Other People's Houses Oct 29 2019 With a foreword by Cynthia Ozick, this semiautobiographical novel of a Jewish girl forced away from home in the face of Nazi persecution is an extraordinary tale of fortitude and survival. On a December night in 1938, a ten-year-old girl named Lore is put on the Kindertransport, a train carrying hundreds of Jewish children out of Austria to safety from Hitler's increasingly alarming oppression. Temporarily housed at the Dover Court Camp on England's east coast, Lore will find herself living in other people's houses for the next seven years: the Orthodox Levines, the Hoopers, the working-class Grimsleys, and the wealthy Miss Douglas and Mrs. Dillon. Charged with the task of asking "the English people" to get her parents out of Austria, Lore discovers in herself an impassioned writer. In letters to potential sponsors, she details the horrors happening back at home; in those to her parents, she notes the mannerisms and reactions of the new families around her as she valiantly tries to master their language. And the closer the world comes to a new war, the more resolute Lore becomes to survive. As powerful now as when it was first released fifty years ago, *Other People's Houses* is a poignant tale about the creation of a new life in the face of hopelessness and fear—a hallmark of the postwar immigration experience.

The Mother-Infant Nexus in Anthropology Mar 15 2021 Over the past 20 years there has been increased research traction in the anthropology of childhood. However, infancy, the pregnant body and motherhood continue to be marginalised. This book will focus on the mother-infant relationship and the variable constructions of this dyad across cultures, including conceptualisations of the pregnant body, the beginnings of life, and implications for health. This is particularly topical because there is a burgeoning awareness within anthropology regarding the centrality of mother-infant interactions for understanding the evolution of our species, infant and maternal health and care strategies, epigenetic change, and biological and social development. This book will bring together cultural and biological anthropologists and archaeologists to examine the infant-maternal interface in past societies. It will showcase innovative theoretical and methodological approaches towards understanding societal constructions of foetal, infant and maternal bodies. It will emphasise their interconnectivity and will explore the broader significance of the mother/infant nexus for overall population well-being.

Small Beginnings Require Bigger Dreams Oct 10 2020 We all have a starting point in life. Many of us are told, through both spoken and unspoken language, that this starting point determines what we can achieve in life. That it determines the size of our achievable dreams. This book challenges the idea that your birthplace, race, gender, sexuality, religion, or any other categorical limitation has any power outside of what you decide to believe. In short, your starting point in life is like the starting bloc of a race. How fast you run and whether or not you make it to the finish line is completely determined by you.

The Dawning of the Apocalypse Sep 28 2019 August 2019 saw numerous commemorations of the year 1619, when what was said to be the first arrival of enslaved Africans occurred in North America. Yet in the 1520s, the Spanish, from their imperial perch in Santo Domingo, had already brought enslaved Africans to what was to become South Carolina. The enslaved people here quickly defected to local Indigenous populations, and compelled their captors to flee. Deploying such illuminating research, *The Dawning of the Apocalypse* is a riveting revision of the "creation myth" of settler colonialism and how the United States was formed. Here, Gerald Horne argues forcefully that, in order to understand the arrival of colonists from the British Isles in the early seventeenth century, one must first understand the "long sixteenth century"—from 1492 until the arrival of settlers in Virginia in 1607. During this prolonged century, Horne contends, "whiteness" morphed into "white supremacy," and allowed England to co-opt not only religious minorities but also various nationalities throughout Europe, thus forging a muscular bloc that was needed to confront rambunctious Indigenous and Africans. In retelling the bloodthirsty story of the invasion of the Americas, Horne recounts how the fierce resistance by Africans and their Indigenous allies weakened Spain and enabled London to dispatch settlers to Virginia in 1607. These settlers laid the groundwork for the British Empire and its revolting spawn that became the United States of America.
