Evolutionary Algorithms for Solving Multi-Objective Problems Jul 14 2021 The solving of multi-objective problems (MOPs) has been a continuing effort by humans in many diverse areas, including computer science, engineering, economics, finance, industry, physics, chemistry, and ecology, among others. Many powerful and deterministic and stochastic techniques for solving these large dimensional optimization problems have risen out of operations research, decision science, engineering, computer science and other related disciplines. The explosion in computing power continues to arouse extraordinary interest in stochastic search algorithms that require high computational speed and very large memories. A generic stochastic approach is that of evolutionary algorithms (EA). Such algorithms have been demonstrated to be very powerful and generally applicable for solving different single objective problems. Their fundamental algorithmic structures can also be applied to solving many multi-objective problems. In this book, the various features of multi-objective evolutionary algorithms (MOEAs) are presented in an innovative and unique fashion, with detailed customized forms suggested for a variety of applications. Also, extensive MOEA discussion questions and possible research directions are presented at the end of each chapter. Book of Abstracts of the 61st Annual Meeting of the European Association for Animal Production Jul 02 2020 This Book of Abstracts is the main publication of the 61st Annual Meeting of the European Association for Animal Production (EAAP) held in Heraklion, Crete Island, Greece, on August 23-27 2010. It contains abstracts of the invited papers and contributed presentations. The meeting addressed subjects relating to science and innovation. Also, important problems were discussed during the sessions of EAAP's nine Commissions: Animal Genetics, Animal Nutrition, Animal Management and Health, Animal Physiology, Cattle Production, Sheep and Goat Production, Pig Production, Horse Production and Livestock Farming Systems. In addition joint sessions on topics interesting several disciplines and species were included in the programme.

Clinical Assessment of Child and Adolescent Personality and Behavior Jan 28 2020 Psychologists offer an increasing variety of services to the public. Among these services, psychological assessment of personality and behavior continues to be a central activity. One main reason is that other mental health professionals often do not possess a high level of competence in this area. And when dealing with children and adolescents, psychological assessment seems to take on an even greater role. Therefore, it follows that comprehensive graduate-level instruction in assessment should be a high priority for educators of psychologists who will work with these youth. This textbook is organized into three sections, consistent with the authors' approach to teaching. Part I provides students with the psychological knowledge base necessary for modern assessment practice, including historical perspectives, measurement science, child psychopathology, ethical, legal, and cultural issues, and the basics of beginning the assessment process. Part II gives students a broad review of the specific assessment methods used by psychologists, accompanied by specific advice regarding the usage and strengths and weaknesses of each method. In Part III, we help students perform some of the most sophisticated of assessment practices: integrating and communicating assessment results and infusing assessment practice with knowledge of child development and psychopathology to assess some of the most common types of behavioral and emotional disorders in youth. A text focusing on assessment practices must be updated every four to six years to keep pace with advances in test development. For example, several of the major tests reviewed in the text, such as the Behavioral Assessment System for Children and the Child Behavior Checklist, have undergone major revisions since the publication of the last edition making the current content outdated. Further, another major test, the Conners' Rating Scales, is undergoing substantial revisions that should be completed before publication of the next edition. Finally, the evidence for the validity of the tests and the recommendations for their appropriate use evolve as research accumulates and requires frequent updating to remain current. For example, there was a special issue of the Journal of Clinical Child and Adolescent Psychology published focusing on evidenced-based assessment of the major forms of childhood psychopathology that will need to be integrated into the chapters in Part 3. This latter point reflects an important trend in the field that should influence the marketing of the book. That is, there are several initiatives being started in all of the major areas of applied psychology (e.g., school, clinical, and counseling) to promote evidenced-based assessment practices. These initiatives have all emphasized the need to enhance the training of graduate students in this approach to assessment. This has been the orientation of this textbook from its first edition; that is, Clinical Assessment of Child and Adolescent Personality and Behavior has focused on using research to guide all recommendations for practice. The ability of the textbook to meet this training need should be an important focus of marketing the book to training programs across all areas of applied psychology.

