Stoicorum Veterum Fragmenta Volume 3 [Jun 28 2022](#) Stoicorum Veterum Fragmenta is a collection of fragments and testimonial of the earlier Stoics composed by Hans von Arnim.

[In Search of Subjectivities](#) [Jul 18 2021](#) While traditionally identified as a practice-based endeavour, the many dimensions of teacher education raise important philosophical issues that emphasise the centrality of ethics to questions of relationality and professional practice. This second volume of the Educational Philosophy and Theory reader series demonstrates the continuing relevance of philosophical approaches to the field of teacher education. The collection of texts focuses on a wide range of topics, including teacher education in a cross-cultural context, the notion of unsuccessful teaching, democratic teacher education, the reflective teacher, the ethics and politics of teacher identity, and subjectivity and performance in teaching. Chapters also explore teacher education based on experiential learning as 'experience', demonstrating the continuing relevance of philosophical approaches to the field. In Search of Subjectivities will interest academics, researchers and postgraduate students in the fields of philosophy of education, philosophy, education, educational theory, teacher education, experiential philosophy, ethics, policy and politics of education, and professional practice.

[Volume 16, Tome II: Kierkegaard's Literary Figures and Motifs](#) [Sep 19 2021](#) While Kierkegaard is perhaps known best as a religious thinker and philosopher, there is an unmistakable literary element in his writings. He often explains complex concepts and ideas by using literary figures and motifs that he could assume his readers would have some familiarity with. This dimension of his thought has served to make his writings far more popular than those of other philosophers and theologians, but at the same time it has made their interpretation more complex. Kierkegaard readers are generally aware of his interest in figures such as Faust or the Wandering Jew, but they rarely have a full appreciation of the vast extent of his use of characters from different literary periods and traditions. The present volume is dedicated to the treatment of the variety of literary figures and motifs used by Kierkegaard. The volume is arranged alphabetically by name, with Tome II covering figures and motifs from Gulliver to Zerlina.

[The Flow and Force Characteristics of Supersonic Airfoils at High Subsonic Speeds](#) [Jun 04 2020](#) An investigation has been conducted at subsonic Mach numbers in the Langley rectangular high-speed tunnel on five supersonic airfoils and, for comparison, on two subsonic airfoils. Two-dimensional data were obtained by pressure measurements and schlieren photographs at angles of attack from 0 degrees to 4 degrees for Mach numbers between 0.30 and 0.90 for these 6-percent-thick symmetrical airfoils.

[Space, Imagination and the Cosmos from Antiquity to the Early Modern Period](#) [Aug 19 2021](#) This volume provides a much needed, historically accurate narrative of the development of theories of space up to the beginning of the eighteenth century. It studies conceptions of space that were implicitly or explicitly entailed by ancient, medieval and early modern representations of the cosmos. The authors reassess Alexandre Koyré's groundbreaking work from The Closed World to the Infinite Universe (1957) and they trace the permanence of arguments to be found throughout the Middle Ages and beyond. By adopting a long timescale, this book sheds new light on the continuity between various cosmological representations and their impact on the ontology and epistemology of space. Readers may explore the work of a variety of authors including Aristotle, Epicurus, Henry of Ghent, John Duns Scotus, John Wyclif, Peter Auriol, Nicholas Bonet, Francisco Suárez, Francesco Patrizi, Giordano Bruno, Libert Froidmont, Marin Mersenne, Pierre Gassendi, Gottfried Wilhelm Leibniz and Samuel Clarke. We see how reflections on space, imagination and the cosmos were the product of a plurality of philosophical traditions that found themselves confronted with, and enriched by, various scientific and theological challenges which induced multiple conceptual adaptations and innovations. This volume is a useful resource for historians of philosophy, those with an interest in the history of science, and particularly those seeking to understand the historical background of the philosophy of space.

