*The New Despotism* Oct 08 2020 A disturbing in-depth exposé of the antidemocratic practices of despotic governments now sweeping the world. One day they'll be like us. That was once the West's complacent and self-regarding assumption about countries emerging from poverty, imperial rule, or communism. But many have hardened into something very different from liberal democracy: what the eminent political thinker John Keane describes as a new form of despotism. And one day, he warns, we may be more like them. Drawing on extensive travels, interviews, and a lifetime of thinking about democracy and its enemies, Keane shows how governments from Russia and China through Central Asia to the Middle East and Europe have mastered a formidable combination of political tools that threaten the established ideals and practices of power-sharing democracy. They mobilize the rhetoric of democracy and win public support for workable forms of government based on patronage, dark money, steady economic growth, sophisticated media controls, strangled judiciaries, dragnet surveillance, and selective violence against their opponents. Casting doubt on such fashionable terms as dictatorship, autocracy, fascism, and authoritarianism, Keane makes a case for retrieving and refurbishing the old term "despotism" to make sense of how these regimes function and endure. He shows how they cooperate regionally and globally and draw strength from each other's resources while breeding global anxieties and threatening the values and institutions of democracy. Like Montesquieu in the eighteenth century, Keane stresses the willing complicity of comfortable citizens in all these trends. And, like Montesquieu, he worries that the practices of despotism are closer to home than we care to admit.

*Born to Buy* Sep 30 2022 Examines advertising strategies that promote consumerism from the earliest ages, offering advice to parents and teachers on how to reverse the damaging effects of commercialism on developing children.

*The New York Times Book of the Dead* Jun 27 2022 The obituary page of *The New York Times* is a celebration of extraordinary lives. This groundbreaking package includes 300 obits in the book with exclusive online access to 10,000 more of the most important and fascinating obituaries the Times has ever published. The obituary page is the section many readers first turn to not only see who died, but to read some of the most inspiring, insightful, often funny, and elegantly written stories celebrating the lives of the men and women who have influenced our world. William McDonald, *The Times'* obituary editor who was recently featured in the award-winning documentary *Obit*, selected 320 of the most important and influential obits from the newspaper's archives. In chapters like "Stage and Screen," "Titans of Business," "The Notorious," "Scientists and Healers," "Athletes," and "American Leaders," the entries include a wide variety of newsmakers from the last century and a half, including Annie Oakley, Theodore Roosevelt, Joseph Stalin, Marilyn Monroe, Coco Chanel, Malcolm X, Jackie Robinson and Prince. Also included is a web-key which allows instant access to an exclusive website featuring 10,000 selected obituaries which are easily searchable by name, theme, dates, and more. Designed with more than 150 black-and-white photographs, this tomb-sized book plus website package is the perfect gift.

*Sword and Citadel* May 27 2022 Recently voted the greatest fantasy of all time, after *The Lord of the Rings* and *The Hobbit*, Gene Wolfe's *The Book of the New Sun* is an extraordinary epic, set a million years in the future, on an Earth transformed in mysterious and wondrous ways, in a time when our present culture is no longer even a memory. Severian, the central character, is a torturer, exiled from his guild after falling in love with one of his victims, and journeying to the distant city of Thrax, armed with his ancient executioner's sword, Terminus Est. This edition contains the second two volumes of this four volume novel, *The Sword of the Lictor* and *The Citadel of the Autarch*.

*Ethical Marketing and The New Consumer* Nov 20 2021 What was once just the desire of a few has now become a mass movement. The everyday shopper may still be searching out the value items but now they are also questioning the ethics of products and brands. Ethical products are increasing in sales year on year and those brands that have ignored it as a value are paying in reduced sales. Empowered, the new consumer is using the pound in their pocket to make a point not just a purchase. But ethical marketing isn't just about environmentalism, it's far bigger than that. This book challenges a lot of conventional thinking and introduces you to a wider range of ethics and the many types of ethical consumers. As a brand manager or producer, it'll give you useful tools to help you understand your Key Ethical Values. How to market and sell them. It'll blow away a few myths and probably surprise you with a few new facts and statistics. It looks at the positive and negative sides of big brands. And how to avoid greenwash, ethicalwash and becoming a victim of Brand Terrorism. A must for anyone in the eco-ethical market or who wants to enter it. An essential guide to understanding the new consumer and why they buy, what they buy and what they don't. The book comes with a support website - [www.ecoethicalmarketing.info](http://www.ecoethicalmarketing.info) - to allow comment, feedback, links and brands to publish their own case studies.

