Lope de Vega: Fuente Ovejuna Sep 29 2019 Fuente Ovejuna (C.1613) is the most famous and frequently performed play by the creator of Spanish theatre, Lope de Vega (1562-1635). Astonishingly for its period, it celebrates the murder in 1476 of a nobleman, the Grand Commander of the Military Order of Calatrava, by the peasants he had oppressed, and their subsequent solidarity under torture. Fuente Ovejuna, however, is less a history lesson or political tract than an optimistic moral fable.

Housing Characteristics of Selected Races and Hispanic-origin Households in the United States Mar 04 2020 This report presents a statistical overview of the current housing conditions of selected races: White, Black; American Indian, Eskimo, or Aleut; and Asian or Pacific Islander households. Data are also shown for Hispanic-origin households. Generally, the report is based on data collected from the American Housing Survey (AHS) for the United States in 1987, a biennial national sample survey of approximately 55, 800 housing unites conducted by the Bureau of the Census for the Department of Housing and Urban Development. Since the AHS does not obtain data on the individual groups comprising the Asian or Pacific Islander and the Hispanic-origin populations, data from the 1980 Public-Use Microdata Sample, a 1-percent sample of the United States

population as enumerated in the 1980 Census, are included in this publication.

Introduction to Functional Programming Using Haskell Apr 16 2021 After the success of the first edition, Introduction to Functional Programming using Haskell has been thoroughly updated and revised to provide a complete grounding in the principles and techniques of programming with functions. The second edition uses the popular language Haskell to express functional programs. There are new chapters on program optimisation, abstract datatypes in a functional setting, and programming in a monadic style. There are complete new case studies, and many new exercises. As in the first edition, there is an emphasis on the fundamental techniques for reasoning about functional programs, and for deriving them systematically from their specifications. The book is self-contained, assuming no prior knowledge of programming and is suitable as an introductory undergraduate text for first- or second-year students.