Molecular Medicine Feb 27 2020 Molecular Medicine is the application of genetic or DNA-based knowledge to the modern practice of medicine. Molecular Medicine, 4e, provides contemporary insights into how the genetic revolution is influencing medical thinking and practice. The new edition includes recent changes in personalized medicine, new growth in omics and direct-to-consumer DNA testing, while focusing on advances in the Human Genome project and implications of the advances in clinical medicine. Graduate students, researchers, clinicians and allied health professionals will appreciate the background history and clinical application of up-to-date molecular advances. Extensively revised to incorporate the results of the Human Genome Project, it provides the latest developments in molecular medicine. The only book in Molecular Medicine to reach its fourth edition identifies current practice as well as future developments. Presents extensive tables, well presented figures and resources for further understanding

Management of Common Musculoskeletal Disorders Aug 03 2020 The fundamental textbook of orthopedic physical therapy is now in its thoroughly updated Fourth Edition. This new edition presents a "how-to" approach focusing on the foundations of manual therapy. More than 1,200 illustrations and photographs demonstrate therapeutic techniques. Extensive references cite key articles, emphasizing the latest research. Reflecting current practice standards, this edition places greater emphasis on joint stabilization techniques and the role of exercise. Coverage includes new material on soft tissue manipulations and myofascial evaluation. This edition also features case studies covering real-life practice scenarios.

Therapeutic Management of Incontinence and Pelvic Pain Dec 27 2019 This 2nd revised edition covers management and treatment of bladder and bowel dysfunctions in men and women, pelvic organ prolapse, issues concerning the elderly, neurologically impaired patients and those with pelvic pain. New chapters cover quality of life, treatment of bladder and bowel dysfunction in children, the history of pelvic floor muscle exercise and manual therapy. The use of real-time ultrasound to evaluate pelvic floor muscle contractility is discussed, and a new section covers ethical issues in the management of incontinence. This is a useful reference and practical guide for health professionals dealing with incontinence and pelvic floor disorders.

The SAGE Encyclopedia of Educational Research, Measurement, and Evaluation Nov 18 2021 In an era of curricular changes and experiments and high-stakes testing, educational measurement and evaluation is more important than ever. In addition to expected entries covering the basics of traditional theories and methods, other entries discuss important sociopolitical issues and trends influencing the future of that

research and practice. Textbooks, handbooks, monographs and other publications focus on various aspects of educational research, measurement and evaluation, but to date, there exists no major reference guide for students new to the field. This comprehensive work fills that gap, covering traditional areas while pointing the way to future developments. Features: Nearly 700 signed entries are contained in an authoritative work spanning four volumes and available in choice of electronic and/or print formats. Although organized A-to-Z, front matter includes a Reader's Guide grouping entries thematically to help students interested in a specific aspect of education research, measurement, and evaluation to more easily locate directly related entries. (For instance, sample themes include Data, Evaluation, Measurement Concepts & Issues, Research, Sociopolitical Issues, Standards.) Back matter includes a Chronology of the development of the field; a Resource Guide to classic books, journals, and associations; and a detailed Index. Entries conclude with References/Further Readings and Cross References to related entries. The Index, Reader's Guide themes, and Cross References will combine to provide robust search-and-browse in the e-version.

The Probation and Parole Treatment Planner Apr 30 2020 The Probation and Parole Treatment Planner provides all the elements necessary to quickly and easily develop formal treatment plans that satisfy the demands of HMOs, managed care companies, third-party payors, and state and federal review agencies. Saves you hours of time-consuming paperwork, yet offers the freedom to develop customized treatment plans for clients on parole or probation. Organized around 29 main presenting problems, from probation/parole noncompliance and vocational deficits to violent aggressive behavior and childhood trauma, abuse, and neglect. Over 1,000 well-crafted, clear statements describe the behavioral manifestations of each relational problem, long-term goals, short-term objectives, and clinically tested treatment options. Easy-to-use reference format helps locate treatment plan components by behavioral problem or DSM-IV-TR(TM) diagnosis. Includes a sample treatment plan that conforms to the requirements of most third-party payors and accrediting agencies (including HCFA, JCAHO, and NCOA).

ACL Injury and Its Treatment Oct 25 2019 This volume presents detailed information on surgically relevant anatomy and histology of the anterior cruciate ligament (ACL), biomechanics, diagnostics, and ACL reconstruction. In light of the growing body of evidence demonstrating the advantages of anatomic ACL reconstruction over traditional methods, there are also discussions of single anteromedial bundle reconstruction and anatomic ACL reconstruction with abundant descriptions of experimental and clinical studies. In addition, particular attention is given not only to techniques such as ACL augmentation, bone-patella tendon-bone reconstruction and computer-assisted navigation, but it also presents expert analysis of revision of ACL reconstruction, complications, and the future perspectives of ACL reconstruction. Edited by authoritative orthopedic surgeon from the Japanese Orthopaedic Society of Knee, Arthroscopy and Sports Medicine (JOSKAS), this book provides up-to-date information for orthopedic surgeons and physical therapists specializing in the ACL. The research evidence will broaden readers' understanding and enable them to optimize outcomes for patients. As ACL rupture is a common injury especially for high-level athletes, it will also attract sports trainers and team physicians who are interested in a recent update on this field.