*White Fragility* Aug 25 2019 *The International Bestseller* 'With clarity and compassion, DiAngelo allows us to understand racism as a practice not restricted to "bad people." In doing so, she moves our national discussions forward. This is a necessary book for all people invested in societal change' *Claudia Rankine* *Anger*. *Fear*. *Guilt*. *Denial*. *Silence*. These are the ways in which ordinary white people react when it is pointed out to them that they have done or said something that has - unintentionally - caused racial offence or hurt. After, all, a racist is the worst thing a person can be, right? But these reactions only serve to silence people of colour, who cannot give honest feedback to 'liberal' white people lest they provoke a dangerous emotional reaction. Robin DiAngelo coined the term 'White Fragility' in 2011 to describe this process and is here to show us how it serves to uphold the system of white supremacy. Using knowledge and insight gained over decades of running racial awareness workshops and working on this idea as a Professor of Whiteness Studies, she shows us how we can start having more honest conversations, listen to each other better and react to feedback with grace and humility. It is not enough to simply hold abstract progressive views and condemn the obvious racists on social media - change starts with us all at a practical, granular level, and it is time for all white people to take responsibility for relinquishing their own racial supremacy. 'By turns mordant and then inspirational, an argument that powerful forces and tragic histories stack the deck fully against racial justice alongside one that we need only to be clearer, try harder, and do better' *David Roediger*, *Los Angeles Review of Books* 'The value in *White Fragility* lies in its methodical, irrefutable exposure of racism in thought and action, and its call for humility and vigilance' *Katy Waldman*, *New Yorker* 'A vital, necessary, and beautiful book' *Michael Eric Dyson*

*Polly and the Puffin: The New Friend* Mar 13 2021 The third children's book featuring Polly and her puffin Neil, from bestselling adult novelist Jenny Colgan. With gorgeous two-color illustrations throughout, Polly is perfect for reading aloud. Polly and her puffin friend, Neil, have wonderful adventures by the sea. But now the time has come for Polly to go to the place she calls 'Big School'. It might be fun, it might be exciting, and it's definitely a little bit scary. Making new friends can be harder than it sounds. . . . join Polly on her quest and find out if there might be a new feathered friend for Neil too! Ideal for bedtime stories and early readers. From the author of *The Little Beach Street Bakery*. Contains lots of fun recipes and activities in addition to the story.

*Revelation* Aug 06 2020 The final book of the Bible, Revelation prophesies the ultimate judgement of mankind in a series of allegorical visions, grisly images and numerical predictions. According to these, empires will fall, the "Beast" will be destroyed and Christ will rule a new Jerusalem. With an introduction by Will Self.

*The New Book of Middle Eastern Food* May 03 2020 The definitive volume on Middle Eastern cooking, a modern classic from the award-winning, bestselling author of *The Book of Jewish Food* and *Claudia Roden's Mediterranean* Originally published in 1972 and hailed by James Beard as "a landmark in the field of cookery," this new version represents the accumulation of the author's years of extensive travel throughout the ever-changing landscape of the Middle East, gathering recipes and stories. Now featuring more than 800 recipes, including the aromatic variations that accent a dish and define the country of origin: fried garlic and cumin and coriander from Egypt, cinnamon and allspice from Turkey, sumac and tamarind from Syria and Lebanon, pomegranate syrup from Iran, preserved lemon and harissa from North Africa. Claudia Roden has worked out simpler approaches to traditional dishes, using healthier ingredients and time-saving methods without ever sacrificing any of the extraordinary flavor, freshness, and texture that distinguish the cooking of this part of the world. Throughout these pages she draws on all four of the region's major cooking styles: • The refined haute cuisine of Iran, based on rice exquisitely prepared and embellished with a range of meats, vegetables, fruits, and nuts • Arab cooking from Syria, Lebanon, and Jordan—at its finest today, and a good source for vegetable and bulgur wheat dishes • The legendary Turkish cuisine, with its kebabs, wheat and rice dishes, yogurt salads, savory pies, and syrupy pastries • North African cooking, particularly the splendid fare of Morocco, with its heady mix of hot and sweet, orchestrated to perfection in its couscous dishes and tagines From the tantalizing mezze—succulent bites of filled fillo crescents and cigars, chopped salads, and stuffed morsels, as well as tahina, chickpeas, and eggplant in their many guises—to the skewered meats and savory stews and hearty and vegetable dishes, here is a rich array of Middle Eastern cooking.

