Choosing Single Motherhood Nov 09 2020 Provides information and advice for women choosing to become single mothers, and includes interviews with family therapists and single mothers on the topic.

Growing Up with a Single Parent Dec 31 2019 Nonwhite and white, rich and poor, born to an unwed mother or weathering divorce, over half of all children in the current generation will live in a single-parent family--and these children simply will not fare as well as their peers who live with both parents. This is the clear and urgent message of this powerful book. Based on four national surveys and drawing on more than a decade of research, *Growing Up with a Single Parent* sharply demonstrates the connection between family structure and a child's prospects for success. What are the chances that the child of a single parent will graduate from high school, go on to college, find and keep a job? Will she become a teenage mother? Will he be out of school and out of work? These are the questions the authors pursue across the spectrum of race, gender, and class. Children whose parents live apart, the authors find, are twice as likely to drop out of high school as those in two-parent families, one and a half times as likely to be idle in young adulthood, twice as likely to become single parents themselves. This study shows how divorce--particularly an attendant drop in income, parental involvement, and access to community resources--diminishes children's chances for well-being. The authors provide answers to other practical questions that many single parents may ask: Does the gender of the child or the custodial parent affect these outcomes? Does having a stepparent, a grandmother, or a nonmarital partner in the household help or hurt? Do children who stay in the same community after divorce fare better? Their data reveal that some of the advantages often associated with being white are really a function of family structure, and that some of the advantages associated with having educated parents evaporate when those parents separate. In a concluding chapter, McLanahan and Sandefur offer clear recommendations for rethinking our current policies. Single parents are here to stay, and their worsening situation is tearing at the fabric of our society. It is imperative, the authors show, that we shift more of the costs of raising children from mothers to fathers and from parents to society at large. Likewise, we must develop universal assistance programs that benefit low-income two-parent families as well as single mothers. Startling in its findings and trenchant in its analysis, *Growing Up with a Single Parent* will serve to inform both the personal decisions and governmental policies that affect our children's--and our nation's--future.

From that deep valley Jennifer rose to the summit of Corporate America--only to leave it all behind to minister to single moms. In *The Church and the Single Mom* Jennifer provides a road map for those who, like her, look out at the nearly 17 million single moms in the U.S. alone, many of whom are drowning in financial struggles, parenting woes, and emotional.

Be the Mom Jul 26 2019 The role of mom is often described as the most important job in the world. Rightly so, for so much is at stake during children's early years and moms are central in shaping character and personhood. However, when the going gets tough (the endless diapers, the continual messes, the endless conflict resolution, the complete lack of personal time, etc.), moms are often tempted to quit their "mom?job". While few would endorse an outright abandonment of motherhood, others may recommend that a woman treat her role as secondary to personal desires in order to combat feelings of discouragement and/or unfulfillment. The enemy has laid intentional traps cleverly designed to discourage and redirect a woman towards self rather than family. Moms need to know how to recognize these traps . . . and avoid them. *Be the Mom: Overcome Attitude Traps and Enjoy Your Kids* explores and validates the life of a mom who makes her family a priority and introduces the reader to seven Mom Traps that may be preventing them from a full, joy-filled life.

Raising Boys without Men Jan 24 2022 Nominated for a Books for a Better Life Award in Parenting Backed by peer-reviewed research, this hotly debated bestseller (San Francisco Chronicle) continues to open eyes with its finding that raising thriving, emotionally healthy sons does not require a man in the house. As the number of single-mom and two-mom households has grown, so have concerns about the possible damage caused by the lack of a stable male role model in the house. Determined to find the truth, research psychologist Peggy Drexler embarked on a long-term study comparing boys raised in nontraditional families with those whose fathers were present throughout their childhood. The results were startling. Female-headed households can provide even better parenting for boys than households with men. Sons from female-headed families can grow up emotionally stronger and more well-rounded than boys from "traditional" mother-father families—more in touch with their feelings yet masculine in all the ways defined by our culture.