[Science and Civilisation in China: Volume 3, Mathematics and the Sciences of the Heavens and the Earth](#) [Mar 26 2022](#) After two volumes mainly introductory, Dr Needham now embarks upon his systematic study of the development of the natural sciences in China. The Sciences of the Earth follow: geography and cartography, geology, seismology and mineralogy. Dr Needham distinguishes parallel traditions of scientific cartography and religious cosmography in East and West, discussing orbocentric wheel-maps, the origins of the rectangular grid system, sailing charts and relief maps, Chinese survey methods, and the impact of Renaissance cartography on the East. Finally, and here Dr Needham's work has no Western predecessors-there are full accounts of the Chinese contribution to geology and mineralogy.

aitalena, a Pio V fu dato successore Ugo Buoncompagni bolognese, che volle chiamarsi Gregorio XIII. Arrendevole e clemente fin a scapito della giustizia, le inclinazioni sue mondane dovette reprimere a fronte della riforma morale, e a fatica poté favorire un proprio figliuolo, niente i nipoti; esatto del resto ai doveri di capo dei fedeli, ad elevare alla mitra i migliori, a diffondere l'istruzione. Secondo i decreti tridentini stabilì una Congregazione della visita, che sopravvedesse a quella di tutte le diocesi, e mandava visitatori apostolici che si facevano rendere i conti delle chiese, de' luoghi pii, delle fraternite, per quanto eccitassero scontentenze. Prescrisse che ogni cattedrale avesse un teologo (1573). Spendendo quanto Leon X, per riparare ai guasti cagionati da questo fondo e doto ben ventitré collegi, tra cui quello di tutte le nazioni, alla apertura del quale si pronunziarono discorsi in venticinque favelle: rifondo il Germanico, palestra di futuri atleti; uno pei Greci, che vi erano allevati al modo e col linguaggio e il rito patrio: uno Ungarico, uno Illirico a Loreto, uno pei Maroniti, uno per g'Inglese; rifabbricò il Collegio romano, istituti quello de' Neofiti, poi ne semino per tutta Germania e Francia, e fin tre nel Giappone. Spese due milioni di scudi in fare studiare giovani poveri, e un milione in dotare zitelle. A suggerimento di lui, il cardinale Ferdinando Medici aprì stamperia di cinquanta lingue orientali, spedì in Etiopia, ad Alessandria, in Antiochia eruditi viaggiatori, massime Giambattista e Girolamo Vecchietti fiorentini, che ne recarono codici. Gregorio teneva una lista di quante persone fossero accorse al vescovado in tutta la cristianità; e così trovavasi informato all'occorrenza. Deputò il vescovo di Como agli Svizzeri per mantenerli in fede, e impedire s'unissero col Protestanti: e il vescovo di Cremona Bonomo ad emendarli il clero, nel che trovò grandi contrasti. Giovanni Delfino il 6 e 26 luglio 1572 scriveva al cardinal di Como Tolomeo Gallo, che a Vienna i diecimila italiani erano pervertiti da apostati, venienti dalla Savoia e dal Veneto: ma per ordine dell'imperatore dovettero partire. Il decantato tipografo Frobenio, venuto a Roma, si finse cattolico, tanto che il papa l'accoglie con grandi cortesie, ed esortavalo a rimanerle; partendo, ebbe raccomandazioni da prelati, e istituti una tipografia cattolica a Friburgo; speculazione, come fu poi lo stampar tante opere in senso contrario a Basilea: dove il papa diede opera non si pubblicasse il Talmud. Gregorio immortalò il suo pontificato colla riforma del calendario. Giulio Cesare l'avea corretto, fissando l'equinozio di primavera ai 25 marzo, e l'anno di trecentessantacinque giorni e sei ore: lo che è 11? 42? più del vero: laonde in centventinove anni l'equinozio si anticipava d'un giorno. La Chiesa dovette prendersene cura, atteso che la pasqua cade nel plenilunio succedente all'equinozio di primavera. Il concilio Niceno del 325 già s'accorgeva che questo anticipavasi al 23 marzo, ma non si seppe indovinarne la ragione. Nel 1257 la precessione era di undici giorni; e fin d'allora si parlò d'una riforma, spesso tentata, non mai riuscita. La famosa Dieta d'Augusta non volle confessare tale anticipazione dell'equinozio, denunziandola per un lacciuolo della politica romana. Come in tutti i Concilj, così nel Tridentino se ne discorse; poi a tal uopo Gregorio XIII convocò a Roma i personaggi meglio versati, e singolarmente il perugino Ignazio Danti domenicano e il gesuita Clavio di Bamberg, ma la formula vera fu rinvenuta da Luigi Lilio medico calabrese, e compiuta da suo fratello Antonio. [Canonical Morphology and Syntax](#) [Jul 26 2019](#) This is the first book to present Canonical Typology, a framework for comparing constructions and categories across languages. The canonical method takes the criteria used to define particular categories or phenomena (eg negation, finiteness, possession) to create a multidimensional space in which language-specific instances can be placed. In this way, the issue of fit becomes a matter of greater or lesser proximity to a canonical ideal. Drawing on the expertise of world class scholars in the field, the book addresses the issue of cross-linguistic comparability, illustrates the range of areas - from morphosyntactic features to reported speech - to which linguists are currently applying this methodology, and explores to what degree the approach succeeds in discovering the elusive canon of linguistic phenomena.

