English Electric Class 50 Diesel Locomotive manual Nov 01 2022 The Class 50 locomotives were built by English Electric between 1967 and 1968. Fifty examples were built, and were initially used to haul express passenger trains on the, then non-electrified, section of the West Coast Main Line between Crewe and Scotland. They were originally hired from English Electric Leasing, and were eventually purchased outright by BR around 1973. Class 50s were nicknamed "Hoovers" by rail enthusiasts because of the distinctive sound made by the air-filters originally fitted (these proved unreliable, and were removed during mid-life refurbishment, but the "Hoover" nickname stuck). Once the electrification of the line from Crewe to Glasgow was completed, the locomotives were moved to services in the south west of England, primarily on the mainline from London to Exeter, and were eventually retired from service in 1994 after being progressively replaced by the InterCity 125 High-Speed Trains (HSTs).

in 2015 by VelocePress. Written in easy to understand language, this is possibly the most user-friendly and comprehensive owner's workshop manual ever published for first generation 283 cu. in. V8 powered Corvettes. There are detailed instructions for the overhaul, service and maintenance of the major mechanical and electrical components. A section on RPO's identifies each option by part number, and their installation and effects on performance are discussed. In addition, there is a comprehensive section on the various fuel injection systems fitted to this series of Corvettes. Finally, there is a section on 'Increasing Power and Performance'. The reproduction of a factory handbook included in the original Clymer publication has been omitted due to the fact that there were numerous variations of the official Chevrolet handbook that were issued during the production run of this series of Corvettes. Therefore, it is recommended that this manual be used in conjunction with the 'Owners Handbook' that was issued with your automobile. Also, the 1960 AMA specifications have likewise been omitted as they are no longer relevant.
