Flotsam Mar 26 2022 A bright, science-minded boy goes to the beach equipped to collect and examine flotsam—anything floating that has been washed ashore. Bottles, lost toys, small objects of every description are among his usual finds. But there's no way he could have prepared for one particular discovery: a barnacle-encrusted underwater camera, with its own secrets to share . . . and to keep.

Structural Engineer's Pocket Book British Standards Edition Sep 07 2020 The Structural Engineer's Pocket Book British Standards Edition is the only compilation of all tables, data, facts and formulae needed for scheme design to British Standards by structural engineers in a handy-sized format. Bringing together data from many sources into a compact, affordable pocketbook, it saves valuable time spent tracking down information needed regularly. This second edition is a companion to the more recent Eurocode third edition. Although small in

size, this book contains the facts and figures needed for preliminary design whether in the office or on-site. Based on UK conventions, it is split into 14 sections including geotechnics, structural steel, reinforced concrete, masonry and timber, and includes a section on sustainability covering general concepts, materials, actions and targets for structural engineers.

Whispers of the Dead Aug 07 2020 A series of bizarre murders—the victims nearly unidentifiable—forces FBI tracker “Steps” Craig to match wits with the most cold-blooded killer he’s ever encountered. There has been a murder, but not only is the identity of the victim unknown, most of the body itself is missing. All that’s been found is a pair of feet, stored in a portable cooler, and left in the house of a Federal judge in El Paso, Texas. The killer apparently broke into the judge’s house, left his grizzly message, and disappeared without a trace. With no clues as to the killer, the person killed, or the intent behind the cooler, all the authorities really know is that this likely isn’t the killer’s first—or his last—victim. Magnus “Steps” Craig is an FBI agent and an elite tracker, easily the best in the world. Steps is renowned for his incredible ability to find and follow trails over any surface. As part of the three-man special team, FBI’s Special Tracking Unit (STU), he is called in on cases where his skills are indispensable. But there’s a secret to his skill. Steps has a kind of synesthesia, an ability that allows him to see whatever each particular person has touched in a unique color—what Steps calls ‘shine.’ His ability is known to only a few people—his father, the director of the FBI, and his partner, Special Agent Jimmy Donovan. While the Special Tracking Unit tries to grapple with the gruesome scene in El Paso, they soon discover another, earlier victim. Once again, only the feet—in a disposable icebox—were left behind. With almost no clues besides the body parts, Steps and his team find themselves enmeshed in the most difficult case of their careers. And The Icebox Killer has only just begun.
