2019 In September 2015, the Sustainable Development Goals (SDGs) were adopted at the United Nations Development Summit to serve as a 15-year plan of action for all countries and people. The SDGs include 17 specific goals, and 169 associated targets that set out quantitative objectives across the social, economic, and environmental dimensions of sustainable development, all to be achieved by 2030. Health has been recognized as crucial for sustainable human development and an essential contributor to the economic growth of society. Beyond the goal to "ensure healthy lives and promoting well-being for all at all ages," many of the other SDGs include targets that are essential to address the environmental and social determinants of health. Considering this context, the Forum on Public-Private Partnerships for Global Health and Safety convened a workshop series to examine potential opportunities to engage the private sector and develop partnerships to advance health and the SDGs. This publication summarizes the presentations and discussions from the workshop series.

**WHO Guidelines on Drawing Blood** Nov 01 2022 Phlebotomy uses large, hollow needles to remove blood specimens for lab testing or blood donation. Each step in the process carries risks - both for patients and health workers. Patients may be bruised. Health workers may receive needle-stick injuries. Both can become infected with bloodborne organisms such as hepatitis B, HIV, syphilis or malaria. Moreover, each step affects the quality of the specimen and the diagnosis. A contaminated specimen will produce a misdiagnosis. Clerical errors can prove fatal. The new WHO guidelines provide recommended steps for safe phlebotomy and reiterate accepted principles for drawing, collecting blood and transporting blood to laboratories/blood banks.
