The World of Custom Trucks Jul 20 2021 In this, your guide to outstanding truck decoration in Western Europe and the United States, you will see a wide range of approaches and styles. Eighteen of the twenty-nine trucks featured are from Europe, eight are from North America and three are from the UK. In each case you are presented with a number of views of the vehicle to show the overall designs as well as the details of exteriors and interiors. French photographer Xavier Stefaniak is a trucker and designer specialising in capturing the finest truck photographs. His co-author, Ferdy De Martin, runs www.TOPRUN.ch, one of the most popular internet truck sites. Their text is enthusiastic and illuminating. Main sections are in English and they also provide brief summaries in French. Among these examples of their work are two from the United States. The stylish black-and-red 1981 Kenworth W900A comes from from Lanita Transport and the cool yellow-and green Peterbilt 351 is from Maggini and Son. European styles are often more ornate. Hundreds of LEDs and delicate airbrushing cover the Mercedes MP4 'Xtar' tankers from the Finnish Kuljetus Auvinen Oy. The Scania T460 cab interior from Belgian J Peeters & Zn shows a more delicate approach. Some of the photographs set the trucks in their landscapes such as the English Yorkshire Dales where Fred Greenwood's Scania R580 gingerly threads its cattle truck along narrow lanes. The final example here is the rarely used violet of Van Dalen's Volvo FH16 700 'Bruce Springsteen'.

Iqbal Apr 04 2020 For Fatima, Maria and the other unseen children of Hussain Khan's carpet factory, Iqbal Masih's arrival is both the end of hope and its beginning. It is Iqbal who tells them that their family's debt will never be cancelled, no matter how many inches of progress they make in their rugs, nomatter how neat their knots or how perfect the pattern they weave. But it is also Iqbal who is brave enough to talk about the future, to plan their escape - and to encourage the children to stand together against their master's injustice. Who promises Fatima that next spring they are going to fly akite 'whatever happens.'Based on a true story, this is

Internal Combustion Engines Mar 16 2021 This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO2 emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons. presents the latest requirements and challenges

The Atlas of Migration in Europe Jun 26 2019

This book follows the journeys of those fleeing war, poverty or political crises, risking their lives as they attempt to find sanctuary in Europe. Over the past 25 years, almost 40,000 migrants have been reported missing or died due to drowning or exhaustion on the borders of Europe. 6,000 migrants died in 2016 alone, making it the deadliest year on record. Growing numbers of arrivals since 2015 have caused a wave of panic to sweep across the countries of the European Union, which has responded with an increasingly entrenched policy - the only one it considers appropriate - of fortifying its external borders. As a result, numerous walls and fences have sprung up to "regulate the flows", new camps have been opened and reception centres have been set up beyond the frontiers of Europe, all accompanied by the steady militarisation of surveillance and repression. The EU has thus been just as active in precipitating this "migrant crisis" as it has been in prolonging its effects. Indeed, this crisis calls into question the entire European system for border management and policies on immigration and reception. Deconstructing preconceptions, changing the way we see others, probing borders and mapping the nexus of control and detention, the collection of articles, maps, photographs and illustrations in this Atlas provide an important critical geography of migration policies. Perfect for journalists, activists, students of geopolitics at school or university, this Atlas seeks, above all, to give migrants a voice. d, this crisis calls into question the entire European system for border management and policies on immigration and reception.
