Friendly Chemistry - Teacher Edition Volume 1 Aug 28 2019 Friendly Chemistry is a truly unique approach to teaching introductory chemistry. Used by home schoolers and charter, public and private school students world-wide for over ten years, Friendly Chemistry presents what is often considered an intimidating subject as a genuinely fun, enjoyable experience. Whether you're a high-school aged student needing a lab science course or a "non-traditional" student looking for a refresher course to help you prepare for an upcoming entrance exam, Friendly Chemistry can help you accomplish your goal in a "painless" way! If you do have aspirations of a future in a science field,

Friendly Chemistry can give you the solid foundation you need to succeed in subsequent courses. Friendly Chemistry was written using simple language and a host of analogies to make learning (and teaching!) chemistry easy. The chemistry concepts presented in Friendly Chemistry are NOT watered-down. The concepts are just explained in ways that are readily understood by most learners. Coupled with these explanations is a host of teaching aids, labs and games which makes the learning concrete and multi-sensory. Students find the course fun and painless. Parents often comment, "I wish I had had this when I was taking chemistry. Now it all makes so much sense!" Friendly Chemistry covers the same topics taught in traditional high school chemistry courses. The course begins with an introduction to atomic theory followed by discussion of why the elements are arranged the way they are in the periodic table. Quantum mechanics comes next using the acclaimed "Doo-wop" Board as a teaching aid. Next comes a discussion of how atoms become charged (ionization), followed by an explanation of how charged atoms make compounds. The mole is introduced next, followed by a discussion of chemical reactions. Stoichiometry (predicting amounts of product produced from a reaction) is treated next followed by a discussion of solutions (molarity). The course is wrapped up with a discussion of the ideal gas laws. Please note that this is Volume 1 of the Teacher's Edition. Volume 2 of the Teacher's Edition, the Student Edition and the Manipulative Set must be purchased separately to have all necessary materials to complete this course. More information regarding Friendly Chemistry including answers to many frequently asked questions may be found at www.friendlychemistry.com.

Skills in English Feb 24 2022 Skills in English Reading Level 1 Teacher's Book The Garnet Education Skills in English series was highly commended in the Duke of Edinburgh English Speaking Union English Language Book Award in 2004. This course is part of the Skills in English series from Garnet Education. It is designed to help students to cope with simple reading research tasks in English. At Level 1, students learn how to: predict content; deal with new words; follow instructions; recognise dates and periods; locate information within a text; identify the topic sentences; skim the topic

sentences for the main points; understand chronological markers; understand simple discourse markers; understand pronoun reference; understand simple lexical cohesion; transfer information from a text to a chart; read actively. In addition, students acquire key vocabulary in the following thematic areas: Education Daily Life Work and Business Science and Nature The Physical World Culture and Civilization They Made Our World Art and Literature Sports and Leisure Nutrition and Health. Key features of this Teacher's Book are: a facsimile of the related Course Book page, for ease of reference; an introduction to the approach taken in the course; lesson-by-lesson notes; a full answer key, including model answers where appropriate; language and culture notes, where these will assist the teacher in understanding learning difficulties or confusions of the target students; methodology notes, where the value of an exercise, or the way to conduct it, may not be self-evident. As well as preparing students for entry into English-medium study, the Skills in English Course is ideal for students who wish to improve their scores in skills-based examinations for university entry requirements, such as the International English Language Testing System (IELTS). Rather than focusing on exam preparation, Skills in English teaches the necessary skills as part of a systematic programme of language development. Skills in English courses are also available in Listening, Speaking and Writing. See the Skills in English website at skillsinenglish.com for additional materials and help. Key Features Reading texts a maximum of 250 words Listening texts a maximum of 400 words Speaking tasks of one paragraph, with writing assignments between one and five paragraphs Test booklets containing theme tests, a revision test after five units, plus an end-of-course test Teacher's Book containing full answer keys, methodology notes and transcript of listening material Accompanying Course Book, Student Test Pack and Teacher Test Booklet also available.

Teachers as Course Developers Dec 01 2019 Teachers as Course Developers is a book about how language teachers themselves rather than curriculum specialists develop and implement their own courses. It uses a unique case study approach featuring the stories of six teachers who successfully designed their own courses in different settings in Japan, the U.S., and Latin America. The book

provides a framework for the processes of course development which any teacher can use in developing his or her own courses. Each chapter highlights a different aspect of the framework based on the particular teacher's approach and examines how the teacher has utilized or departed from the framework in meeting the challenges of a particular situation. Each narrative is followed by a set of tasks and discussion questions. An annotated bibliography is also included.