Rhinology Mar 22 2022 Drs. David Kennedy and Peter Hwang bring together the expertise of a who's who of rhinology specialists in Rhinology: Diseases of the Nose, Sinuses, and Skull Base, a major reference covering current knowledge on the pathogenesis as well as the medical and surgical management of sinonasal and skull base disorders. It offers in-depth coverage of all key topics in the subspecialty of rhinology, ranging from rhinosinusitis to endoscopic skull base reconstruction and more. Key Features: A substantial section on surgical methods for treating skull base disorders, including endoscopic skull base surgery. A DVD containing 21 professionally produced videos, narrated by Dr. Kennedy, and showing various contributors demonstrating the key pearls and pitfalls of surgical techniques discussed in the book. One hundred detailed color illustrations by medical artist Christine Galapp, along with over 600 photos and x-rays. Comprehensive coverage of sinonasal anatomy and physiology, as well as the medical and surgical aspects of sinonasal disease and skull base tumors. This multimedia reference is the definitive go-to guide for rhinology residents as well as a comprehensive reference for practicing otolaryngologists and neurosurgeons who wish to expand their surgical expertise, develop a broader armamentarium of techniques, and successfully manage their patients with sinonasal and skull base disorders.

Assessing Student Learning Jul 26 2022 Assessing Student Learning is a standard reference for college faculty and administrators, and the third edition of this highly regarded book continues to offer comprehensive, practical, plain-spoken guidance. The third edition adds a stronger emphasis on making assessment useful; greater attention to building a culture in which assessment is used to inform important decisions; an enhanced focus on the many settings of assessment, especially general education and co-curricula; a new emphasis on synthesizing evidence of student learning into an overall picture of an integrated learning experience; new chapters on curriculum design and assessing the hard-to-assess; more thorough information on organizing assessment processes; new frameworks for rubric design and setting standards and targets; and many new resources. Faculty, administrators, new and experienced assessment practitioners, and students in graduate courses on higher education assessment will all find this a valuable addition to their bookshelves.

Advances in Medical Education Nov 25 2019 About 550 registrants from 51 different countries attended the Seventh Ottawa Conference on Medical Education and Assessment in Maastricht. We received 525 abstracts for the conference, divided in thematic poster sessions and platform presentations. Organising the conference was an honour and we tried to meet the high standards of a friendly and relaxed atmosphere which has characterized previous Ottawa conferences. During and after the conference about 250 papers were submitted for publication in the conference proceedings, leaving us little time for a post-conference depression. Despite the large number of papers, the editors have attempted to review and edit the papers as care fully as possible. Occasionally, however, correspondence exceeded reasonable deadlines, preventing careful editing of a small number of the papers. Although we felt that our editorial task was not quite finished, we nevertheless decided to include these papers. We thank the many authors for their enthusiastic and prompt response to - occasionally tedious - editorial suggestions and requests. We are sure that this collective effort has resulted in a book that will make an important contribution to the field of medical education. The editors want to thank Jocelyn Flippo-Berger whose expertise with desk top publishing and perseverance was a great help.

Handbook of Clinical Anaesthesia 3E Jun 13 2021 The Handbook of Clinical Anaesthesia has been completely updated for this new edition, providing trainee anaesthetists with a concise but comprehensive source of clinical information, and qualified anaesthetists with an indispensable aide. Written and edited by experts in the field, this compact but detailed text provides all the essential practical knowledge required by anaesthetists on co-existing medical conditions, operative procedures, and techniques. The handbook is presented in Parts 1 to 3. The first part covers Patient Conditions; the second part Surgical Procedures; and the third part Anaesthetic Factors. Each part is subdivided into sections on each organ system, and each section is divided into chapters. These chapters are in alphabetical order, and cover all common and rare conditions that anaesthetists will encounter within their practice. Trainees will find this book to be an excellent general guide, but in particular a provider of reliable information in preparation for examination as well as teaching clinical technique and practice.

