced by young people with ASD--anxiety and behavior problems, social competence issues, and adolescent concerns around sexuality and intimacy. Chapters present session-by-session overviews of each intervention program, review its evidence base, and address practical considerations in treatment. The book also discusses general issues in adapting CBT for this population and provides a helpful framework for assessment and case conceptualization informed by DSM-5.
