Computer Help for Seniors in Easy Steps Mar 27 2022 More and more senior citizens are exploring the exciting opportunities that computers present. Unfortunately, along with the joys come the headaches: baffling error messages, a computer or program that simply won't behave as it should, the ever-present fear of viruses and spyware, and perhaps worst of all, not knowing where to turn for help. Tech support lines are expensive and unreliable, often offering complex solutions to simple problems, and of course, printed manuals are a thing of the past. *Computer Help for Seniors in Easy Steps* is the perfect alternative. In clear, everyday English, it troubleshoots all parts of a computer system, providing easy-to-follow instructions that guide users step-by-step to a successful conclusion. It also examines the most common issues users experience with Windows, the Internet, and email, and offers effective prevention measures that ensure browsing the Web remains a safe and enjoyable experience.

Perspectives on Human-Computer Interaction Research with Older People Jan 13 2021 This book promotes a critical reflection about the research conducted so far in Human-Computer Interaction (HCI) with older people, whose predominant perspective focuses on decline, health, and help. It introduces a new (or different) perspective, which is grounded in interdisciplinary research on older people and digital technologies. Key elements are to (i) address topics that include, but also go beyond decline, health, and help, such as leisure, fun, creativity and culture, to delve more deeply into the role of digital technologies in multiple facets of older people's lives; (ii) focus on doing research and designing technologies with and for older adults, and their communities, to avoid and fight against negative social conceptions of ageing; and (iii) examine older people's life course, strengths, interests, and values, as well as their limitations and needs, to design technologies that not only help but also empower them, extending their abilities and acquiring new knowledge, beyond technology use. This perspective aims to help us better understand, design, and evaluate older people's interactions with digital technologies in the early 21st century.