Urogynecology and Reconstructive Pelvic Surgery E-Book Jun 01 2020 Edited and authored by some of the most respected figures in the field, this newly revised book is your comprehensive guide to all areas of urogynecology, including urinary and fecal incontinence, urodynamic testing, management of genuine stress incontinence, pelvic organ prolapse, overactive bladder, and much more. Uniquely organized to reflect a physician's decision-making process, this practical, clinically oriented text moves from basic concepts through to clinical and urodynamic evaluation, management, and treatment. Inside, you'll find evidence-based assessments of appropriate therapies, along with algorithmic approaches to common complaints, and clear surgical illustrations. Exclusive to the third edition is a section addressing painful and irritative voiding disorders, including overactive bladder, as well as 20 new case presentations that offer opinions from the leading experts in urogynecology and urology. Features step-by-step instructions for urodynamic testing. Addresses all urogynecologic disorders, including genuine stress incontinence · pelvic organ prolapse · defecation disorders · painful and irritative voiding disorders · and specific conditions such as urinary tract infection. Presents vital information on urethral injections, covering the newest treatment options available. Examines the use of autologous materials and mesh in reconstructive pelvic surgery. Uses over 300 crisp illustrations to illuminate every detail. Contains a new section on painful and irritative voiding disorders, including a discussion of overactive bladder and the latest treatment options available. Discusses urodynamics and the most up-to-date testing available for urethral sphincter function. Features 20 all new case presentations with expert commentary.

Assessment at 16 Aug 27 2022 What students are deemed to have achieved when they are sixteen is the measure of how successful or otherwise their progress through the system of compulsory education has been. And yet despite the importance of the process there has been no clear consensus about how best to assess students at sixteen. The various formal examinations which have been tried have now largely been

superseded by the GCSE: a common system of examining at sixteen. Originally published in 1988, the book discusses the development of this system, its application to the main subject areas of the curriculum and some of its innovative aspects from both a theoretical and a practical standpoint. In addition, it also looks at the broader aspects of assessment of pupils at the age of sixteen and how we can give a more rounded indication of their achievements and abilities by the use of profiles and records of achievement.

Fundamentals of the Physical Therapy Examination Oct 29 2022 Fundamentals of the Physical Therapy Examination: Patient Interview and Tests & Measures, Second Edition provides physical therapy students and clinicians with the necessary tools to determine what questions to ask and what tests and measures to perform during a patient exam. This text utilizes a fundamental, step-by-step approach to the subjective and objective portions of the examination process for a broad spectrum of patients. This edition has been updated and revised to reflect the new APTA Guide 3.0, and the Second Edition also includes new and extensive coverage of goniometry and manual muscle testing techniques with more than 300 new photographs.

Concussion in Sports, An Issue of Clinics in Sports Medicine - E-Book Nov 06 2020 This issue of Clinics in Sports Medicine will explore all aspects of sports-related concussion, such as the biomechanics and epidemiology of concussions, as well as special considerations for female and pediatric athletes. The issue will also include articles on return-to-play and retiring decisions after sports-related concussions.

Pediatric Allergy, E-Book Feb 09 2021 With complete, concise coverage of prevention, indications, diagnosis, and treatment, Pediatric Allergy, 4th Edition, is your go-to resource for current, clinically-focused content in the rapidly changing field of allergies and immune-mediated diseases in children. This highly regarded reference fully covers immunology and origins of allergy, growth and development, pregnancy, infancy, and early, middle, and late childhood—all with a new, practical, clinical focus. You'll find authoritative coverage of the full range of allergies in pediatric patients, from asthma and other common conditions to rare or uncommon allergies, providing a one-stop resource for clinicians across specialties who care for children. Focuses on the clinical application of science to the bedside, including clinical pearls discussing best practice approaches and guidelines. Integrates the latest research on the origins of allergy in early life, including pregnancy, the neonate, and infants. Includes new, evidence-based management guidelines for various diseases, including food allergy, atopic dermatitis, asthma and immunodeficiency. Provides new content on the prevention of allergies; asthma, eczema, and food allergies in young children; and extensive current guidelines and new therapies. Offers up-to-date information on key areas such as food challenges, skin testing, IgE diagnostic labs, immunotherapy, clinical immunology diagnostic testing, molecular diagnostics, and lung function testing. Highlights current guidance from a new team of leading experts with 150 anatomic schematics, clinical photos, and algorithms—many new to this edition. Covers gene therapy, stem-cell therapy, and a host of immunodeficiency diseases found in children with allergies. Discusses targeted biologics for severe allergic diseases, defects of innate immunity, rheumatic diseases of childhood, and inflammatory disorders.

