**Psychology for health professionals** Jan 11 2021 This fully updated second edition is written specifically for health science and nursing students in Australia and New Zealand. Authored by the highly regarded Patricia Barkway, with a diverse range of expert contributors, this Elsevier e-book interprets psychology for nurses, as well as for students of paramedicine, occupational therapy, physiotherapy, public health, pharmacy, psychology, social work and midwifery. Psychology for Health Professionals 2e e-book examines essential psychological theories, placing them within a social context. Acknowledging increasing awareness that behaviour is influenced as much by external factors as biological and psychological ones, the book's first half outlines psychological, lifespan and social theories, then applies them to contemporary health issues in later chapters. A key focus of this leading psychology e-book is examining individual personality and psychological theory within the social context of people's lives. New content includes current, evidence-based research, references and clinical examples relevant to interdisciplinary, contemporary healthcare practice. Issues of cultural safety and awareness have been strengthened throughout; there is a new section on chronic illness and a focus on recovery. This introductory psychology e-book does not assume its readers will have prior 'psychology' knowledge, yet it can easily be used well beyond first-year university. Critical thinking questions Classroom activities Research focus boxes providing examples of current research and evidence-based practice Interdisciplinary case studies throughout Further resources and web links to provide further reading and research and up-to-date information, data and statistics

*Ethical Dimensions in the Health Professions - E-Book* Sep 26 2019 Ideal for all health care professionals, *Ethical Dimensions in the Health Professions*, 5th Edition provides a solid foundation in basic ethical theory, the terms and concepts of ethics, and current ethical issues. Expert authors Ruth Purtilo and Regina Doherty outline a unique 6-step decision-making process as a guide to making effective choices that lead to a professional and caring response to patients. They also suggest practical approaches to commonly encountered clinical issues such as confidentiality, informed consent, information sharing, and end-of-life care. With this book, you will develop the skills you need to recognize, understand, and resolve ethical problems. Unique! 6-step process of ethical decision-making provides an organizing framework for the steps to take in arriving at an ethical decision. Step 1: Gather relevant information Step 2: Identify the type of ethical problem Step 3: Analyze the problem using ethics theories or approaches Step 4: Explore the practical alternatives Step 5: Act Step 6: Evaluate the process and outcome Patient stories begin each chapter with an ethical dilemma and frame the rest of the chapter, tying abstract principles to real-life situations and demonstrating the ethical decision-making process for each story. Content on end-of-life care shows how to develop a caring response toward dying patients and identifies basic ethical concepts applying to patients with life-threatening conditions. Unique! More than 100 Reflection boxes indicate important concepts and include space to jot down thoughts. HIPAA and patient confidentiality information covers current laws and addresses what types of information are appropriate and inappropriate to include in the patient's medical record. Questions for thought and discussion help you apply the ethical decision-making process to different situations. Unique! Over 80 summary boxes offer a quick review of the important information in each section. Unique! New coverage of biotechnology addresses the professional's role relating to environmental responsibility and the ecological costs of various health care interventions. Unique! New content on the intersection of technology and ethics describes the impact of advances in medical technology in rehabilitative care, and helps you face difficult conversations where you must offer hope while

presenting realistic outcomes. Unique! New content on terrorism and disaster planning describes the ethical dilemmas professionals face in preventing terrorism and planning for disasters. New topics on the ethical decision-making process include the concepts of care, distinguishing ethical reasoning as a distinct part of your clinical reasoning and professional judgment, and attention to caregivers. New coauthor Regina Doherty, an occupational therapist, adds expertise and an OT perspective.

**Health Care and the Law** Nov 20 2021 Health Care and the Law 4th Edition is recognised as one of the leading texts setting out the basic principles of health care law in New Zealand. This book is an easy-to-understand, practical and uncomplicated account of health care law, making it an essential text for health practitioners, lawyers and students. Since 2004 when the 3rd edition of this book was published, there have been a number of legislative changes in the area of health law. This edition keeps you current with these changes, with updates made to all chapters. The inclusion of relevant case law also provides readers a greater understanding of the practicalities of the law, how it has been applied and how it may relate to them.