[Volume 19, Tome V: Kierkegaard Bibliography](#) [Nov 09 2020](#) The long tradition of Kierkegaard studies has made it impossible for individual scholars to have a complete overview of the vast field of Kierkegaard research. The large and ever increasing number of publications on Kierkegaard in the languages of the world can be simply bewildering even for experienced scholars. The present work constitutes a systematic bibliography which aims to help students and researchers navigate the seemingly endless mass of publications. The volume is divided into two large sections. Part I, which covers Tomes I-V, is dedicated to individual bibliographies organized according to specific language. This includes extensive bibliographies of works on Kierkegaard in some 41 different languages. Part II, which covers Tomes VI-VII, is dedicated to shorter, individual bibliographies organized according to specific figures who are in some way relevant for Kierkegaard. The goal has been to create the most exhaustive bibliography of Kierkegaard literature possible, and thus the bibliography is not limited to any specific time period but instead spans the entire history of Kierkegaard studies.

History of Italian Philosophy Oct 01 2022 This book is a treasure house of Italian philosophy. Narrating and explaining the history of Italian philosophers from the Middle Ages to the twentieth century, the author identifies the specificity, peculiarity, originality, and novelty of Italian philosophical thought in the men and women of the Renaissance. The vast intellectual output of the Renaissance can be traced back to a single philosophical stream beginning in Florence and fed by numerous converging human factors. This work offers historians and philosophers a vast survey and penetrating analysis of an intellectual tradition which has heretofore remained virtually unknown to the Anglophonic world of scholarship.

Place and Displacement in the Narrative Worlds of Jorge Luis Borges and Julio Cortázar

Oct 21 2021 Place and Displacement in the Narrative Worlds of Jorge Luis Borges

and Julio Cortázar engages the notions of place and displacement as heuristic devices for literary analysis of Borges's and Cortázar's narratives. It maps out these authors' visions of place and displacement in some of their most famous texts; locates the 'place' of Borges's texts within Cortázar's fictional universe; and delineates new routes in communication between different literary traditions, and philosophical and anthropological discourses. This book also suggests that the challenge of a strict opposition between place and displacement in Borges's and Cortázar's works is both representative and emblematic of a continuum of Latin American literature.

Arcana Coelestia: Volume 3 (Annotated Edition) Jul 30 2022 This is an exposition of the internal or spiritual sense of the books of Genesis and Exodus, according to

the law of correspondences. It unfolds the spiritual significance of the creation; of the stories of Adam and Eve, and of the deluge; of the lives of the patriarchs; of the captivity of the chosen people in Egypt and of their deliverance therefrom, and of their subsequent history; of the ritual of the Jewish religion, its sacrifices and observances;—and in general, traces the foreshadowing through both books of the incarnation and glorification of the Lord Jesus Christ. Many passages from other parts of the Word are also fully explained. Relations of things heard and seen in the spiritual world are interspersed, explaining the process of dying, and of man's resuscitation and conscious entrance into the interior life; the nature of the soul; of heaven and heavenly joy; and of hell, its nature and its miseries. It also treats of the Grand Man, or the whole angelic heaven, and the correspondence of the societies therein with the different organs and senses of the body; the origin and correspondence of diseases; the spirits and inhabitants of the various planets, and of other earths in the starry heavens. All of which are related to a true understanding of the Divine Word. This is book #3 out of 12 and covers Genesis 18 - 22