*The New Woman in Print and Pictures* Feb 21 2022 Although feminist women have existed throughout history, the term "New Woman" wasn't officially coined until 1894, when British novelists began to address the concept of the New Woman through discussions of female suffrage, dress reform, women's advances toward more legal rights, birth control, sexual freedom, and women working outside the home. This annotated bibliography includes original novels and articles printed from 1894 to 1944, the era most closely associated with the New Woman. It includes all period novels with a New Woman protagonist and all period articles with the New Woman as primary subject, along with several poems, cartoons, advertisements, and artworks. The bibliography also includes critical literature published worldwide from the 1960s to 2008 that examines the primary material included in the first section. Because the New Woman was the target of many derisive articles, poems, and visual works, these critical

response pieces are included.

*New Dark Age* Jan 29 2020 "New Dark Age is among the most unsettling and illuminating books I've read about the Internet, which is to say that it is among the most unsettling and illuminating books I've read about contemporary life." – New Yorker As the world around us increases in technological complexity, our understanding of it diminishes. Underlying this trend is a single idea: the belief that our existence is understandable through computation, and more data is enough to help us build a better world. In reality, we are lost in a sea of information, increasingly divided by fundamentalism, simplistic narratives, conspiracy theories, and post-factual politics. Meanwhile, those in power use our lack of understanding to further their own interests. Despite the apparent accessibility of information, we're living in a new Dark Age. From rogue financial systems to shopping algorithms, from artificial intelligence to state secrecy, we no longer understand how our world is governed or presented to us. The media is filled with unverifiable speculation, much of it generated by anonymous software, while companies dominate their employees through surveillance and the threat of automation. In his brilliant new work, leading artist and writer James Bridle surveys the history of art, technology, and information systems, and reveals the dark clouds that gather over our dreams of the digital sublime.

*New Trends in Software Methodologies, Tools and Techniques* Jun 03 2020 Software is the essential enabler for the new economy and science. It creates new markets and new directions for a more reliable, flexible, and robust society. It empowers the exploration of our world in ever more depth. However, software often falls short behind our expectations. Current software methodologies, tools, and techniques remain expensive and not yet reliable for a highly changeable and evolutionary market. Many approaches have been proven only as case-by-case oriented methods. This book presents a number of new trends and theories in the direction in which we believe software science and engineering may develop to transform the role of software and science in tomorrow's information society. This publication is an attempt to capture the essence of a new state of art in software science and its supporting technology. It also aims at identifying the challenges such a technology has to master.

*Giambattista Vico and the New Psychological Science* Aug 18 2021 Giambattista Vico (1668-1744) was an Italian philosopher, rhetorician, and historian. As one of the great thinkers of the Enlightenment, he exerted tremendous influence on the social sciences. He was the first to stress cultural and linguistic dimensions in the development of both the human mind and social institutions. Although his ideas on the relationship between mind and culture and his epistemology have inspired the work of many scholars in psychology, his sizeable influence has been scarcely acknowledged. The volume is organized in two sections. The first locates Vico in his historical context and in the landscape of contemporary human and social sciences. The second part presents those of Vico's concepts that seem promising for the development of a new way of looking at psychological phenomena. In the book's conclusion, Luca Tateo gathers the ideas of the volume's contributors to suggest future development of the psychological sciences. This book aims to show how Vico's insights can inspire future research in the psychological sciences. It collects multidisciplinary contributions of leading international scholars that draw upon the thought of this original thinker. Collectively, the contributors remind us of the legacy and continuing influence of this inspiring historical figure.

But when they see a sad little girl, Gertie, hiding under her bed, they decide SOME rules are made to be broken.

*The New Deal and the Problem of Monopoly* Nov 01 2022 The massive depression of the 1930's detonated the crisis between harsh reality and the vision of material abundance and economic security created by the American industrial order. Amid widespread poverty there was increasing concentration of economic power and loss of individual initiative. Professor Hawley traces the pattern of this conflict. He analyzes the National Recovery Administration, the sources and nature of the antitrust ideology, the rise of Keynesianism, the confusion within the Roosevelt Administration during the recession of 1937-38, and the government career of Thurman Arnold. Attention is given to the administrators of the New Deal and to the beliefs, pressures, and symbols that affected their policy decisions. How and why these ideas and pressures produced policies that were economically inconsistent yet politically workable is also explained. Originally published in 1966. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

*The Blockchain and the New Architecture of Trust* Aug 30 2022 How the blockchain—a system built on foundations of mutual mistrust—can become trustworthy The blockchain entered the world on January 3, 2009, introducing an innovative new trust architecture: an environment in which users trust a system—for example, a shared ledger of information—without necessarily trusting any of its components. The cryptocurrency Bitcoin is the most famous implementation of the blockchain, but hundreds of other companies have been founded and billions of dollars have been invested in similar applications since Bitcoin's launch. Some see the blockchain as offering more opportunities for criminal behavior than benefits to society. In this book, Kevin Werbach shows how a technology resting on foundations of mutual mistrust can become trustworthy. The blockchain, built on open software and decentralized foundations that allow anyone to participate, seems like a threat to any form of regulation. In fact, Werbach argues, law and the blockchain need each other. Blockchain systems that ignore law and governance are likely to fail, or to become outlaw technologies irrelevant to the mainstream economy. That, Werbach cautions, would be a tragic waste of potential. If, however, we recognize the blockchain as a kind of legal technology that shapes behavior in new ways, it can be harnessed to create tremendous business and social value.