Neuropsychological Interpretation of Objective Psychological Tests Apr 11 2021 The inter-comparison of specific skills as represented by performance on neuropsychological tests is at the heart of the neuropsychological assessment process. However, there is a tendency to regard the interpretation of single tests as a process that is independent of performance on other tests, with integration of test information representing a summary of these individual test performances. As neuropsychology has become increasingly sophisticated, it has been recognized that many factors influence the performance on any given test. The meaning of the same score may vary considerably from one person to another, depending on his or her performance on other neuropsychological tests. Thus, a low score on the Halstead Category Test may indeed reflect frontal lobe damage, but only if we first rule out the influence of visual-spatial problems, emotionality, attentional issues, motivation, fatigue, and comprehension of the instructions. Simplistic interpretations that assume a common interpretation based on a specific score will inevitably lead to errors in interpretation and conclusions. The purpose of this book is to provide each test that is described with a compendium of the possible interpretations that can be used with a variety of common tests that are often included in a neuropsychological test battery. The first chapter discusses some of the pitfalls and cautions when comparing the tests, while the second chapter examines administrative and scoring issues that may be unclear or unavailable for a given test.

Evolutionary Algorithms for Solving Multi-Objective Problems Sep 16 2021 This textbook is a second edition of Evolutionary Algorithms for Solving Multi-Objective Problems, significantly expanded and adapted for the classroom. The various features of multi-objective evolutionary algorithms are presented here in an innovative and student-friendly fashion, incorporating state-of-the-art research. The book disseminates the application of evolutionary algorithm techniques to a variety of practical problems. It contains exhaustive appendices, index and bibliography and links to a complete set of teaching tutorials, exercises and solutions.

Assessment In The Classroom May 24 2022 Educational assessment, at one time a relatively uncontroversial subject, is now riven by a diversity of views. The most crucial division is between those who continue to believe in the effectiveness of objective assessment techniques and those who favour alternative methods. This book presents an analysis of the strengths, weaknesses and rationales for both.

Principles and Practice of Urology Aug 15 2021 The second edition of this two volume set has been fully revised to provide the most recent advances in the field of urology. Divided into 20 sections, this comprehensive guide begins with an introduction to the basics of urology and presentation and investigation of associated diseases. The following sections provide extensive coverage of the various aspects of urology, including emergency urology, paediatric urology, female urology and urinary tract obstruction. Volume two discusses surgical aspects, including reconstructive urology, transplant, uro-oncology and reproductive urology. Each section includes the various approaches such as open, laparoscopic, endourologic, microsurgical, prosthetic, tissue and genetic engineering, and robotic surgeries. This new edition is well-illustrated with nearly 1000 images and tables. Key points Fully revised, new edition presenting latest advances in urology Covers diagnosis and treatment of many diseases and disorders Volume two provides extensive coverage of surgical aspects Previous edition published in 2003

Pocket Guide to Musculoskeletal Assessment Jan 08 2021 Providing a handy framework for conducting efficient and organized patient assessments, the second edition of this practical guide includes even more special tests, treatment options, and resources to help readers perform thorough and efficient musculoskeletal assessments of patients. Its small size and lay-flat spiral binding make it easy to refer to during actual patient treatment, and graduated tabs marking the location of each chapter and appendix make it convenient to find information quickly. Organized in an outline format, each of the 15 chapters includes an overview of subjective and objective examination topics for a specific body region or system, followed by a quick reference table of special tests and treatment options. A mini CD offers 35 video clips of common tests. A web launcher provides easy access to every special test discussed in the book. Chapters are written in an outline format so readers can quickly find the information they need. Examination outlines utilize the "subjective" and "objective" portions of the traditional SOAPG note format - making the guide accessible to any health professional who performs musculoskeletal assessment. Special tests and treatment options are presented in tables, providing succinct, up-to-date information on the most common tests and treatment options. The convenient pocket size and lay-flat, spiral binding provides increased portability and usefulness. The extensive appendices of assessment tools and resources provide additional options for patient assessment. A companion CD-ROM features video presentations of thirty-five special tests plus internet access to additional video presentations of tests discussed in the book. The addition of many new special tests include Scapular pinch, O'Brein's, Pain provocation, Anterior/Posterior load and shift, Biceps load, Posterior impingement sign, and Anterior slide tests; TFCC load, Piano key, and Watson/radial stress tests; Hop and fulcrum tests; and Swain test. New and updated treatment options include a description of neuromuscular training exercises for shoulder conditions, a new treatment for finger injuries, mobilization and manipulation treatment options for the thoracic and lumbar spine, Femoral shaft stress fracture and Osteitis pubis for the hip, and Perturbation training for ACL deficient knees. Expanded resources include the Glasgow coma scale, information on blister care, the McGill Pain Questionnaire, Physical Therapy Preferred Practice Patterns, the UCLA Shoulder Scale, Modified Oswestry Low Back Pain Disability Questionnaire, and the 2000 IKDC Subjective Knee Evaluation Form.