Utopian Thought in the Western World Dec 11 2020 This masterly study has a grand sweep. It ranges over centuries, with a long look backward over several millennia. Yet

the history it unfolds is primarily the story of individuals: thinkers and dreamers who envisaged an ideal social order and described it persuasively, leaving a mark on their own and later times. The roster of utopians includes men of all stripes in different countries and eras—figures as disparate as More and Fourier, the Marquis de Sade and Edward Bellamy, Rousseau and Marx. Fascinating character studies of the major figures are among the delights of the book. Utopian writings run the gamut from fictional narratives to theoretical treatises, from political manifestos to constitutions for a new society. The Manuels have structured five centuries of utopian invention by identifying successive constellations, groups of thinkers joined by common social and moral concerns. Within this framework they analyze individual writings, in the context of the author's life and of the socio-economic, religious, and political exigencies of his time. Concentrating on innovative works, they highlight disjunctures as well as continuities in utopian thought from the Renaissance through the twentieth century. Witty and erudite, challenging in its interpretations and provocative in the questions it poses, the Manuels' anatomy of utopia is an adventure in ideas.

Onora il tuo nome - Volume 3 May 28 2022 "Onora il tuo nome", e così che si intitola o è stata nominata la raccolta del visual artista partenopeo Mario Chiauzzi,

importante personalità creativa che nuota come un pesce libero e disinvolto nel mare dell'arte contemporanea d'oggi, un mare angusto e colmo di trappole che

sapientemente vengono schivate e raggirate da un'artista dall'armatura culturale lucente. La grafia segnica di Mario Chiauzzi è un inno alla libera espressività

attraverso l'uso consapevole dell'arte grafica digitale. Come egli stesso rivela: "Onora il tuo nome" è un'opera dai molteplici significati - raccolta in più volumi

praticamente identici, tranne l'ultimo, il settimo. Ciascun volume contiene 62 immagini che, ciclicamente si ripetono, per 5 volte consecutive, seguendo sempre lo

stesso andamento, lo stesso ordine consecutivo con una minima differenza, tra una composizione e l'altra, cromatica o di volume. Simile alle lancette di un orologio,

ruotano sempre nello stesso verso, regolarmente avanzano, cambiando solo tonalità e forma. In qualche modo, simboleggiano il tempo, la quotidiana spersonalizzazione

dell'individuo, la sequela noiosa e ripetitiva dei giorni di una civiltà consumistica e illusoria, la vita che apparentemente avanza, ma in realtà retrocede, si ripete.

Le immagini, che amo definire la variazione dell'uguale che avanza ma non è mai dissimile dalla diversità di messaggio e nominazione stilistica, diventano qualcosa di

diverso, di autenticamente curioso, qualcosa che pone lo spettatore di fronte al quesito intimistico di avanzamento dello sguardo o ritrosia del senso dell'immagine

proposta. Un ambiguità voluta che sfocia in alcune immagini proposte, che fungono da collante, da "intermezzo" tra una successione e l'altra, che rappresentano la

voglia, il desiderio di cambiare, di essere altro, di allontanarsi dalla solita routine che tutto avvolge e governa in un'infinita e rumorosa confusione: una routine

piena di doppiezza e di viltà, di ciarle e di pleonastiche vanità, come egli stesso sottolinea. Una scelta obbligata, per rimarcare l'omologazione in atto, in ogni

campo, dove tutto diventa normale, riproducibile: dove tutto diviene tranquillamente sostituibile, a scapito dell'unicità.