*The Old is Dying and the New Cannot Be Born* Jun 23 2019 Neoliberalism is fracturing, but what will emerge in its wake? The global political, ecological, economic, and social breakdown—symbolized by Trump's election—has destroyed faith that neoliberal capitalism is beneficial to the majority. Nancy Fraser explores how this faith was built through the late twentieth century by balancing two central tenets: recognition (who deserves rights) and distribution (who deserves income). When these begin to fray, new forms of outsider populist politics emerge on the left and the right. These, Fraser argues, are symptoms of the larger crisis of hegemony for neoliberalism, a moment when, as Gramsci had it, "the old is dying and the new cannot be born." In an accompanying interview with Jacobin publisher Bhaskar Sunkara, Fraser argues that we now have the opportunity to build progressive populism into an emancipatory social force.

*The New Temple and the Second Coming* Jan 11 2021 An array of new archaeological finds and revealing discoveries in the ancient city hidden beneath Jerusalem lead to a stunning conclusion: The generation alive today will witness the return of Christ. The evidence—uncovered by prophecy expert Grant R. Jeffrey—is breathtaking: Jewish authorities are preparing to rebuild the Temple in Jerusalem. Quietly they have recovered lost artifacts from the ancient Temple and have recreated sacred worship vessels. The new Sanhedrin, now reconvened in Israel, is training Levite priests to reinstitute animal sacrifice. These remarkable developments have far-reaching prophetic significance. In this book you will examine the biblical prophecies and research data that together solve end-times mysteries, including: The search for lost Temple treasures -Revealing discoveries in underground Jerusalem -The process of recreating sacred Temple vessels -Unexpected clues revealed in the Copper Scroll and the Ezekiel Tablets -The latest plans for rebuilding the Temple Join Dr. Jeffrey as he uncovers answers to questions that have perplexed students of prophecy for centuries. Answers that point to the unmistakable conclusion that this is truly the last generation.

*The Book of Why* Sep 06 2020 A pioneer of artificial intelligence shows how the study of causality revolutionized science and the world 'Correlation does not imply causation.' This mantra was invoked by scientists for decades in order to avoid taking positions as to whether one thing caused another, such as smoking and cancer and carbon dioxide and global warming. But today, that taboo is dead. The causal revolution, sparked by world-renowned computer scientist Judea Pearl and his colleagues, has cut through a century of confusion and placed cause and effect on a firm scientific basis. Now, Pearl and science journalist Dana Mackenzie explain causal thinking to general readers for the first time, showing how it allows us to explore the world that is and the worlds that could have been. It is the essence of human and artificial intelligence. And just as Pearl's discoveries have enabled machines to think better, *The Book of Why* explains how we can think better.

*Brave New War* Jul 17 2021 "For my money, John Robb, a former Air Force officer and tech guru, is the futurists' futurist." —Slate The counterterrorism expert John Robb reveals how the same technology that has enabled globalization also allows terrorists and criminals to join forces against larger adversaries with relative ease and to carry out small, inexpensive actions—like sabotaging an oil pipeline—that generate a huge return. He shows how combating the shutdown of the world's oil, high-tech, and financial markets could cost us the thing we've come to value the most—worldwide economic and cultural integration—and what we must do now to safeguard against this new method of warfare.

*The New Cycle and New Finance in China* Jul 29 2022 This book is a selection of research by a Chinese economist who explains China's financial system, as well as predicting the future. *Mapping Tourism* Jul 25 2019 At first glance, the relationships among tourists, tourism maps, and the spaces of tourism seem straightforward enough: tourists use maps to find their way to and through the sites of history, culture, nature, or recreation represented there. Less apparent is how tourism maps and those using them construct such spaces and identities. As the essays in *Mapping Tourism* clearly demonstrate, the extraordinary interaction of work with leisure and the everyday with the exotic makes tourism maps ideal sites for exploring the contested construction of place and identity. Construction sites in the "New Berlin," Alabama's civil rights trail, Quebec City, a California ghost town, and Bangkok's sex trade are among the spaces the essays examined. Taken together, these essays allow us to see tourist space as it truly is: contested, ever changing, and replete with issues of power.
